#### UP FROM THE MOUNTAIN. The Tough Lot of Darkeys Who Are Attending

Mountain have already been tried this week, and before Saturday a number of well-known residents of that locality will be inspecting the defective old prison. About the hardestlooking crowd of darkeys that have eyer a:tended a quarter sessions court are here this week. The majority of these, with a lew whites, who are but little better, come from the mountain. Most of these people are witnesses on one or another side of cases, and if they are not they come to town just the same. They seem to think the courts cannot be run without them and they come in early on Monday morning, remaining through the week. Where these people sleep and eat it is very difficult to tell, but they can nearly always be found hanging around the court house steps, especially if the around the court house steps, especially if the sun is shining. Some of them sleep at the almshouse, and every morning at an early hour they can be seen coming down East King street. Last night it seemed that the coons encamped on the court house steps, as they were there until a late hour. Mingling with those from the mountain was asprinkling of bad Lancaster darkeys and some very tough whites. The majority of the crowd were drunk and they made things very lively. Several had harmonicas on which they played while others danced. Two mountain females seemed to be very popular with the galant mokes and all wanted them; at one time this nearly raised a row. During the evening one wench tumbled down the big stone steps and broke an arm, but this did not disturb the others. Last night's crowd was a nuisance The pavement was full of darkeys until midnight, and the moon's bright rays had no show among the black spots on the steps. It the county authorities think this is a fit place for such a crowd to "bunk" they should see that they behave.

#### LOVE AND SUICIDE. Fatal Ending to a Refusal to Marry-Youth's

Strange Infatuation.
In Philadelphia Jacob Fisher, a young In Philadelphia Jacob Fisher, a young man of respectable family and who had always moved in good society, committed suicide in a disreputable house, because one of the inmates refused to marry him. He became infatnated with the girl soveral months ago and visited her frequently, despite the pleadings of his friends. He told her a week ago that he would kill her and then shoot himself if she persisted it her refusal. She then asked him to think seriously over the matter and call to-day for an answer. When he asked her for her final decision she told him she would not be a party to the estrangement from his lamily which would surely follow their marriage. He replied that if he could not marry her he wanted to die, and, drawing a revolver from his pocket, fired a builtet through his heart and fell dead at her feet.

and fell dead at her feet.

The friends of the girl sayshe was strongly attached to the man, but because it would be impossible for him to retain his position in society and be recognized by his family after he acknowledged her as his wife, she used every endeavor to induce him to give her up and lorget her for his own sake. She is almost wild with grief over the tragedy enacted before her eyes, and a strict watch has been set upon her actions for fear that she will attempt suicide.

Cut to Pieces by the Care, John Smith, an employe of the steel works at Steelton, Dauphin county, attempted with two other men, to cross the railroad there, Wednesday evening. A shifter was just noving a draft of cars up the siding, and the two men, who were slightly in advance of Smith, succeeded in crossing in safety, but the old man caught his foot and fell across the track. Before he could get up the cars passed over his body and it was literally chopped to pieces. Four cars passed over

The Pension Office Is a Political Machine. The Senate committee on the expenditure of public moneys further examined Pension Commissioner Black, Wednesday morning with regard to the charges made by him

that the pension office under some of his predecessors was managed as a political machine. Senator Harrison called up the case of private B. F. Worrell, first New Jersey volunteers. Claimant's pension was granted in 1866 for loss of left leg as a result of a wound received while on parol duty in 1862. The name was dropped from the rolls in 187a by Commissioner Bentleyon the ground of fraud, evidence having been submitted that claimant in curred his disability while absent from his regiment without leave. The matter was ap-pealed and the action of the commissioner was sustained. Among the papers in the case brought to the attention of Commissioner brought to the attention of Commissioner Black was a letter from the claimant to Commissioner Dudley, congratulating him upon his confirmation, complaining that injustice had been done the writer and asking for a private interview at which he might have an opportunity of explaining away the things alleged against him. This letter was familiar in tone as if written by an old acquaintance and was dated from the rooms of the New and was dated from the rooms of the New Jersey Republican association. It was indorsed "special" by Commissioner Dudley and upon this the case was again reviewed. The reviewer in his report stated his conviction the claimant was not wounded in the line of duty and that the dropping of the name from the rolls was proper. Commissioner Dudley made an indorsement upon this report to the effect that the judgment of the reviewer was in his outplen erromeous and ordering the restoraopinion erroneous and ordering the restora-tion of claimant's name to the rolls to date

from the last payment. This claimant is now drawing \$24 a month.

Here was a case, he continued, which had been thoroughly investigated and condemn-ed by the highest authority, and by the unanimous torce of the pension office; yet at the conclusion of all these condemnations the claimant made a strong personal appeal, blending with it political statements, and

#### ASSORTING THE CARP.

A Great Day at New Providence When They

Drained the Fish Ponds. Several hundred people were at New Providence yesterday to see the carp taken from the ponds of Hiram Peoples. Among the number were many Laucaster folks. Mr. Peoples is an extensive raiser of carp and has quite a number of ponds. Two of these are situated near the Quarryulle railroad just north of the village of New Providence, and from these the fish were taken. A number of other pends are south of the village. The object in removing the fish was to separate the large carp or spawners from the smaller of the tribe in order to prevent the latter

from eating the spawn.

The water was started to run from the ponds in the morning, and after dinner the work of removing the fish began. The large carp were first taken out with nets. There were about thirty of tremendous size; the largest weighed 115 pounds, and measured 28 inches in length. After the big fish had been taken out about 25,000 small try, ranging in size from one inch to four and a half inches in length were captured. The small fish were placed in other ponds and the large ones were afterwards placed back in their old quarters. The middle-sized fish are kept in separate ponds from the very small and large ones. The scene at the pond was very interesting.

and when the large fish were taken out there was considerable excitement. The folks who went to see the removal were very hospita-bly entertained by Mr. Paoples, who gave them an excellent dinner. Among those present were District Attorney Candidates Weaver and Reinschl; Representative Brosius; Manor Statesman John H. Landis

From the Boston Transcript,

During a snowstorm much more than a year ago a lady gave to two or three ragged boys the job of cleaning her sidewalk. When the work was done she sent, by her own little son, not only the price agreed upon, but a generous "chunk" of gingerbread besides for each young laborer. The incident was completely forgotten. A few days ago the boy who was the bearer of his mother's county was passing, with some small companions, through one of the rougher streets panions, through one of the rougher streets of the city, when they were set upon by a crowd of street Arabs, who dathed their faces with red paint. As the eye of one of the young ruffians tell upon this particular boy, he exclaimed: "Fellers, that's the boy that gave us the gingerbread! Ain't I sorry we touched him? Say, Mike, if ye lay hand on that kid again, I'll bust ye!" So the (ginger) bread so long ago " cast upon the waters " did " return after many days.

The spigot, which lits in the end of the faucet, has openings to correspond with those in the faucet and by being furned acts to open or close the discharge

The street commissioner complains about the manner in which some of the streets, and especially North Queen and Duke, are sprinkled by the person having the contracts for dampening them. He says that too much water is used and the streets are "slopped" instead of sprinkled. In some places there is a great deal of mud, and the beds of the streets are damaged by the excessive use of

Lying With the Read High.

From Hall's Journal of Health It is often a question amongst people who are unacquainted with the anatomy and physlology of man, whether lying with his head exalted or even the body, is most wholesome. Those who consult their own ease on the point argue in favor of that which they pre-ter. Now, although many delight in policerter. Now, although many delight in bolster-ing up their heads at night, and sleep soundly without injury. It is nevertheless a danger-ons habit. The vessels through which blood passes from the heart to the head, are always lessened in the cavities when the head is rest-ing in bed higher than the body; therefore in all diseases attended with lever, the head should be pretty near on a level with the body; and people ought to accustom them-selves to sleep in this position to avoid dan-
