Attempts are now being made to organize a base bail club in town among our local players, and the per-sons at the head of the movement promise to give the town a first-class nine this summer. It is rumored that the grounds at the head of Walnut street have been secured. The managers of the clubs for the past two seasons were losers to a considerable amount by their ventures. Town Notes

INDESTRUCTIBLE GRAINING.

No CRACKING, NO PERLING, NO BLISTER ING.

We have a system of graining new wood that must, in the near future, take the place of the old system on all new work, its merits being as follows: Total abolition of a painted groundwork, speed and cleanlitess in working it, beauty and transparency of finish, smoothness and durability, and the capability of receiving as high finish as hard wood by the same methods. This process is the nearest approach to natural wood that has yet been discovered. Call and see samples.
