### Railroad Wreck,

Last night a wreck occurred at the branch intersection at Middletown, on the Pennsylintersection at Middletown, on the Pennsyl-vania railroad, to four cars of the freight train west, drawn by engine No. 326. The cars were loaded with lumber and the standards of the cars breaking, the timber was thrown on the tracks, causing the wreck. The Col-umbia wreck crew left town at 12:11 a.m., and returned home at 6:39 a.m., having cleared away the wreck. Some delay was caused to freight trains, but no damage was done.

done. Engine 968, of the Pennsylvania railroad dropped from the rails yesterday afternoon while going around a curve at the Columbia rolling mill. After working about one-half hour the engine was replaced on the tracks. A 'new plank board walk has been put down at the Mill street crossing of the Penn-sylvania railroad. This is a much needed improvement. A Serious Cave-in.

## A Serious Cave-In.

Last evening a considerable cave-in occurred at the excavations for the foundation walls of the new house for John R. Kreider, on North Third street. The entire front along the pavement caved in to a depth of about ten feet. This will cause a delay of about four days, as it will take that time to remove the earth. The cause of the earth tailing is that this is all made ground.
