The Coroner's Inquest in York.

The coroner's jury in the case of John Hood, who was killed by a York police officer, spent three hours investigating the affair yesterday. They rendered the following verdict: "That John Hood came to his death from hemorrage of the heart, the result of a rupture produced by a bullet passing through the heart, and that the said bullet was discharged from a revolver in the hands of Police Officer George W. Powell, while in the discharge of his duty. While the respective members of this inquest deem the shooting an act in self-defense, we, as a body, do very severly consure the said Geo. W. Powell for the too hasty use of his revolver." The Coroner's Inquest in York.

The dead man's wife in her testimony said that she and her husband had had a little trouble that day but she did not send for Powell. When the officer came he told Hood to come along or he would shoot him. Hood to clot him testing about a page and the officer did told him to shoot ahead and the officer did. Other witnesses testified that if the officer

THE FITZ JOHN PORTER CASE. stor Seweil's Defense of the General in the

The Fitz-John Porter bill came up in the lenate Thursday and Mr. Sewell made warm defense of General Porter. He said this was the same bill that had passed before. There was nothing to be said now that would throw any new light on its subject matter. Mr. Sewell then recited the salient facts in the military history of General Porter, and reviewed the charges against him and the action on the case by the court-martial and by the later military board. Fitz-John Porter, Mr. Sewell continued, was placed under arrest and tried—tried on a charge of disobedience of orders—tried because he did not attack Jackson's right flank and walk over 25,000 of Longstreet's men, with every-thing against him and nothing in his favor, Mr. Logan inquired of Mr. Sewell his au-

Mr. Logan inquired of Mr. Sewell his authority for saying Longstreet had 25,000 men in front of Porter.

Mr. Sewell said his authority was the report of the military board—Generals Schofield, Terry and Getty. Mr. Logan said that the reports of Lee and Longstreet both showed that the latter could not possibly have had more than 6,000 or 8,000 men anywhere near Porter. where near Porter. Mr. Sewell insisted that his statements

were correct according to the records. It was a well established and recognized rule that detatched commanders had a right to exerdetached commanders had a right to exercise a discretion, and would be derelict in their duty if they did not exercise it under circumstances similar to those that then surrounded General Porter. After years of struggle to get a hearing a show of justice was at last given to General Porter. A board was ordered to investigate his case. A full and fair hearing was given to him and to the government side of the case, and it was established to the mind of everybody who heard the evidence, including the board itself, that General Fitz John Porter was justified in everything he had had done, with the single exception of the remarks he had made single exception of the remarks he had made about his commanding officer to his then friend General Burnside, which remarks were purely personal in their character. The pub-lic sentiment of the country had finally come to the aid of General Porter, particularly to the aid of General Porter, particle after General Grant's endorvement of case had opened the eyes of the public to the wrongs that had been inflicted on a brave and gallant officer. Mr. Sewell here had the clerk read a number of resolutions of Grand

clerk read a number of resolutions of Grand Army posts urging the passage of the bill. The people, he continued, had finally come to see that instead of being a criminal General Porter was a martyr.

"He comes now before you," said Mr. Sewell in conclusion, "I trust for the last time, to ask for justice—nay, Mr. President, to demand it. The time has gone by to ask that favor may be grantled to the man. that favors may be granted to this man that has been wronged. Logan Wasting His Breath. WASHINGTON, D. C., June 25. - | Senate | On motion of Mr. Sewell the Senate took up the Fitz-John Porter bill, and Mr. Logan took the floor in opposition thereto. Mr. Logan opened his speech by objecting to the bill on a constitutional point on the ground that Congress had no power to name a person whom the president should appoint to an office. Mr. Logan disclaimed any prejudice against General Porter, but the triends of Porter had placed the case before the country in a one-sided manner, and on that, letters had been obtained from distinguished men expressing views of the case favorable to Por-

Mr. Logan said that would be a case pre isely on "all fours" with this. He did not expect his words would have much weight in the Senate, for he always noticed that when the Senate was determined to do a thing it turned a deaf ear to everything was not a trial of Fitz John Porter. Porter had been tried and condemned. This was a trial of Abraham Lincoln, of James A. Gartield, and of many brave and distinguished officers of the army.

day's session of the convention of the Travel ers Protective association was begun at 9:30 was received and filed. The next business was the reading of the reports of the state president. In the report of the state of Pennsylvania it was announced that the Pennsylvania railroad had in the matter of baggage, gone 50 pounds better than the B. & O., and will carry 300 pounds free. A number of communications were read, among them one from the mayor of Philadel phia, regretting his inability to be present. The reports of standing committees were then read. The report of the press committee was received. It acknowledged indebtedness to the newspapers of the country for the advocation of legislation favorable to the traveling salesmen. It exceriates the Merchant's Traveler of Chicago, and charges it with duplicity and something akin to blackmail. The report recommends to the association that the Merchant's Traveler be dropped at once as the

official organ of the association, and that the organization establish its own newspaper. The report of the press committee will be discussed this afternoon. The legislative committee then read its report which was adopted. The next report was that of the railroad committee. It accused Senator Streator, of Illinois, of attempting to rob to prohibit railroads from seiling mileage

ONLY TWO SENATORS

Vote to Investigate the Bribery Charges Against Senator Payne, of Ohio.

WASHINGTON, D. C., June 25.—There was a short meeting of the Senate committee on privileges and elections this morning, during which the review of the testimony and arguments in the case against Senator Payne, of Ohio, was completed. A vote was then taken which resulted seven against recommend-ing an investigation and two in favor of Those who voted against an investi gation were Messrs, Teller, Evarts, Logan, Saulsbury, Vance, Pugh and Eustis. Those who voted for it were Messrs. Hoar and Frye Two reports will be made on the case to the Senate. The majority hold that the testimony presented to committee does not show that there was any money used in securing Senator Payne's election and that nothing has been shown that undue influence of any kind was wielded which changed the tide of senti-

CONCLUDING THE COMMENCEMENT.

A Musical Entertainment at Linden Hall Seminary. Littly. LITITZ, June 25.—Last evening's entertain ment at Linden Hall seminary was a complete success, and the managers of the institution are to be congratulated in having so well succeeded in developing the musical talent of their scholars. The programme

was a very elaborate one and included a musical characte and other features which were participated in by the pupils. There were no flowers but the decorations were beautiful. Miss Blackmore and Miss Potts did remarkably well, but the event of the evening was the plane solo of Miss Pauline Cooper, a truly marvelous performnce. Gillebrist's Sea Fairies was admirably ren-

dered, and the German dialogue Die Dunkel-blane Wiese gave evidence of careful training in the German language.
Rev. Hark's address "A word about vaca-tion," was eminently practical and was ex-pressed with his customary fluency of diction. The entertainment closed with Wagner's Pilgrim's chorus well rendered, and the whole concert was given without the smallest fault. There were several curious errors in our account of the commencement exercises ves terday; the types made Miss Canam say that women should know enough of arithmetic to enable them to keep account of the expenses of a "husband," it should have been of a

or a "husband," It should have been of a "household." The beauty of one passage in Miss Smith's eloquent valedictory was lost by the substitution of "farewell" for "good-bye" in our report of it. Black as an Anti-Corporation Candidate,

rom the Pittsburg Disputch, Rop.

Black, who sets forth the claims of that rising young Democrat to the public suffrages, justly makes his strong point as a leading opponent of the encroachments of corporations upon our political system.

Both by descent and by his own right, Lieutenant Governor Biack occupies an unquestioned position on that point. The utterances of Judge Black were among the earliest and most forcible warnings of the illegality and danger of railway discriminations; while the younger man has faithfully adhered to the principles so ably stated by his father. As a representative of popular rights against the corporations, he would present a strength which could not fail to attract attention among the thinking men of the state, If the Democratic party has the judgment and boldness to fight the next campaign solely on the enforcement of the state constitution, with Black as its leader, it will present an

RAILWAY MAIL CLERKS DISMISSED.

The Postmaster General Lets Twenty-nine Go The postoffice department on Thursday took action on the cases of the railway mail clerks who were reported as agreeing to re-

clerks who were reported as agreeing to resign in a body if one of their body was removed without cause being assigned, by removing twenty-nine, whose routes were on
Western railroads.

The order of removal issued by the superintendent of the railway mail service makes
acknowledgment to those clerks who have
kept the department informed of the scheme.

The postmaster general Thursday afternoon
said: "Several weeks ago information was
received by the department that a few postal
clerks who were apparently conscious that received by the department that a few postal clerks who were apparently conscious that there were reasons for their removal from the service were endeavoring to entist the co-operation of postal clerks generally in an as-sociation to be formed for the purpose of in-terposing their opinion on the questions of removals by threatening a strike, or the com-bined resignation of many clerks at one time, so as to menace the department with embar-rassment. The attempt to an list general corassment. The attempt to enlist general co operation failed, the greater number of postal clerks who were approached on the subject refusing to entertain it. It was the plan of the originators after the initiation of a mem ber, during which he was bound by an oath to secreey and obedience, to secure his resig-nation in blank and to have all the resignaions in the hands of the executive committee

to be filled simultaneously, and to require the clerks who were members of the associa-tion to abandon their runs at a time to be fixed. Their object was to maintain their own positions and tenure of office,
"The department has waited until the
principal ringlesiders and executive officers
were certainly known, and those removed embrace all who have been specially active. The scheme never secured general favor and the department is not desirous of punishing by removal those who have been cheated into nominal co-operation, but does not wait for resignations from any who have been active in the enterprise. It is a curious commen-tary on the folly of men, that upon examin-ing the files in the cases of the men who are removed by this order it appears that very many of them have been complained against for some reason and their removal sought before; but the department had re-fused to make the removals and the entry had been made in their cases for their retention. Their positions would have been quite secure had they not forfeited them by in-subordination. The headquarters of the movement has been in Indianapolis. Some little effort was made to organize at Chicago and other places, but with no success. I do not anticipate the least trouble or inconve-nience to the business interests of the country," concluded the postmaster general consequence of these removals.

THE PRESIDENT'S CURB BIT.

He Draws it Up Sharp on the Acts of Congress The Veto Hatchet is Sharp. President Cleveland is creating a regular canic in Congress. He sent twenty-nine veto

messages in on Thursday. Up to the reception of this batch he had sent in forty-four veto messages. During Gen. Grant's eight years' administration he sent only twentynine vetoes. Nearly all of the pension bills vetoed by the president covered claims pro-viously rejected by the pension bureau. The pensions committees of Congress thought the claims had been rejected for improper reasons. Several of the cases vetoed were unanimously reported from the committees. A mathematician, who has figured up the amount of money involved in the veto bills sent in up to this morning, says that it would just about foot up, the sum appropriated by Congress for the expenses of the White House

during a year. Mr. Cleveland is the first president to veto ension bills. Only one has ever been vetoed before his time. The reasons given by the president in nearly every case are regarded as good, but the political influences which secured their passage are very much dis-turbed. Some of the public building bills vetoed will perhaps cost the members their reelection. It is understood that the president has only begun his veto work.

It is now regarded as certain that the river and harbor bill will be vetoed. This is another source of great distress to the members and senators, who have piled up a very large bill to make up for the lack of one last year. It is also understood that the ongress in the consideration of the big ap propriation bills. He thinks it is an outrage that Congress should put off all important bills to the closing days of the session, and

It is not improbable that some one of the great appropriation bills may be vetoed. If there is any item in any one of them which he does not approve, that will be the only way he can reach it. He havers strongly a change in existing laws so that the president will have the power to veto separate items in a bill. This action will undoubtedly delay inal adjournment. He is entitled to ten day for the consideration of each of these im-portant measures, and it is expected that he will use the full time before giving his signa-

ANNIVERSARY EXERCISES.

Christ's Church Aid Society Have a Please Reunion and Entertainment. The fifth anniversary of Christ Church Aid ociety, composed of the young men and women belonging to the church and whose organization is for the purpose of raising funds for general church uses, was held las evening and was a very pleasant affair,

though the bad weather kept many away who would otherwise have been there. The programme consisted of the reading of the annual reports of the secretary and treasurer, which showed the society to be in a prosperous condition; the choral society ren-dered some tine vocal selections, and a junior society gave several selections combining both vocal and instrumental music. Several members of the Liberty band also gave in-strumental pieces. Then followed a number of choice readings and recitations by ladies

of the church.

At the close of the exercises in the church, the society adjourned to the residence of Mrs. Mary Weitzel, North Mary street, where they were entertained by a substantial collation. The anniversary celebration was voted

Louis Brunner, a Russian tailor, and Rachel Meyer, were married by Judge Duffy in the Essex Market police court, New York on Aug. 17, 1883. After a while they quar-reled, and decided to separate. They went to Rabbi Josef, the pastor of a Norfolk street synagogue, who lives at 54 Ludlow street and

he gave them this:
"This is to certify that I have divorced this day Louis Brunner, the son of Isaac, from Rachel, the daughter of Meyer Jacob, accord-ing to the Jewish law.

"ABRAM JOSEF." The rabbi charged \$5 for this divorce which

both parties whom it concerned believed per-mitted them to marry again. Brunner began to regret his step the other day and when a friend explained to him that the rabbi's divorce was not good in law, he got from the bureau of vital statistics a certified copy of his marriage and showed it to his wife in proof of the inviolability of the marriage tie. She allowed herself to be convinced, and a recognition followed. A rather serious accident occurred at the large flour mill of H. B. Groff, at Fertility,

WESTERN LABOR TROUBLES. A LAKE SHORE ENGINE MOVED AT UMI-

CAGO AND UNCOUPLED BY STRIKERS. fered With by Strikers-Conditions of Trouble-The Outlook in Detroit and

Toledo-An Advance to Boston. CHICAGO, June 25,-At Forty-first street, this morning, thirty-five new switchmen, obtained by the Lake Shore from Toledo and other places on their line, were put to work, protected by fifty policemen. The indications are that an attempt will be made to-day to move freight. While the strikers are good-natured, they are determined that no busi-ness shall be done. No disturbance is yet re-

ported. Engine No. 485 was moved out of the ound house at 2:30 o'clock and run up to 43d street. Here it was coupled with a ca-boose and then moved back again to 42d street, where a train of ten freight cars was attached. A crowd of strikers and regular and special police followed it as it moved up the track. When just above 42d street a striking switchmen " threw " a switch and two cars were derailed. A halt was made and the strikers proceeded to uncouple the cars. They were recoupled again by the new men, but this was undone as promptly time, and when the police arrested John Fritch, a member of the executive commitee, and another man said to have been so tive in arresting the progress of the train,

there was a diversion. The strikers say that the men arrested had no connection with derailing the cars. There were over one thousand people standing about, but no signs of disorder were discernable. The train was left standing in the middle of the track, and some time would be

consumed in restoring it to running order. A MOR TAKES POSSESSION. CHICAGO, June 25.-1:10 P. M .- The situation in the Lake Shore strike is worse now than was reported this morning. A mob has taken possession of the round house at 42d street and derailed a number of switch engines. The chief of police has ordered additional force to the scene.

The Situation in Detroit DETROIT, Mich., June 25.-There are only six Lake Shore switchmen here, and as they are divided between a night and a day force, and further between the depot and the yards, there is no likelihood of their striking. There are but four of them members of the Switchmen's union,

The Outlook at Toledo

TOLEDO, Ohio, June 25 .- There are no indi-

cations of a strike of Lake Shore switchmen

here, and the railroad authorities say there

will be no trouble at this point. The 140 switchmen of the company here seem to take no interest in the Chicago difficulty. Advance In Boston, Boston, June 25 .- The freight handlers of Boston, recently presented to the railroad companies here a demand for 25 cents an hour for extra work, 25 cents a day more pay, a promotion of employes according to seniorty, etc. The Boston & Albany company has compromised on 15 cents advance and 161 cents for extra work. The other demands were substantially agreed to. It is

believed that the other companies will adopt a similar course. NEARLY ALL CATTLE REMOVED. The Order of the Secretary of the Interior Obeyed, and the Live Stock Taken From

the Indian Territory.
DALLAS, Texas, June 25.—Yesterday was the last day of grace for trespassing cattle in Indian territory, the 40 days grace granted by the secretary of the interior having expired. The cattle have all been driven off the Klows and Comanche reservations, the last roun up occurring about the 1st instant, and the remaining trespassing herds are on the territory of Choctaws, Cherokees, Creeks, Seminoles and Chickasaws, the mos of them being concentrated in the dominion of the latter nation, the governor of which, Jones Wolf, has issued his proclamation to the citizens of the Chickasaw nation and of the United States. Gov. Wolf sits down upon all purchases made by the Indians subsequent to the order of the secretary of the interior as deliberate and wilful fraud upon the Chickssaw people, and declares the same to be un' awful and therefore null and void because the Indians have given their notes with no other security than the cattle, with the secret understanding that the sellers will be paid out of the cattle in plain violation of the Chickasaw law passed to prevent this character of sale and purchase. The governor further says he will hold confiscated enough of the cattle to pay one dollar per head to the Chickasaw nation and commenced June 24 to expel those remaining by men summon for the purpose. He concludes by respectfully requesting cattlemen to take their stock, pay the reasonable price asked for the grass they have eaten and depart from the nation. lov. Wolf's proclamation has a business-like ring running through it. A force of special deputy United States marshals has been ordered from Dallas to see that the order of the secretary of the interior is at once enforced and that Gov. Wolf's proclamation is made.

Many thousand head of cattle are still illegally in the territory. Benjamin Moran Married.
