An excursion party for North Carolina, by way of Baltimore, Elchmond and Clarkesville, Va., will leave Shamekin on September 6, taking the regular 7.55 train on the Northern Central railroad. The fare will be 8 for the round trip from fishtimore, and all desiring to explore the rich timber and mineral lands of North Carolina, as well as the favour health recents should not fail. well as its famous health resorts should not fail to avail themselves of this opportunity. For full particulars apply to Dr. J. J. John, Shamo

is located at Blue Wing, N. C. and is owned by the Big American Reduction Company. Opera-tions have been successfully and vigorously prosecuted for two years, and the value of the ore has proven itself to be fabulously rich. The amount of ore in the mine is inexhaustible in quantity, and fabulously rich in quality. It will not many millions of dollars for the benefit of its fortunate stockholders. Geologists and ex-perts estimate it to be worth over \$100,00 0,000 12,000 to 15,000 tons of rich ore are in sight and surrounded. Taking 12,000 tons at \$35.00 a ton, (value of copper ore) it will yield \$30,000. The cost of mining and smelling being \$10 a ton or \$120,000, leaves a net profit of \$540,000. The slives which the ore contains is worth \$25 a ton, thus more than paying for the mining and smelling, leaving the copper production a net profit. The value of the silver in the ore increases excavations progress. Their amount of refined copper in one ton, is as much on an average, as the in one ton, is as much on an average, as the amount in three tons of the Lake Superior mine, which paid 125 consecutive dividends, or \$25,250,000. Copper mines have proven to be more substantial and profitable than gold and silver mines, having paid \$50,000,000 more in dividends than the latter. This company can pay a divithan the latter. This company can pay a divi-dend every three months after smelling opera-tions are begun. On account of the cheapness of laborand fuel they can mine, smelt, and re-nae copper for 5 cents a pound. A railroad is now in course of construction from Blue Wing to Clarksville, a distance of 16 miles, and up to within ill feet of the mines, will greatly faciliate operations.

Allmited amount of the stock is now for sale par (\$50). The object of the company being e its working capital, to erect smelting works and begin at once to smelt the ore. After the disposal of sufficient stock for this purpose there will be no more offered at present price-Four thousand shares is the amount of capital which is held by parties for investment, Indi-vidual stock is not offered for sale at any price. Such a chance is soldom offered, where such an normously rich return can be seen and feit. This advantage is a rare satisfaction in the in-vestment field. It will be permanent, as operations will continue indefinitely for many years. The ore constantly increases in value as it is taken out. The company would be pleased to have parties visit the mines and personally investigate them. They would be pleased to have a representative from every town visit them and report to their friends what they have seen, as seeing is believing. The stock of this company will positively prove to be one of the gilt edged securities of the world. The stock is not assessable. Any number of shares can be taken. The general office of the company is at Dills-burg, Pa. The officers are: John N. Logan, banker, Dilisburg, Pa., president; Joseph Dear-droff, banker, Dilisburg, Pa., treasurer; William Raker, Blue Wing, N. C., vice president and superintendent at mines; W. B. The Durham, Bine Wing & Clarksville railroad has been chartered under the laws of North Carolina and Virginia for the purpose of building and operating a railroad from Durham, in Durham county, N. C., to Clarksville, Mecklenburg ity, opening up one of the wealthiest timber, ineral and farming sections in the country. Raker City, situated sixteen miles southwest of Clarksville, is destined to be a place of import-ance on account of it being situated in the cop-per mining district, pronounced by Professor Hunt, one of our great geologists, has being one of the richest copper mines in the United States, and perhaps in the known world, and the product as easily mined.

These mines are at present operated, making a fair profit, which after the completion of the

sixteen miles of road aforementioned, will be equal to any mining dividends in the land. The timber consists of the best of yellow pine, so ex-tensively known in the Middle, Eastern and Northern states as North Carolina pine, used in the manufacture of ratiroad cars, &c. It siso abounds in immense tracts of white oak timber, the finest known. The land is well adapted to raising different kinds of grain and grass. Also for raising the celebrated Durham tobacco, so highly recommended and largely sold in the market. This part of the road is aiready let and under contract, and several miles at the Baker City end is already graded ready for the ties and rails. Durham City, situated in Durham county, at the southern terminus of the road, has a population of about 13,000 inhabitants. The road when completed will make the route north to Clarksville and Richmond about styty-five miles shorter than by the present road, which will be quite an inducement to shippers and travel, on account of the vast saving of fare and freight, it the most directline to Richmond, from which Baltimore, Philadelphia and New York trade can be reached. It will also be one of the best paying lines on account of trade North and south, including the opening of this heretofore undeveloped rich section of country. Also the most direct line South, passing through Raleigh, the capital of the state of North Carollina, situ-ated about twenty-five miles southeast of Dur-

The inhabitants are very anxious to have the above road completed, and are rendering every aid in their power to push it toward completion, knowing full well the vast benefit to be derived from this public thoroughfare. Taking every thing into consideration, this is destined to be one of the best paying lines of road in the coun-

The company is now offering only a limited amount of its stock for sale at a low figure, in order to get the road graded and from hid on its first sixteen miles on the Clarksville and Raker City end, and will be completed in six months nd trains running on the road.

It is proposed to commence, about the first of November next, the publication of a weekly newspaper at Raker City, the present terminus of the Durham, Bine Wing and Clarksville railroad, in Granville county, North Carolina.

It will be devoted especially to the copper mining and manufacturing industries of the town, and generally to the agricultural, mining and ratiroad interests of the central border counties of North Carolina and Virginia, The Journalistic experience of the editor—Captain Rufus Amis, of North Carolina—secures for the publishers the ability to make a live and aggressive newspaper fully abreast of the times.

For circulars and full particulars conserving oad, in Granville county, North Carolina.

For circulars and full particulars concerning mines, railroads, lands and all other matters, address W. Raker, Blue Wing, North Carolina, who has lived with his family in that section for nor than two years.
