Swallowed a Horseshoe Nall.

From the BaitImore Sun.

An extraordinary case, resulting from the swallowing of a horseshoe nail, had a happy culmination on Monday night, and relieved

the painful anxiety of a whole household in East Baltimore, John H. Lederer, the eleven-year-old son of Mr. George Lederer, the eleven-year-old son of Mr. George Lederer, baker, No. 722 South Broadway, went with his father on his route on the morning of November 20. The boy had been carrying a horseshoe nait in his mouth, and surprised his father by announcing that he had swallowed it. Immediately the lad was sent home and a physician's aid invoked. The doctor made an examination, but could not locate the nati. He ordered some medicine, but Mrs. nail. He ordered some medicine, but Mrs. Lederer did not use it. All went along smoothly, Theonly sign to locate the nail was a croupy cough, which indicated that it must have lodged in the windpips. On Sunday night the boy came home from church and sat down to the organ, and while performance of the standard with violent coughing. Mrs. sat down to the organ, and while performing was attacked with violent coughing. Mrs. Lederer says her son then went to his room, and kneeling down to say his prayers she kneit beside him. "If ever I made a sincere prayer," said the mother, "I did it that night beside my boy. I prayed that he be relieved of the nail and be spaced to me." On Monday the boy was apparently at ease. After supper a began to play with a period." Whiladology he began to play with a pet dog. While doing so he was attacked with violent coughing. It was so straining that his face turned purple. Suddenly placing his fingers in his mouth he drew out the horseshoe nail, the point coming up first. There was joy in the house from that moment. When the nail came up it was covered with blood, and from its bright steel color, before being swallowed, it had turned black. Mrs. Lederer keeps the nail, which, in her belief, was removed from her son through a mother's prayer.

CUBED BY PRAYER AND FAITH. fier Voice Restored to Her After Being With out It Eight Years.

A remarkable case of restoration of speech to a young lady who had been dumb for eight years through the agency of faith and prayer is reported from Ashley, near Wiikesbarre, and the facts in the case are well authenticated. Miss Kate Martin, now 19 years of age, lost the power of speech through a severe illness of scarlet fever. Many of the physicians of the neighborhood exhausted the utmost resources of their skill in attempting to relieve her, but without avail. Of late years she has held the belief that her voice would be restored to her suddenly and miraculously, and has spent many hours in prayer. She was an earnest Catholic and. hearing of the wonderful cures effected by visiting the famous chapel of Knock, in Western Ireland, tried to induce her parents to let her pay a visit to the shrine. They were too poor to do this, but at her solicitation succeeded with some difficulty in procuring some of the plaster from the wall of the chapel. This was soaked in water and

on Sunday last Katle drank freely of the water in which the plaster had been soaked. After spending the whole of the evening in prayer she redred and on awakening in the morning found her speech restored to the morning found her speech restored to her in all its fulness and power. The first use she made of her recovered voice was to offer heartfelt praise to God, and the unusual sound of her voice issuing from their daugh-ter's room aroused her parents, who rushed in and joined their thanks to hers.

Medical autho-What is a Cold in the head. Medical authorities say it is due to almospheric germs, uneven clothing of the body, rapid cooling when in a perspiration, &c. The important point is, that a cold in the head is a genuine rhistis, an inflammation of the lining membrane of the nose, which, when unchecked, is certain to produce a catarrhal condition—for catarrh is essentially a "cold" which nature is no looper able to "resolve" or throw off. Bly's Cream Balm has proved its superfority, and sufferers from cold in the head should resort to it before that common aliment becomes scated and ends in obstinate catarrh.
