LANCASTER, APRIL 8, 1887.

Free Text Books for the Schools. bool board had an interesting school board had an interesting ion to it of the proposition for text books in the public schools.

It is a nice question for argument. On one hand it may be alleged that the se savors too much of paternalism, in wine the city do for the people what properly they should do for themnde necessary by free text books would er most heavily upon small property to pay them at the present rate; that it is unnecessary extension of the cost of the blic school system, etc.

On the other hand, it is most justly ned that the brand of pauper is fixed mon those who now use the books prohose parents or guardians are unable to re them; that free text books would able poor parents to keep their children longer time at school ; that cheaper purrates for books could be secured that the books could be kept in neater constion and would last longer as the property of the board, etc.

t the main question is one of finances What effect would the new plan have upon tax rate? It is estimated that the se per capita the first year would be \$2, or \$7,000 a year for the 3,500 children in the Lancaster schools. This is a big sum of money, and its expenditure is a serious matter to the city taxpayers.

The vote in the school board showed a trong feeling for free text brooks It would be the part of product by however, for the board proceed experimentally. Let the system in the primary schools, expet will sults, and then decide upon the up soon of the general adoption of the

Some Cabinet Questions.

It is a little singular that the consideration of foreign affairs in a cabinet meeting should show that the three most important issues of the kind concern our relations with Great Britain. The cabinet on Wednesday discussed the Canadian fishery dispute, the Alaska seal question, and a new point of contention growing out of the deuse of firearms. The fire department should mand made by England on the Haytien government for the payment of \$1,000,000 or the cession of Tortugas Island. This demand is based upon old claims, and very little seems to be known in this country of the nature of them, but as Hayti can not easily raise a million, the claims are no doubt remembered because England wants the islands.

It is reported that British war ships will bombard the ports of the little nation if the claims are not acknowledged at once, and that if they are acknowledged, the natives will massacre all foreigners. It is not bable that England has made any such brest, but it may be that the savage population of the island will be driven to commit outrages by English menace, or the seizure of Tortugas Island. As a large number of Americans are en-

gaged in business in Hayti, and our comerce with the island is much larger than that of any other power, it is of great importance that England should be cautioned against high-handed measures that may provoke the Haytiens to blind revenge upon peaceable American merchants. The importance of our commerce with Hayti, may be realized by a survey of the following facts, taken from the last report of the bureau of statistics of the tressury department : The total imports of merchandise in 1886, from the United States, had a custom-house valuation of \$2,963,147, and the exports from Hayti to the United States in the same year, are reported \$2,603,992. This is exclusive of breadstuffs which amounted to over half a million more. The total exports of merchandise are placed at \$3,067,736; so it is evident that if any nation under the sun has an interest in Hayti it is the United

It is said that England has sustained Canada in the fisheries dispute but the sens is clear and we cannot afford to sendon our treaty rights. The wanton saughter of female seals off the coast of Alaska is a more delicate question, as it lakes place on the high seas and would appear to be beyond the reach of our law. is in charge of the males and go a reaging far out at sea where they are capsed by vessels under the English flag ed their young starve to death. An ermed nation should be ready to make arrangement to prevent this bardestruction of our seal fisheries. the course of England has not been that of justice, and as her to touched in all these questions she no doubt be stubborn. Already some super-serviceable Democratic botheads are agitating the question of Carlisle's reappointment of Mr. Randall to the chairmanship of the committee on appropriations. There is no utility or sense in deciding an action long in advance of the necessity of such decision and without those attendant circumstances which are the outgrowth of events yet in the womb of time. If Speaker Carlisle is reelected, he may safely be trusted to administer his high place for the good of the people and the whole Democratic party.

SINCE Rhode Island has gone Democratic Republican editors are discovering what a little state it is.

THE Democratic violet that has peeped above the Republican anow in Rhode Island is a pretty Easter flower.

It is said that the late General Logan's America," will create a sensation in military and literary circles. The aim of the author seems to have been to elevate the volunteer soldler of the republic in the late war at the expense of the regulars. The early chapters are devoted to a similar purpose with refer ence to the previous wars, from the Revolution down to the conflict in Mexico. But the author only becomes peppery when the his-tory of the rebellion is under treatment. The West Point Military academy is handled with great severity, and the so called military lobby, by which it is boldly charged that during and since the war, legislation of Congrees was influenced against the volunteer and in favor of the regular, is denounced in terms of the severest reproach. In the book Gen. Sherman is handled without gloves.

"THE Pope insists that Dr. McGlynn must go to Rome." So says a dispatch Leo XIII is probably not losing much sleep over this question.

Now let the Philadelphia Democracy get down to work and organize.

Some wag played a loke on Amos J. Cummings, the editor of the New York Evening Sun, by having him print these stanzas or the editorial page of that bright paper: GOOD ADVICE TO ADVERTISERS.

Delighted are they who at end of the day,
Are blessed with the Evening Sun, Sun, Sun, so paper on earth can equal its worth, And yet it is only begun, gun, gun,

It's newsy and bright and able to fight, So that it will never get left, left; And every line will sparkle and shine From pencils remarkably deft, deft,

Read always, you know, by a million or so, Advertisements in it will pay, pay, pay; Unrivaled by all, it being so small, Distinctly each ad, will display, play, play

It will be noticed on reading the initial letter of each line straight down, the result is the sentence " Dana Is a Fraud. " From the glee of the New York Times over the discovery, it is possible that paper had a finger in the pie. It is very small business for men to play at.

Two weeks from to-day is Arbor Day. Get ready your trees.

THE LATE HENRY WARD BEECHER left a sister, Mrs. Isabella Beecher Hooker, who seems to have some original views about many things. In particular she has advanced ideas on police reform. She would have looking glasses in each cell where tramps are placed. In the morning she would have the tramps washed and fed on oat meal and beans. He should be made to wash his own clothing and cook his own dinner, and after a month of this training there would be hope of reforming him. Every policeman should be a gentieman or gentiewoman, and should not smoke, drink, or use bad language. Among the most startling changes proposed, Mrs tendent, who might use the streams instead of clubs in quelling a riot. The superintendent of police should be chosen by tion, both men and women voting, and the office might be filled by either man or a WOIDAD.

MRS. HENDRICKS deples that she is pre-paring a biography of her husband, the late vice president, or has any intention of doing so. She is carefully arranging all his letters and papers, with a view to preservation, not publication, and has declined several offers of purchase made by various publishers. SENATOR ELECT QUAY has an especial

fancy for precious stones, and the contents of his wife's jewel cases are likely to create a sensation in Washington next winter. She is said to possess a neckace of singular splender composed of diamonds, carbuncles, emeralds, topszes, sardony xes and amethysts. SIMEON B. CHITTENDEN, of Brooklyn, has made provision for the immediate erec-tion of a library building on Yate campus, to be placed between the present library build-ing and the art school. It is to be connected with the present library building. The new edifice will be built of stone and will be entirely fireproof. It is to cost \$100,000.

Miss N. B. Cumminos, now the librarian of the department of justice at Washington, is a daughter of a former justice of the aupreme court of Pennsylvania, and is regarded as one of the best authorities on law books in the country. Should Put on Trousers. From the Columbia Herald.

It's time Columbia sheds her borough pine

From the New York Tribune, Rep.

There is never any use in legislating over the heads of the people. It may be grievous to lovers of their kind that the majority are so often indifferent or even aversa to referre that they are so often indifferent or even averse to reform that they cling so lovingly to their flesh pote that they will make so few sacrifices for the general good. But statesmen and lawmakers must deal with the world as it is, and eschew profities speculation on the world as it ought to be; and the obvious truth cannot be missed that the world as it is must grow greatly be-fore it can assimilate sweeping reforms like prohibition. In sparsely inhabited run-1 piaces it is possible to introduce the principiaces it is possible to introduce the principle; but even then only when a considerable majority is prepared to vote for the reform, and that is why local option, which makes every little accial group the sole judge of its own regiment is the best method of applying it. In most large cities prohibition is out of the question.

A Lancaster Farmer's Chat

From the Chambersburg Valley Spirit.

Mr. Henry M. Engle, a well known tarmer of Marietta, Lancaster county, said yesterday : Like the Franklin county farmers, we have good cause for complaint. Our winter grain is very unpromising. It is still living, but if there is bad weather the crop must be short. Good weather and plenty of warm rains may bring it out somewhat. All the early planted fields are better than those planted late. The former got rains, while the latter got none. The rainfall for March was only about three fourths of an inch, a vary any all quantity." very small quantity."

Excitement in Texas. Great excitement in Texas.

Great excitement has been caused in the vicinity of Paris, Tex., by the remarkable recovery of Mr. J. E. Corley, who was so helpless he could not turn in bed, or raise his head; everybody said he was dying of Consumption. A trial bottle of Dr. King's New Discovery was sent him. Finding relief, he bought a large bottle and a box of Dr. King's New Life Fills; by the time he had taken two boxes of Pills and two bottles of the Discovery, he was well and had gained in flesh thirty-six pounds.

ONS BOTTLE EPPROTS & GURE.-Mr. Oscar E. B. ORB BOTTLE EFFECTE A CWRE.—Mr. Oscar E. B. Koch, of Alleutown, Pa., was bedfast with inflammatory rheumatism in the winter of 1833. Doctors could do nothing to relieve him. He commenced using Gross' Eheumatic Hemedy By the time he had used hair a bottle he could leave his bed; when he had finished the bottle he was cured and has not had a return of the disease since. In his own words, "I sei better than ever before." Price 21, by all druggists. 1858-3md MWAF

All medical authorities agree that catarrh is no more nor less than an inflammation of the lining membrane of the nasal air passages. Nasal catarrh and all catarrhal affections of the head are not diseases of the blood, and it is a serious mistake to treat them as such. No conscientious physician ever attempts to do so. It is held by eminent medical men that sooner or later a specific will be found for every disease from which humanity suffers. The facts justify us in assuming that for catarrh at least a positive cure aiready exists in Ely's Cream Bilm.
