It was also shown that the accused made some admissions after their arrest which incriminated them in the part of the offense charged.

For the defense Helbeck testified that on the night Louch's chickens were stolen he went to bed between 8 and 9 o'clock and that he remained there until daylight the next morning.

David Reese claimed that he went to his home between 9 and 10 o'clock on the night the chickens were stolen, and after that hour was again out of the house.

WATER SUPPLY FOR LEHR.

The citizens of Lehr have for some time past been agitating the question of a better water supply for their town, both for domestic purposes and for security against fire.

A meeting was held Monday evening at the Sturgis house, which was well attended, at which the proposition to organize a joint stock water company was well received.

The proposition is to apply for a charter for a company with a capital of \$10,000 with the privilege of increasing it to \$20,000, the stock to be \$5 per share and no subscriber to be allowed more than five shares.

Subscription books were opened, and about \$500 were subscribed on the spot. Another meeting is to be held to-night to receive further subscription, and to elect officers and directors of the proposed company.

It is proposed to pump the water from the Lehigh springs by means of a wind-mill or other power, into two or more reservoirs or tanks in the higher part of the town, and thence through distribution pipes to those who need the water.

SEED LEAF NEARLY ALL CAVED

PACKERS ABOUT THROUGH WITH THIS FABRIC OF THE CROP.

Not much of a Demand for Havana—Donors Have Done Trade in Old Tobacco—Some of the Features of the Principal District Markets For the Past Week.

Everything goes on very quietly in local tobacco circles. Packers continue to get out of the way their respective purchases of seed leaf and some of them have almost finished packing.

In old tobacco very little has been doing the past week. Skiles & Frey report the sale of 50 cases and the purchase of 50 cases seed leaf and Havana. D. A. Mayer reports the sale of about the usual number of small lots to manufacturers.

The unusually cold weather that has prevailed has kept back the farmers from preparing their seed-beds, and little has been done towards getting ready for the crop of '87.

The current number of the Tobacco Journal, published in New York, does our fellow-citizen James Frangley, the honor of printing a full description of his recently patented cigar-making machine, illustrating the text with four engravings of the machine and its several parts.

A quiet but steady business can be recorded. Most of the sales that have been made public were in fact resales of old leaf, and tobacco some weeks ago.

The sale of the week number about 1,800 cases including 300 cases of Duck Island fillers. Prices very firm.

Sumatra—Movement in this tobacco has been confined to small parcels to manufacturers. Prices remain unchanged.

Seed Leaf—Sales of cigar leaf are generally confined to local trade and partake of a retail character. Occasionally a lot of old leaf, comprising sound binders and fillers, is sold to the market.
