LBOS LIGHT FOR MORS MORDY. Now York Greaning Under the Extertion

Practiced by the Gas Companies. the New York Herald. Up go the gas bills, and with them rises the indignant outery of thousands of swin-died consumers. Apparently there is no redress against the swollen gas monopolists unless the consumers resolve to teach them s lesson by giving up meters for awhile and burning cil. Burn oil? Certainly.

Certainly.

As a protest against extortionate gas bills?

Why not? It was done in this city just ten years ago. The stout yeomanry who abide along the Bowery led the fight, and for a long time in 1876 the stores and dwellings on that busy thoroughfare were lighted almost entirely by oil lamps. The movement spread through other parts of the city; it was taken up in Brooklyn and Jersey City. On all sides the war of the gas consumers was prosecuted bravery. The light from lamps was found to be steadler and vastly cheaper. If the gas companies had not made loud promises of reform there is no knowing to what proportions the movement might have grown. So great was the feeling of indignation against the corporate robbers that a resolution was seriously introduced in the board of aldermen to light the streets of the city with kerosene lamps.

with kerosene lamps.

As announced in the Herald's elaborate expose several weeks ago the gas companies have absolutely set at defiance the law passed a year ago which reduced the price from \$1.75 to \$1.25 for a thousand cubic feet of twenty candle power say.

to \$1.25 for a thousand cubic feet of twenty candle power gas.

When it was known that the legislature had, after patient investigation and prolonged discussion, prohibited the gas companies from charging more than \$1.25 for a thousand feet there was general rejoicing, especially among very poor families who could scantilly afford the liverage of sees and among rescaled. the luxury of gas, and among people in whose business expenses the item of gas figured largely.

But hardly had the law passed when every gas company in New York put a powerful pressure on its mains.

pressure on its mains.

The result was very simple.

By increased pressure the companies forced enough gas through the meters to make up for the difference between the former price and the new price. In a large number of cases pressure more than made up for the difference, and instead of having to pay less the consumers had to pay more. This system of extortion has been kept up right straight along. Notwithstanding the Herald's vigorous attack, supported by facts and figures in abundance, the monopolists have made no reply. From all over the city have come proofs of the wholesale fraud that is being practised upon the consumers.

have come proofs of the wholesale fraud that is being practised upon the consumers. In order to make the swindle still more clear a Herald reporter visited a large number of stores yesterday. The test made was a perfectly fare one. It was simply to compare a gas bill for any month prior to the reduction of price last June with a bill for a corresponding month siter the reduction. The comparison was only made where the same amount of light was used. It will be seen at once that it the bill for gas at \$1.25 a thousand feet is not proportionately less than when the price was \$1.75 a thousand feet, where the same quantity of light was received, the consumer is being robbed.

The proprietor of one of the largest hotels on Broadway, above Twenty-third street, consented to compare his bills. Here is the extraordinary result:

extraordinary result : 4.95 25

The proprietor of this hotel says that no more light was used in the last month than in the first. A gas engineer was asked to explain how it was that although no more gas was burned in one month than in the other the consumer had to pay \$72.25 more for gas at \$1.25 than he did a year before when

for gas at \$1.25 than he did a year before when the price was \$1.75.

"It is easy to explain that," he said. "The Consolidated Gas company forced 106,300 cubic feet of gas more than usual through the meter by simple pressure. Of course, there was no more light given—in fact, not as much—but the meter registered it, and that is why the bill was higher at a lower price. You will notice that the torgasse in cubic feet. You will notice that the increase in cubic fee produced by pressure amounts to over three-nevenths of the whole original bill. This is a case of down-right robbery. If I was the owner of that hotel I would bring a suit to recover the amount taken from me by the

TRADE S.S. MARK

About twenty years ago I discovered a little ore on my check, and the doctors pronounced it cancer. I have tried a number of physicians but without receiving any permanent benefit. Among the number were one or two specialists The medicine they applied was like fire to the sore, causing intense pain. I saw a statemen, in the papers telling what S. S. S., had done for others similarly smitched. I procured some at once. Before I had used the second bottle the heighbors could notice that my cancer was healing up. My general health had been bad for two or three years—I had a hacking cough and spit blood continually. I had a severe pain in my breast. After taking siq bottles of S. S. S. my cough left me and I grew stouter than I had been for several years. My cancer has bealed over all but a little spot about the size of a half dime, and is rapidly disappearing. I would advise every one with cancer to give S. S. S. a fair trial. MES. NANCY MCCUNAUGHEY, Ashe Grove, Tippecanoe, Co., Ind.

BARGAIN

As something trashy, simply because they imagine that a really good article cannot be sold at a price that ap-pears to be less than its real value. To such people we would say that hardly such people we would say that hardly a week passes but some importer or manufacturer for reasons best known to themselves desire to close out lines of goods below the cost of importation or manufacture for cash. We always take advantage of such opportunity, which accounts for our so often advertising Bargaios, and every time we do this it does not mean that we are making an extra profit. we are making an extra profit, but that our patrons who purchase these goods are saving just the difference between the price we pay and the real market value.
