Very lew people, even among those who de preciate the quality and fineness of the genuine French Champagne wines have a correct idea of the extreme care and solicitude with which the vineyards are kept in the district of Champagne, which undoubtedly is one of the richest and best cultivated parts of the world. One of our triends lately returned from France gives the eulogious report on the estate of Messrs. Bouchefils & Co. at Marseull-sur-sy; this includes a remarkable piece of property named "Les goisses," which can be shown to any foreigner traveling through France, as an illustration of the ideal accomplishment of a Champagne vine-yard. "Situated on a hillslope," says our friend, "with the beams of the sur freely lavishing from dawn to sunset their beneficial warmth on it, this vineyard seems to cumulate all the qualities required for the production of perfect grapes. Its surface soil gives the fruit the CHAMPAGNE VINEYARD. the qualities required for the production of perfect grapes. Its surface soil gives the fruit the finences and bouquet, while the heat of the sun is counterbalanced by the freshness constantly drawn up from the lower ground by a network of roots, which spread themselves in a bed of chalk." There is a great deal of this product in the Bouche Sec Champagne, which explains its peculiar fineness and aroma so much renowned among the connoisseurs; but amateurs desirous of obtaining the wine coming from the "Golssoi" estate only would have to ask for the Bouche Sec Extra.
