THE CATTLE DISEASE.

Stamping Out Floure-Passmonts & mong the

From the Baltimore Sun.
Since the appointment of the Maryland State Live Stock Sanitary Board May 1, 1880, about 1,800 head of cattle have been killed, fully 80 per cent. of which were found to be affected with pleuro-pneumonia upon poet-mortem examinations. The board is composed of A. M. Futford, Harford county; T. Alex. Seth, Baltimore county, and John Alex. Seth, Baltimore county, and John Blady, Montgomery county. The United States and the state of Maryland have co-operated in the work. The commissioner of agriculture, at Washington, has paid for the expenses of disinfecting and for the animals affected with the disease. The state agreed to supplement this by the destruction of animals exposed to the disease in localities where it was deemed unsafe to continue quarantine. This arrangement continued until March 1 of this year. Then, by a new act of Congress, was deemed unsate to continue quarantine. This arrangement continued until March 1 of this year. Then, by a new act of Congress, the commissioner of agriculture was authorized to pay for the exposed animals, as well as for those diseased. Since that time this state has only paid for the value of destroyed stabiling, stable furniture, &c., incapable of proper disinfection. The government has had from eight to ten of the best inspectors that could be procured constantly at work. The stables of this city and the country within ten miles of the city have been thoroughly examined and re-examined, and considerable work has been done in other parts of the state. Pleuro-pneumonia has been found in as many as 350 animals, and all but 50 of these have been cleaned up, chiefly by the destruction of animals. Except in one single instance all of these 1,800 animals were destroyed with the consent of the owners, after the rate of compensation had been agreed upon. These owners have received their money promptly. The one instance where objection to the destruction of diseased animals was made was the offers on the part of the government for his cautie. Dr. Ward, the chief veterinary in-Monument streets, this city, who refused the offers on the part of the government for his cattle. Dr. Ward, the chief veterinary inspector, used the authority conferred by act of the assembly of Maryland, and the cattle were killed, the herd being badly infected, and so located as to be liable to spread the disease to other cattle. The cattle desired and darymen, with few exceptions, are astificially with the work that has been done, and are desirant that it may be pushed to a con-

by the government in this work, and every one is assured that he will get fair compen-tion for sil damages. Each government in-spector is commissioned as an assistant to the chief veterinary inspector of Maryland, and all quarantining is done in the name of the siste.

i-field with the work that has been done, and are desirous that it may be pushed to a conclusion. A few months more, with the active co-operation of disrymen and others concerned, will pretty effectually rid the state of the disease and relieve it of the cordon of quarantine thrown around Maryland by the national government and by sister states. In round figures, about \$75,000 has been spent by the government in this work, and every one is assured that he will get fair compen-

Clear the Way Without loss of time, when the Intestinal canal is blocked up by reason of constipation, chronic or temporary. It should be borne in mind that this ailment is prope to become lastcomplaints. Hostetter's Stomach Bitters is the precise remedy to remove the obstruction effectually, but without drenching or weakening the blockaded bowels, a consequence always to be apprehended from the use of always to be apprehended from the use of violent laxatives, which are among the most permicious of the cheap nostrums swallowed by the credulous and misinformed. The flat of experience, and of the medical fraternity, sanctions the claims of this standard aperient. Not only as a source of relief and permanent regularity to the bowels, liver and stomach, but as a means of remedying and preventing kinney and bladder troubles, and fever and ague, it is without a peer.

Dr. James Corrie, Dentistin Baltimore, writes:
"I have used Dr. Bull's Cough Syrup personally and in my Jamily for two or three years, and I am prepared to say that there is nothing to compare to it as a remedy for cough, cold, etc." 25 cents. Albawy, April 16, 1884. 5

Some years ago I was thrown from a wagon and fractured two of my ribs. I was so badly but that I had to sit up in a chair for four days and nights. The fourth day my mother placed two Allesch's Porous Plasters over my broken ribs. The next day my sufferings diminished and I was able to lie down. I continued to improve every day. Two weeks after the accident I got up and attended to business. I renewed the plasters twice, and found myself almost enthe plasters twice, and found myself almost en-tirely well in a month, when I sai'ed for Eng-land. My wife is subject to periodic pains in the back that give her rest neither day nor night, but in two hours after applying two Allcock's Plasters she experiences relief, and in two or three days she is well. She also finds them effective in neu-

and consequently incurable. It is impossible to describe her sufferings. Her body from the crown of her head to the soles of her feet was a mass of decay, masses of flesh rotting off and leaving great cavities. Her fingers festered and three or four sails dropped off at one time. Her limbs contracted by the fearful ulceration, and for several years she did not leave her bed. Her weight was reduced from 125 to 60 lbs. Ferhaps some faint idea of her condition can be gleaned from the fact that three pounds of Cosmoline or ontituent were used per week in dressing her sores. Finally the physicians acknowledged their defeat by this Black Wof, and commended their defeat by this Black Wof, and commended the sufferer to her all-wise Creator.

Her husband hearing wonderful reports of the use of Swipr's Spacivic (S. S. S.), prevailed on her to try it as a last resort. She be gan its use under protest, but soon found that her system was being relieved of the poison, as the sores assumed a red and healthy color, as though the blood was becoming pure and active. Her saliey continued the S. B. smith last February; every sore was healed; she discarded chair and crutches, and was for the first time in twive years a well woman. Her husband, Mr. C. A. Sailey, is in business at 17% Blackstone street, liceton, and will take pleasure in giving the details of this wonderful care. Send to us for Teatles on Blood and whin Diseases, mailed tree.
