LANGASTER, JULY 6, 1867.

The Deadly Cow. There seems to be a raid on milk jus There never is a time when there is a doctor around to object, to something bet folks want, that it is not wholesome ad milk has been a favorite object of medcriticism. There is nothing that is more generally consumed and nothing fore about which it is easier to interest the mass of man and woman kind. It is esting to note that whatever may be mid against milk, no proper substitute has been found for it for the toothless child. We were all brought up on milk, except the few, in these later days, who have survived upon patent baby foods. If disease nes to us with the milk there is no help

Just now the raid on milk comes from doctor who says that tuberculosis in cattle may be communicated by the use of their milk; and from another doctor who delares that scarlet fever comes from the cow. The latter pundit says he has unicated it from the cow to a rabbit. d therefore knows whereof he speaks. He may and he may not. There is no n that we know of why a cow should not have scarlet fever nor why it should not communicate it in its milk. We admit the possibility; and this is the strength of the alarmist doctor's case. Since the source of small-pox has been found to be in the cow, it is not possible to acquit the gentle creature of carrying around with her the seeds of all the diseases to which flesh is heir. And if she has been chosen by Providence as the spreader of disease among men, we cannot but admit that the most efficient possible instrument has been chosen. We could not be more severely slain than through milk. It is only when we reach years of discretion that we lay it aside as a beverage and chose grain and fruit extracts in preference to the milk of meat. Until then our parents have us at their mercy, and they are at the vercy of the law which compels the feeding of milk or nothing to babes. There may be escapes in baby soup; and these terrifying doctors may have a patent preparation of it to boom; but it is a feeble bope; and it is an odd infant digestion that will not rebel at the imposition of soup for milk. We must needs drink milk if we

## The Case of Mr. Brosius.

Marriott Brosius sends us a lengthy withstanding its length and its weakness thinks that he has a knowledge of the arone else. He says that the newspaper have not touched "the nerve of the case to recognize, if they can, "the nerve" of Mr. Brosius' case, heretofore, as he thinks. unexposed. For we intend to say that we do not see anything fresh in Mr. Brosius' statement. His column of words amounts when condensed to a declaration that some ordinarily wise persons are fools in their understanding that it is no more the business of the school board to provide free books than to furnish free shoes to the

Mr. Brosius declares he does not know why they are such fools, and incontinently abandons any effort to show them to be fools; and passes on to the declaration that it is an indignity to the poor parent to require him to show that he is too poor to buy free. The indignity of the thing seems, as nearly as we can get at Mr. Brosius' idea, to be "the nerve" of the case; a nerve that would be easily quieted by omitting to apply for a seat in the public schools, the attendance upon which is not compul-

It is true the child would not be educathough the parent's nerves would be saved. So that Mr. Brosius needs to add another " nerve" to his case and to declare the wrong of bought books to be that poor children, with parents too "nervous" to declare themselves poor, must still be educated; and then Mr. Brosius would have a "case" but he needs to show that the nerves of people who want free books, and do not want to say that they are too poor to buy them, are proper objects of the commonwealth's tender consideration.

And Mr. Brosius would do well to try to show some cause wherefore free shoes are not as needful to the child's attendance at school, in our rigorous winters, as are free books; and wherefore the state may not be resonally asked to provide them free to all children, in order that people who are too poor to buy them may get them free

American Good Nature. The characteristic good nature of Americaus is never more strikingly displayed than on the Fourth of July. The small

but with a penceful smile the victim mur-murs "boys will be boys." The large boy, who has long been deluded with the absurd notion that he is a man, may explode cannon crackers in the small hours of the night and only provoke a silent wish that his fingers may be burned. In short, we seem to appreciate better than any other people the fact that the most certain way of having a good time is by treating all unpleasant incidents as trifles and trying hard to see the pleasant side of everything. Our Fourth of July patriotism is an invincible feeling of self-satisfaction. We may realize the corruption of our politics, the undue burden of our taxation, the incapacity of our officials and statesmen, and other evils that point to faults in our system of government; but on the Fourth of July we refuse to think of these things and calmly smile with the assurance that we have the best government on earth; as we probably have.

## War Hatred Dying Away.

The reunion of Pickett's brigade and the Philadelphia soldiers at Gettysburg marks the beginning of a series of similar gatherings on the historic battle-fields of the war. It is also the commencement of the most effectual plan for the burial of all sectional hatred. The men who have most to forgive are those who suffered by the war's desolation, who saw brothers and dear friends go down before them in the dreadful fraternal strife. Surely if those who ooked into each others' eyes with the fierce hatred of men who sought their fellows' lives can now put out the hand of reconciliation and fraternize in the glorious present, the bloody shirt shrickers have fair warning that their occupation is gone.

At the Gettysburg reunion there was not one word said, nor one event enacted to mar the completeness of the fraternizing of the Blue and the Gray. The celebration is most significant in this feature. It clearly indicates that the war and its passions is now only a memory. That memory has much of the bitter and sweet about But as the years roll on, the bitterness is being forgotten and the sweetness, in the recollection of brave deeds on both sides, is constantly increasing.

BANK WRECKER HARVER blames the Cincinnati bank examiner for breaking the Fidelity bank. The great mistake of the bank examiner was that he examined when It was too late.

THERE is food for thought for parents in the fact that one hundred and ninety nine children under the age of ten years died in Philadelphia last week. Out of this total 130 were babies under one year of age.

THE assessed valuation of real and personal estate in New York has increased eighty-six millions in the last year. What is the city has been growing and the assessment is stationary as a monument.

THE cheering news comes in a special dispatch from Philadelphia that a canyase of the prominent manufacturers upon the state of rade elicits the prediction that the last six months of 1887 will be the most prosperous portion of the year. The concessions of the ron men in Pittsburg to their employes is regarded as the best assurance of this. There s a large amount of business in prospect for the fall, especially for iron and steel rails and mills and turnaces will be kept busy. The railroad companies are preparing for the increased demand, and their shops are working at the fullest capacity. A rolling mill, long idle at Danville, has been started, and the Colemans have leased the Lochiel furnace. A most encouraging statement is made upon the authority of the steel rail makers. They are so crowded with orders that they are practically out of the market. and a number of large orders to be filled within a limited time, it is stated, will have to be placed abroad. Agents of the foreign this situation has made itself known, it is stated, and have succeeded in capturing a arge number of good orders. The silk mills which have been put in operation in this state, have been so remarkably successfu that a large number of others are to be built. The one in Harrisburg, which began with a force of 100 hands, is to increase the number to 1,000. In the Lehigh and Schuylkill valleys a corresponding amount of success has een noticed in silk mills there

In the Mormon constitutional convention at Salt Lake City, it is declared that bigamy and polygamy being considered incompatible with a republican form of government, each of them is forbidden and declared a misde neasor. The leaven of civilization is at work

THE Philadelphia Republican leaders have agreed that Leeds is to be the next sheriff. The people don't count.

PRIBONAL.

SENATOR-ELECT FAULENER is said to be an excellent swimmer.

INSPECTOR BYRNES and Julian Hawthorne are now engaged jointly in a book entitled "The Great Bank Robbery." It will probably rank with "Rambunctous Rube, the Ring-tailed Snorter of the Prairie." It is and to see a son of Hawthorne in such work. AMATEUR ATHLETE PAGE, of Philadelphis, son of Assistant United States Treas urer S. Davis Page, did not succeed in winning the championship of the world in Lendon on Saturday, but he tied with Rawdon, the present champion, leaving the ques-tion of superiority to be decided hereafter. Both cleared the bar at aix feet and both failed at six feet one inch.

HENRY GEORGE says of the Dr. McGlynn excommunication that it was the most ou excommunication that it was the most out-rageous piece of interference in the history of American politics, and that Dr. McGiynn would never back from his position; that it would not budge the Catholics of New York; that the holy see was seeking to regain its temporal power; that the pope had power to excommunicate only delinquents, and that Dr. McGiynn would live and die a Catholic and a priest of the Catholic church, the ex-communication of Rome to the contrary notommunication of Rome to the contrary not

withstanding. JEFFERSON DAVIS thus spoke to the New Orleans Continental Guards who visited him at Beauvoir, Mich., on July 4: "The con-stitution was the expression of the consent of the people to be governed, and you claimed the rights and privileges of the compact. That you were unsuccessful is a fact that we will not discuss; but I claim that it is due from each and all of us that our countryme who fill soldiers' graves shall to your chil-dren and to your children's children in all generations be defended as patriots, and that never will you supinely allow them to be branded as rebels or traitors."

More Millionaire Women. Mrs. Kate Terry is worth nearly \$6,000,000. Mrs. Thomas A. Scott counts her wealth at

Mrs. John Jacob Astor is worth about \$8, 000,000. Mrs. Edwin Stevens, of New York, has

her husband made in dry goods. Has Him Well in Hand. Minister (making a call)-And do you always do as your mamma tells you to, Ficanie?
Ficanie (emphatically)—I guess I do, and

## THEIR FINAL ORDEAL

The Pull List of Questions Put to the Sentor and Juniors Last Work -How Many of Our Renders Can Auswer Them Off Hand ?

The annual final examination of the junior and seniors of the Millersville State Normal School was held last week, beginning on Tuesday, June 28. The examination board consisted of Deputy State Superintendent Houck; Prof. D. C. Thomas, principal of Mansfield Normal School: Prof. H. C. Breneman, superintendent of York county, and Prof. Wm. D. Bodenhorn, superintendent of Lebanon, county.

The following is a list of the questions given to the classes. given to the classes

LATIN-PROF. THOMAS.

A. Perfacile factu esse, illis probat, conata perficere, propteres quod ipse sue civitatis imperium obtenturus esset : non esse dubium quin totius Gallia plurimum Helvetii possent se suis coplis suo que exercitu illis regna con-ciliaturum, confirmat. Hac oratione adducti inter se tidem et jusiurandum dant, et, regu occupato, per tres potentissimos ac firmissi-mos populos totius Gallia: sese potiri posse

B. Hoc provio facto, reliquas copias Helvetiorum ut consequi posset, pontem in Arare faciendum curat atque ita exercitum transducit. Helvetii, repentino ejus adventu com-moti, cum id, quod ipsi diebus viginti ager-rime confecerant, ut flumen transirent uno illum die feeisse intelligerent, legatos ad eum mittant: cujus legationis Divico princeps fuit,

(B) Faciendum, repentino, Divico.

What is a plant? What is the food of a plant?

Define assimilation; under what conditions does it occur? 4. What is the fruit? How many kinds? Examples of each.

6. What changes occur in the ovule to make it a seed : Mention the rings of an exogenous stem.

BRETORIC-PROF. THOMAS. 1. What is Rhetoric, and what are its relations to Grammar and Logic?
2. What is Prose? What Poetry? Distin-

Give rules for their use.

5. Define the following and give examples of each: Simile, Hyperbole, Climax.

1. The farmer's orchard is respected by the boy who owns a large dog 2. Dr. Arnold wrote a History of Rome in three volumes, which was broken off by his death at the end of the second Punic war?

s not sufficient to extinguish the seeds o pride.
5. The death of Cato has rendered the Sen

NATURAL PHILOSOPHY-PROF, THOMAS. Define specific gravity. Give method of finding the specific gravity of a solid.
 Will a vacuum transmit sound? Light?

4. The power-arm of a lever is 10 feet : the weight arm is 5 feet. (a) How long will the lever be if it is of the first-class? (b) Second-class? (c) Third-class?
5. What is an electro-magnet? Explain its

use in the telegraph instrument.

6. Explain the action of the "sun-glass."

spelling, 24 patient, 25 fameness, 26 ragged, 27 ratan, 28 relax, 29 dandruff, 30 relapse, 31 glisten, 32 converge, 33 law-suit, 34 weevil, 35 onion, 36 flannel, 37 baptize, 38 cabbage, 39 anxious, 40 melon, 41 essence, 42 catarrh, 43 cipher, 44 quotient, 45 assessor, 46 license, 47 tonnage, 48 cashier, 49 satchel, 50 cynical.

ARITHMETIC-PROF. BRENEMAN. sult in the Roman notation. Reduce 5 yds., 2 ft. and 6 in. to the decimal of a furlong.

3. Derive the 6 per cent, rule for interest. 4. Discuss annuities at a simple interest.
5. Two partners, A and B, clear in 6 month 2150. A's capital at first was to B's as 2 to after 2 months A withdrew | of his capital and B ! of his. Divide the profits.

MILLERSVILLE, PA., June 28, 1887 MILLERSVILLE, PA., June 28, 1887.
 Three months after date I promise to pay John Smith, or order, Twelve Hundred Dol

lars with interest from date.

7. A person sells a certain amount of 5 per changes his income only \$1. Is the change an increase or decrease? How much stock

8. By selling goods for \$69; 8 per cent. i lost : at what price should it be sold to gain 12 per cent.? Analyze.

1. Siege of Yorktown. 5. Three important results of Monroe's dministration.

6. Name five Union generals, and state

participated.
7. Give the history and adoption of the constitution of the United States.

8. Name and define the departments of ou

9. Name and define the different ways in which a bill may fail to become a law.

10. Name ten express powers of Congress. JUNIOR LATIN-PROF. THOMAS.

1. First-How is the declension of a nonn determined? Second—Illustrate with a noun in each declension. 2. Give characteristics of each of the four

conjugations. 3. Give synopsis of sum. Give synopsis of

3. Give synopsis of sum. Give synopsis of amo in the passive voice,
4. Compare Allus, Bonus.
5. Translate, and parse nouns, adjectives and verbs in the following sentences: First—Vir duos tilios habet. Second—Casar justimilites castra munire. Third—Capellastans in tecto domus, lupum vidit, practere, umtem, ed ludificavit. Sed lupus, "Non tn," inquit, "sed locus tuus, me ludificat."

GEOGRAPHY-PROF, BODENHORN, Distinguish between physical and math ematical geography.

2. Describe the currents of the Pacific ocean. Tell how caused and what benefit results from them.

4. What is the cause of deserts? Illustrate.
5. What is the Darwinian theory of coral

island?

6. Name three principal mountain ranges in North America; in Europe; in Asia.

7. Tell the situation of the following cities: Chicago, St. Louis, Detroit, Portland, Havana, Rio Janerio, Callao, Cairo, Smyrna, Venice and Bombay.

8. What are the principal agencies that

MENTAL SCIENCE -PROF. HOUCK.

Name three grand phases of mental life and show how they are connected with the primary and secondary powers of mind. 2. Explain and illustrate the difference be-

tween the subjective and objective.

3. By what faculty or faculties does a child acquire concrete knowledge? Abstract ideas. 4. How are our specific conceptions of sou

and body formed?
5 What are the leading characteristics of imaginative thought? 6. Prove the existence of primary truths.
7. What are some of the causes that give

rise to the sentiment of patriotism, and what effect has civilization on that sentiment. PRDAGOGICS-PROF, HOURS.

What I owe the profession. Name five aids to good discipline.
Write six questions on Geography of ou 4. Give an example of induction in teaching

Analysis.
5. Explain the difference between education and instruction.
6. Name and discuss three methods of conducting a recitation. 7. Revenues, institutes, school-term in Pennsylvania.

8. Froebel, Pestalozzi, Mama, Page, Bur-

rowes, Comenius, Parker. GEOMETRY-PROF. BRENEMAN. 1. If the line bisecting the vertical angle of a triangle also bisect the base, show that

the triangle is isosceles?
2. How many degrees in each augle of a regular bexagon? 3. State three propositions relating to the

measurement of angles and prove one of them. given lines. SPHERICAL GEOMETRY-PROF. BRENEMAN.

1. Show that the sum of angles of a spherical triangle is greater than two right angles.

2. Show the relation between the sides and

angles of spherical triangle and its polar tri-

angle.
3. Find the area of a spherical triangle and spherical polygon.

4. Find the area of a spherical polygon on a sphere whose diameter is 21 feet, if the angles are respectively 100 -120 -140 -

5. The plane faces of a quadrangular pyramid make with each other plane angles of 80 -100 -120 -150, and the lateral edge of the pyramid is 3) ft. Required the volume. ZOOLOGY-PROF. THOMAS.

1. Compare the class of vertebrates with respect to the following :

1. Skeleton.

2. Heart. Circulation. 4. Respiration. 5. Nervous System.

6. Special Senses.
2. Distinguish the characteristics of th plood corpuscles in mammals, birds and reptiles.

3. Describe the nervous system of insects. 4. Classify spider, fly, potato-bug, cat, toad

GEOLOGY-PROF, THOMAS,

1. Explain the theory of formation of cora What is a lode?

3. Explain briefly the chemical theory of oleanic action.

4. Mention the chief agencies that effect ecomposition of rocks.

5. Explain the theory of the formation of

granite. How do you distinguish igneous rocks: Stratified rocks? 7. How do you determine the relative age of stratified rocks? HIGH ALGEBRA-PROF, BRENEMAN.

1. Find the 15th term of the series 1, 4, 10, 20, 35, etc., by the method of differences, 2. Expand into a series (1+1) by the method of indeterminate co-efficients. 3. Decompose the following fraction:

(1+x)(1+2x)(1+3x)Develop the logarithmic series.
 Develop (x - y)<sup>5</sup> by Taylor's formula.
 Find the number and situation of the

real roots of  $x^{3} + 6x^{3} + 11x - 1 = 0$ . CALCULUS. 1. Differentiate X<sup>3</sup> X<sup>3</sup>

2. Differentiate x" 3. Find the value of  $\mathbf{n} = \frac{\mathbf{1}}{2}\mathbf{a}^{\dagger}\mathbf{x} - \mathbf{x}^{\dagger} - \mathbf{1}^{\top}\mathbf{a}\mathbf{x}^{\dagger}$ a lax

dx4. Integrate 5. Integrat  $\frac{1}{1(3-2x^2)}$ 

PHYSICS-PROF. THOMAS. 1. Explain what is meant by aberration of a ray of light reflected and refracted at any spherical surface.
2. Why did astronomers use very conv

telescopes before the invention of the achi matic telescope?

3. Show how to find the height of a mou tain by means of a barometer. 4. Give an explanation of the cause of the rainbow and the order of colors.

5. Explain and illustrate the practical application of electricity to light, sound, loco 6. Explain the mechanical equivalent of heat, and show how it is determined.
7. How can you determine from the length of an organ-pipe the pitch of tone which it will reinforce? Illustrate.

will reinforce? Illustrate.

8. What is meant by a musical note?

An examination, similar to the preceding in the scientific course, was given in the following branches by different members of the committee: Moral philosophy, mechanics, surveying, plane, analytical and spherical trigonometry, astronomy, chamistry logic. gonometry, astronomy, chemistry, logic Cicero, Virgil and Tacitus in Latin and Eng lish literature.

Prof. Roddy was examined in zoology, em-bryology and structural botany. In the first he had the same questions as are given above, but they were to be discussed to a greater ex-tent. The following are the questions which

EMBRYOLOGY-DR. E. E. HIGBER.

1. Compare the embryonic development of the bird with that of the reptile.
2. Distinguish between placental and non piacental animals, and discuss the chorion, allantois and amnion. 3. Discuss all the embryonic in the ovarian

egg of an oviparous animal before incuba 3. Discuss development of the mammalia egg. 5. Give all the embryonic stages of animal

STRUCTURAL BOTANY-DR. HIGBER. 1. Distinguish between structural botan and morphology.

2. What is the difference between an endo

genous and an exogenous stem?

3. Discuss the embryogenesis of the pistil.

4. Discuss ovule and the embryo in the ovule.
5. Discuss in full, autogamy allogamy christogamy dimorphism, trimorphism proterandry, and proterogeny of flowers.

3. Find x in  $2x^2-2x+6\sqrt{2}x^3-3x+2=$ 

ELEMENTARY, JUNIOR AND SENIOR ALGE BRA,-PROF. BRENEMAN, 1. (a). a"-b" a-b, show that the division terminates. (b). Derive the formula for S in both progressions, having given a, n, l. 2. Find prime factors of  $x^3-3x^2-x+3$ ;  $x^{2a-2}+5x^{2a-1}-24$ .

4. Reduce Va to a radical of the second degree.

5. Expand (a—b)\* by Bin. Theorem, writing the first three and last two terms.

6. Given  $\begin{bmatrix} x^2+y^2-x-y=32\\ x+y+xy = 29 \end{bmatrix}$ , or x'-y'-5. Find value of z and y.

of each wheel were increased by 1 yard, the fore wheel would only make 4 revolutions more in going the same distance.

1. What useful purposes do the bones 2. What is meant by the human skeleton?
3. Describe the process by which a broken Describe the process by which a broke one is repaired.

6. Is alcohol food! How does it affect the 7. What do you understand by nutrition?
8. Describe the general plan of digestion.
9. What effect has tobacco on the human lungs?

10. In what organs does a change in the blood take place, and what is the nature of

s. Between broad fields of wheat and orn, is the lowly home where I was born. Analyze the above sentence.

? Form the plural of turkey, armful, foot-

you and me. He k let John and me go. 11. What verbs have the passive voice, and how is it formed?

ANALYTICAL GEOMETRY -- DR. E. E. DIGBEE. 1. Draw a straight line tangent to two given circles, situated in the same plane. . To determine whether the three perpen diculars through the middle points of the

sides of a triangle meet in a point. 3. Prove the equation to an ellipse as re

The entire class, consisting of 31 senior and 30 juniors, in the elementary course, and 7 juniors and 3 seniors in the scientific course, passed the final ordeal.

> APROIAL NOTIONS. Why He Downcast?

True, you are in a interrable condition—you are weak, palid, and nervous. You caunot sleep at night, nor enjoy your waking hours; yet, why lose heart! Get at the druggists a bottle of Burdock Blood Butters. They will restore you to health and peace of mind. For sale by it. R. Cochran, druggist, 1.77 and 1.39 North Queen street, Lancaster.

"Have tried Thomas' Electric Oil for croup and colds, and find it the best remedy I have ever used in my family." Wm. Kay, 510 Plymouth Ave., Buffalo, S. Y. For sale by H. R. Cechran, druggist, 137 and 139 North Queen street, Lancaster.

And other famous women have won a reputa-tion for facial beauty. A fine completion makes one bandsome, even though the face is not of perfect mould. Bardock Blood Butters act di-rectly upon the circulation, and so give the skin a clearness and smoothness otherwise unatiatu-able. For sale by H. B. Cochran, druggist, 137 and 13 North Queen street, Lancaster.

Wangler Bros., druggists, of Waterico, Iowa, write: "We can with pleasure say that Thomas Eclectric Oil gives the best satisfaction of any finiteent we self. Everybody who buys with have no other. This remedy is a certain cure for all aches, spraios, and pains. For sale by H. E. Cochran, druggist, 137 and 159 North Queen street, Lancaster.

"Suffered from Theumatism so badly had to use crutches, but threw them away after apply ing Thomas' Eductric Oil to my limbs. I now feed better than I have for years." F. L. Gibbs 39 Eik St., Bullaio, N. Y. For sale by H. B. Coch ran, druggist, 137 and 139 North Quoen street Lancaster.

HENRY DEACHBAR, of Lancaster City. Subject to the di-the Democratic convention. marz

FOR COUNTY COMMISSIONER, J. W. KELLY. of Marietta, Pa. Subject to the decision of th Democratic Convention. Your influence solit

FOR COUNTY COMMISSIONER. SIMON L. BRANDT (Farmer), Of East Doneg a township, Subject to the decision of the Democratic County Convention. Your influence respectfully solicited.

FOR COUNTY COMMISSIONER. JACOB W. LEBER,
Of Ephrata township. Subject to Democratic
marit-tidaw

A. Z. BINGWALT, Grocer, First Ward, City. Subject to Demo gratic rules. FOR COUNTY COMMISSIONER.

SOLOMON ZEAMER, Farmer,

ELI BATTEN. elli BATTEN,
of Upper Leacock township. I announce my
self as a candidate for County Commissioner
subject to the decision of the Democratic
County Convention. Your influence respectfully solicited. Was a candidate for County
Commissioner before the last convention, and a
the request of my friends withdrew in favor of
the candidates from the Southern district.

Lidaw

FOR COUNTY AUDITOR. JAS. F. BOWER.

FOR COUNTY AUDITOR, CHAS. W. PUSEY, Of East Drumore township. Subject to the decision of the Democratic County Convention July 20, 1887.
