THE INTELLIGENCER.

## The Cancaster Intelligencer.

LANCASTER, JULY 26, 1887.

The County Hospital. The latest developments in the investiestion by the INTELLIGENCER into the al-administration at the county hospital raise a new question, and that is whether the physician elected by the poor directors to look after the unfortunates who need medical attention is competent for his work. His action in the case of the boy Conway indicated a lack of faith in his own treatment, and his diagnosis of the Keener case reveals a grave difference of pinion between himself and another city physician as to the proper course of treatent. It is well to keep this fact in mind

in the investigations now under progress.

The INTELLIGENCER has no personal feeling in the crusade it is carrying on single-handed for better methods at the county hospital. As one of our correspondents points out, the system is more the subject of attack than the men who conduct it. It is doubtless true that the methods in vogue for securing the employes of the institution are the very worst, and that political influence is stronger than real worth in attaining a place at the hostal. But, waiving that consideration, is it not possible that too much is expected from one official, and that the whole place is conducted in a manner entirely too niggardly? Ward nurses are selected from those mentally and morally unfit for such work. An increase in the number of paid mployes would undoubtedly help to correct the present evils, if those employes were chosen for merit and not for political service. As for the increased cost, the cople would cheerfully pay it, if they knew that the suffering poor of the county were receiving proper attention.

The people of Lancaster county will not permit this demoralizing state of affairs to ntinue at the county hospital, and they will hold the board of poor directors if a wide-reaching reform is not at once inaugurated. They have the facts on which to base their action, and there will be great langer to the board in any unnecessary delay in the work of regeneration.

## Is There Peril Ahead !

The New York Tribuic thinks it sees great peril ahead of the iron industry in the importation of steel billets, blooms and steel wire rods, under new rulings of the treasury department, and by fraudulent undervaluation. Reckoning that each ton of manufactured iron imported takes the lace of one and a half tons of pig iron. the imports for the eleven months ending in May, take the place of 1,100,000 tons of American pig metals, against 711,000 tons for the same months last year. Adding the importation of pig iron and scrap, and estimating the June imports, the Tribuna man reaches a grand total of 1,480,680 tons. Reckoning the imported material in the same way, the consumption of pig iron in the last calendar year was about 6,700,000 tons. It has been estimated that the home production of pig iron would exceed 6,500,-000 tons this year; and if this is added to the imports, it is seen that we must find a market for 8,400,000 tons of iron. This implies an enormous increase of consumpn, and the Tribune has frightened itself very badly.

Now these alarming figures are built on the assumption that the conditions now encouraging importation will not change, that the treasury will permit fraudulent ander-valuations to continue, if any such are known to be made, and that the consumption will not increase to a wonderful extent. Seven years ago there was such an increase, and it may come again; though it might be better for the stability of trade if it did not. There is not much satisfaction in mapping out the future with the aid of statistics, as these big figures make one dizzy, and unforeseen events abroad may inge the estimate several millions either

Dairy Figures.

A New York Herald article estimates the value of dairy products this year at \$480,000,000. This exceeds the value of our annual wheat yield by \$20,000,000, and nes next to corn, which is the most valnable of all our farm products. In 1860 the value of our entire dairy products was about \$80,000,000, showing an increase of just 500 per cent. during the twenty-seven These figures are given by J. R. lodge, statistician of the department of lture at Washington.

Assording to the latest statistics and mates the number of milk cows now in o for dairy purposes is 21,000,000. Mr. odge estimates that each of these will give at least 350 gallons of milk in the 7,350,000,000 gallons, of which a little ore than half, or about 4,000,000,000 gal-es, is consumed in butter making, and 200,000,000 gallons in cheese making, sking the quantity consumed in the staral state 2,480,000,000.

The capital invested in this business in maching enormous, being as follows: 2 \$60,000,000; 21,000,000 cows, \$30 per ed, \$680,000,000; 1,000,000 working 1, \$75 per head,\$75,000,000; buildings, 0.000.000. Total

this is nearly five times the entire count of bank capital in this country, lich, according to the last report of the mutroller of the treasury, was something

enting national, state, private and savings banks and trust and loan companies

all together. As our entire exports of butter do not average quite 20,000,000 pounds in the year, it follows that 981 per cent. of our total product is consumed at home, and only 1 per cent shipped. This makes the average annual consumption 21 1-3 pounds per capita of the people, assuming that we have 60,000,000.

New York's dairy interests aggregate \$92,750,000, and Pennsylvania is the next state of importance.

A FIGHT on the Sherman resolution in the Ohio Republican convention in Toledo on Wednesday will kill off that decayed states

HARROW POST, No. 194, G. A. R., of Mount Vernon, Ind., denounce the action of the Fairchilds and Tuttles who prevented Cleveand from going to the G. A. R. encampment at St. Louis, and declare them "guilty of disloyalty and as reprehensible as those who indeavored to prevent President-elect Lincoin from passing through Baltimore on his way to Washington in 1861." This protest is late, but it is eminently sensible. ---

THE revenue commission are going from Atlantic City to Cresson. They believe in enjoyment if not in work.

JAY GOULD IS said to have heaved as big a sigh as any of his victims ever hoisted from the depths of their abused bank accounts. He made this metaucholy noise over the discovery of a gigantic swindle in the matter of ties furnished to the Missouri Pacific, and if reports published in the New York Tribune are true Mr. Gould's road is out just one million dollars. It is said that Mr. Gould has discovered that the price charged for ties was from 21 to 23 cents spiece, and that Contractor arnan had charged the company at least thirty cents for the same article. The number of ties for which such excrbitant prices had been paid exceeded 10,000,000 and at the least calculation the Missouri Pacific and its from tributaries lost \$1,000,000. All this has been promptly denied by George Gould, but the foxey old gentleman would be slow to admit, even to his son, that he had been so badly duped.

THE Chicago Herald estimates the cost of beer at \$2.35 per barrel, which sells for \$6. leaving a margin of \$3.65 for cost of manufacturing, wear and tear of machinery, delivery, collecting and profits. The net profits, even on the cheapest grade of beer, are not less than \$1.00 per barrel.

Two new sound instruments are attracting attention. Harry B. Cox, of near Cincinnati, has a trumpet to be used for telephoning at sea, on which he has been at work for some months. The invention is the outgrowth of his discovery of the great distance an echoed or reverberated sound will carry, and the discovery that speaking trumpets, if made to give the same fundamental note, would vibrate and produce the phenomenon known in acoustics as "sympathy." this trumpet conversation in an ordinary tone of voice was carried on between parties four and a quarter miles apart. In connection with this subject it may be mentioned that two Belgians, Renard and Nothomb. have just made known a wonderful discovery-namely, a portable telephone, where with telephoning is made easy on open ground from anywhere to anywhere by means of a copper wire worked by a small but astonishingly powerful generator of electricity. In wariare, soldiers could carry the wire, and would be able to communicate with others by simply throwing the wire on the soil and rolling it around a sword haed in the ground to form the circuit and then speaking through a small box. The telephone also acts as a telegraph, and can be used as a substitute wherever telegraph wires are cut. Evidently we have not reached the limit in the improvement of instruments of sound.

How scientific men lose their heads when they get into politics! Here is old Tyndall calling Gladstone "a heary rhetorician who sets at naught the plainest dictates of political morality."

THE enterprising W ashington correspondent of the New York Herald has secured from the pension bureau a collection of very forceful facts about the pension record of the president. They make the best answer possible to the fierce and illogical criticisms that his enemies have bestowed upon him for his wise veto of the dependent pension bill. Besides approving more individual pension bills, President Cleveland also approved the act of March 19, 1886, which increased from \$8 to \$12 per month the pension of 79 99 widows and dependents. He approved the act of August 4, 1886, increasing the pension of 1,000 maimed veterans from \$21 to \$30, from \$30 to \$36 and from \$37.50 to \$45 per month. He approved the act of July 29, 1887, benefiting over thirty thousand survivors and soldiers' widows of the Mexican war. He appointed more ex Union sol fiers or their kindred to other than any predeces sor. During the two years of his adminis tration 139,130 more certificates were issued than during the preceding two years of Re publican rule, or over double the number. During the last two years of Republican rule there where 303 658 pensioners on the rolls. On July I, 1887, there were about 102 000, a net gain to the rolls during the first two years of the present administration of loo,000, or 30 per cent. And this, too, in the face of the fact that death is rapidly thiuning the ranks of the veterans. During the fiscal year just ended 5,017 more certificates were saued than any one year since the organization of the pension bureau.

THE temper of the Irish people toward the coercion act is shown by the Newry meeting which unanimously resolved " to treat as leper any traitor testifying under the crimes

PERBUNAL

JUDGE HILTON keeps twenty six horses at Saratoga and yet he walks a great deal in line weather.

PRINCE FERDINAND, of Coburg, wears bracelets. His chances of wearing a crown are very stender at present. REV. JAMES J. PITZMAURICE has been appointed to the immovable rectorship of St. Michael's Catholic church, Philadelphia.

Pore Leo says Italy would reap most splendid benefits at home and abroad from a settlement recognizing the pope's temporal EVANGELIST SOUTHERLAND, alias Bob

Hart, will go back to burnt cork because there is no money in missionary work, and bread GOVERNOR GORDON, of Georgia has 700

applications for pardon on hand, and wants the legislature to organize a pardon commis-ation to help him out. McLaughlin, the wealthy jockey, is having a successful season. He is said to be worth \$150,000, well invested, and makes from \$15,000 to \$20,000 a year.

REV. I. W. SNEATH, professor of the Gorman and Greek languages in Letanon Valley college, at Annville, has firwarded his resignation to the secretary of the executive committee.

NENATOR BROWN, of Georgia, is one of the lessees of the convicts hired by the state of Georgia to work in the mines, and there are shocking revealations concerning the working of the system.

MRS LANGTRY is engaged in inspecting land in Los Angeles, Cal. It is reported that the strife over her among the land agents has reached such proportion that several men engaged in booming villa tracts have given her lots free for the sake of advertising the beauty as a future resident of their towns. Hon A. M. Jones, better known as "Long Jones," chairman of the Lilinois Republican state committee, and one of the most assure politicians in that state, is against the renomination of Biaine, and says that is the Republican sentiment all over lilinois, Incians, Iowa and Wisconsin. He says the jarty can never win with Blaine against Cieveland.

TRUBAS BOWARD PUWBLL

The Democratic Candidate for Governor of the Buckere State.

Gen. Thomas Edward Powell, the Demoratic candidate for governor of Ohio, was born in Delaware county, Ohio, in the year of 1842. He was educated in the state, graduating from the Ohio Wesleyan university in 1863, and subsequently entering upon the practice of law in 1867. Entering the political arena, he, in course of time, was the chosen Democratic nominee for attorney general of Ohio, but with the balance of the entire Demo-cratic ticket, met his defeat. Mr. Powell is an excellent representative of the legal talent of Ohio, having not only attained an envisible reputation as a lawyer of ability, but also established for himself a large and incrative practice in the highest courts of the state and nation. Mr. Powell has not been desirous of political favor, although he has acted and served the public in many minor political capacities. He is devoted to his profession, and has, it is said, refused all the many overtures of his friends to send him to Congress. He served creditably in the army as a high private during the rebellion, and was pro-moted for gallant and meritorious service several times.

THE KEVENUE COMMISSION. Banks to Pay Three Mills on Stock and Six in

Lied of Other Instition. The Pennsylvania state revenue commission met again in Atlantic City on Monday, with Senator Cooper in the chair. A communication was received recommending that all local taxes be collected at the same time. The resolution concerning the taxation of corporations was laid over on account of the absence of Attorney General Palmer, who offered the resolution.

resolution.

The third section of the bill was again considered at length. Anditor General Norris proposed that the deficiency caused by the falling off in gross receipts be met by an additional tax of two mills, and Senator Cooper proposed that the tax on gross receipts be trebied. No action was reached.

The fourth section, which affects the taxation of bank stock, was left at three mills upon the stock, and the banks to pay six mills in lieu of all other state and local taxation.

stion.

Resolutions to continue in session at Atlantic City until August b and to meet at Creeson Springs on August 1s, were adopted.

The Hotel Rat-Catcher

From the New York Times. It is a sight to see the "rat-catcher" arrive at the hotel at midnight. He does not register, and generally enters by the side or servants' door. He carries a buil's eye or servants' door. He carries a buil's eye lantern and a bag in one hand, or he may strap the light to a belt, while in the other he wields a pair of tongs. He descends to the lower regions of the larder, the storeroom and kitchen, all now dark and deserted. The rat-catcher utters a low whistle or squeak, which is the intimation of one rat to the others that he has found good nibbling, and all the redents run out from their hiding places in the direction of the familiar and welcome sound, and, dating them piaces in the direction of the familiar and welcome sound, and, dexing them by the glare of the lantern, the man picks them up with his tongs and drops them into his bag with such agility that seldom any escape. Blinded and paralyzed by the light only the isolated ones attempt to run, and these are readily captured. The rat catcher visits the hotel once or twice a week, and the same one is employed by several houses. It is whispered that he sells the rats to the Chinese restaurants, but he denies the to the Chinese restaurants, but he denies the insinuation. He says be sells the hides, which he properly cures and stretches.

A Bloody Battle to Kentucky. A bloody fight commenced in Bell county, Ky, Friday, which is still progressing, in which two men are known to have been killed and in which many more will doubt-less follow before it is ended. The sheriff less follow before it is ended. The sheriff summoned a posse to arrest a party of Turners living on Yellow creek, in that county, who resisted, and in the fight which ensued disorge Thomas, of the pusse, and teorge Turner, of the other side, were both killed. Each side has been reinforced, and the fight is raging hotter than at first. George Thomas, who was killed, formerly lived in Williamsburg and his brothers live there still. They received the news of their brother's death late Sunday night by telephone, and left immediatly for the scene of conflict.

BPRUIAL NOTICES.

Gallant Rescues. There can be something heroic in a medicine as well as in individuals. Burdock Blood Butters have effected many a gallant rescue among the suffering sick. Thousands have escaped the missiles of dyspepsia and nervous debility through the use of this wonderful medicine. It is emphatically the best stomach and blood tone in the wold. For sale by H. B. Cochran, druggist, 137 and 132 North Queen street, Lancaster.

We feel called upon to preach.
We feel called upon to preach a few gospel fiels—facts that are worth knowing. We want field that is possible in this world.
