LABAYETTE'S REGLECTED TUMB. Decorated by a Number of Americans-A Lan Paris Cable to New York World.

The tomb of Lafayette, which has been in a neglected condition in a private cemetery in the grounds of the convent of Sacred Heart, 33 Rue Picpus, was handsomely deco-rated for the first time with floral wreaths and French and American flags on the occasion of the national appriversary by a large number of American residents and visitors

The movement was started by the Post Laisyette of New York and No. 2 of Philadelphis, representing the Grand Army of the Republic, and it has been decided to make the ceremony an annual one. Col. Kent delivered a eulogy over the tomb. He spoke of the heroic, the virtuous

and the glorious memory of Lafayette, and of the noble and generous support by France to enable the United States to gain their independence. He hoped the friendship thus would last to eternity. Should the hour o need ever come to France be trusted she would find in America's reverence for Lafa yette the same self-sacrifice and spirit of raternity.

The ladies of the Convent of the Sacred Heart presented Col. Kent with a wreath of immortelles to be piaced upon the monument of Lafsyette in Union Square, New

York.

A meeting of Americans was subsequently held at the Hotel Chatham. Among the gentlemen present were Messra Kent, Frank Rargstresser and Gresvenor Hardy, Stearm, Bergstresser and Grosvenor P. Lowrey, of New York: Fulton, Winter, and Ripley, of Pittsburg: Felton, of Chicago; Nathan Appleton, of Boston; W. Burk, Warner, Allen, Selier and Messer, of Philadelphia: W. Arnold, of Lancaster, Pa, and Mr. Savage, of Cieveland, O. It was decided to ere-ta monument to Washington in the city of Paris to be inaugurated on April 20 30, 1889, the contennial anniversary of Wash ington's taking the oath of office as president of the United States. It was resolved that a committee, consisting of one representative from each state, be as pointed by Col. Nathan Appleton, chairman, to carry out the scheme.

At the meeting on the hill a large number stood up for prayer and when Mrs. Smith saked how many there were who wished for more grace every person in the tent stood up. The interest still kept

up after it was adjourned to the circle. Yesterday morning while Mrs. Conner. of Mt. Long Without Food or Water, From the Mt Joy Star

Two weeks ago, last Saturday, a bull be onging to Henry Landis was lost. Diligent search failed to disclose his whereabouts and all hopes of ever finding him were almost given up. In an accidental way the animal was found on Munday, in the cellar of the obsect a shed of Simon Snyder. It seems be got in there and the door must have blown shut before he got out and thus imprisoned him. As there was nothing in there to ea or dring, he was making that time without either food or water. Although the animal was doubtless somewhat weak, yet be seems to be getting all right again.

His horse walked forward to eat some leaves from a bush, and in stopping, the rails not being bound, one alid forward, striking the horse, which caused him to run down hill and straight for a high precipies. Mr. Stokes attempted to stop the horse, but the ralls slid forward and struck the ground before the front axie, which, acting as a fulcrum, threw the rails end ways, striking himself and horse. He was struck on the head, shoulders, arms, side and legs. tree stub and threw Mr. Stokes against it head foremost and knocking him down. The wagon caught and stopped the horse, saving him from going over the cliff where he would have been dashed to pieces.

Mr. Abram Aston, who was working on the clearing, came to his assistance, as he was unable to move or get up. He assisted him to the house of Peter Miller, where he was home in a buggy. Though very stiff and bruised he is doing well. The team was not injured.

A RUFBL SEA WAGON.

New Life Saving Apparatus Tested in the Sur at Ocean City, N. J.

Despite the rain and the general disagreeble weather, the board walk, pavilion, beach and porches of the various houses at Ocean Beach, N. J., were crowded with persons anxious to see the trial trip of the "see wagon," as it is called by the residents. Through the kindness of the inventor, Mr. Lake, your correspondent was allowed to be the only passenger outside of the parties im-mediately interested, and W. H. Knowles,

mechanical engineer.

A very curious affair is the sea wagon, much resembling a boy's cycle. It is mounted on three wheels nine feet in diame. ter, two for driving and one for steering.

The frame work rests on these three wheels and tapers into a platform, which is in the neighborhood of fitty feet from the ground.

Upon this platform, which is inclosed by a railing, resis the steam engine, the propelling power of the wagon, an endiess chain com-municating the driving force from a wheel on the centre of a shaft. It seems almost ridiculous to even suppose

a crude state the idea is a practical one, as was fully demonstrated and confirmed by the machinist. A new machine is being made with all of the faults of this one eradicated several very important improvements will be supplemented. The great advantage possessed by this above other such apparatus is that it goes direct to the wreck and it is so heavy that the strongest seas cannot overturn it nor the uneven beach upset it. Such is the mechanical construction that it makes it almost an impossibility for either of these accidents to happen.

Alleged Larcesy.

John H. Rutter, a white man, made complaint against Mary Jane Patterson, alias Mary Buch, charging her with stealing from him \$12.85 cents while he was an inmate of her house in North street. The case was heard this afternoon by Alderman Mc-Conomy. Testimony was offered to prove that he had money when he went into the house and had none when he came out Mary Jane denied having stolen the money. She said Rutter came to her house drunk and she did not like to turn him out for fear the police would arrest him, so she took him up stairs and put him to bed to sleep his load off. When he awoke he claimed that his money had been stolen, Alderman McConomy beld the accused in \$200 to answer at court.

The stock market this morning opened buoyant and active and continued strong. Almost every stock on the list sdvanced, and at noon the lon features of the morning. It seems almost ridiculous to even suppose that such a structure of iron could be moved by this almost toy engine, yet at the word of command the wheels revolved and slowly into the water went this new invention, to be used for the purpose of saving lives. Probably a hundred yards had been traversed when part of the wheel broke, and the inventor would not risk getting the machine back to its starting point. So, much to the disappointment of all, the engine was reversed, and was brought slowly back to the exact starting point to show the complete control the enginemas over his conveyance. Although in a crude state the idea is a practical one, as was
