#### The Much Wanted Dodge.

General Granville M. Dodge has been very much wanted by the Pacific railroad ission for a long time, but they have not been able to find him. They have mooreded at last in serving a subpona upon him in New York ; and now, that he has been run into his hole, General Dodge ens to may that he has been all the time ready to appear before the commission, upon its simple invitation, but that he had no idea that he was wanted. The facility men have in deceiving themselves is really wonderful. No doubt General Dodge really thinks that he has always been anxious and ready to appear as a witness, and believes that he did not know that the commissioners anxiety to see him has been widely ventilated in the newspapers, and considers that he has at all es been as accessible to a man with a subpons, as he was yesterday to the reporters who walked right into his office. and heard from his lips how innocent he was and how anxious to tell everybody all he knew about everything. General Dodge has a particular good name for a dodger, but we will see what we will see

en he comes upon the stand. And by the way, how very innocent all here Pacific railroad people are and how ready to tall all they know that they think the public ought to know! There is Senafor Stanford, who only stons telling when

has in excess, it is an inability to tell the truth. Doubtless he wants to, but h can't. And it seems that it is the fact that he has blessed Lancaster with four commit-

teemen instead of two ; the result being that Mr. Landis is in very much of a minor ity. This may not have been malicious in Mr. Cooper ; but it suggests, at least, to Republicans to consider the manner of organization they have wherein the chairman of their state committee may create as

many extra votes in it as he pleases.

It Comes Tumbling After. The passenger department of the Penn sylvania railroad has again distinguished itself. After stopping the issue of thousand mile tickets at two cents a mile, upon the ground that it was a violation of the interstate commerce law to sell one man a ticket at two cents, while charging three to another, the sale of these two cent tickets has been resumed, without any amendment of the inter-state law or any interpretation of it upon this point by the commissioners. The passenger boss of the railroad has reached another conclusion about the "policy," of the railroad. This new conviction came to him after the Read ing railroad had commenced again issue thousand mile ticket books inst as the determination to stop them had been reached after the Reading had agreed to do the same.

The Reading retreated from its foolish position, and the Pennsylvania comes tumbling after. Both have reason to be ashamed of themselves; but the Pennsylvania, assuming to be the very choicest pink among railroads, has cause to be especially ashamed of any conspicuous folly in man-

agement, such as this. THE annual statement of Lancaster county

elsewhere printed presents some very inter esting figures.

THE New York Star says that Editor Pulitzer, of the World, was on the point o oming out for Mr. George last year during that gentleman's attempt on the mayoralty. One of the World's young men, one Smith went to the Labor headquarters and assured the leaders of the movement that his employer, Mr. Pulitzer, felt himself strongly noved in their direction; that he was dis usted with the dickerings and "trades" of Tammany, County Democracy and Irving hall. The World sent a talented photographer around to take pictures of the Labor enders, and put some one at work condens ing Mr. George's book for publication in it columns, the understanding being that a whole page should be devoted to the pur-pose. The nomination of Abram S. Hewitt is said to have demolished this house of

something to est. Mrs. Hiller complied with their request, and when they had finished sating, one of them picked up a poker and threatened to kill her. The old lady begged them to spare her life, whereupon the brutes dragged her to the cistern and threw her in. The cistern is twelve feed deep and was half full of water, but Mrs. Hiller clung to the lead pipe of the pump and managed to keep afloat till noon, when her sons returned, and she was taken out in an exhausted condition. Investigation aboved that the tramps had ransacked the house and abstracted \$170 in c sh and \$1,330 in certificates of dep sit upon the First National tank of Minneapolis. Mrs. Hiller is 65 years of age, and it is feared that the shock to her system from the brutal treatment she received may result fatally.

tained by government pledges, the company well knows that the power of the govarnment itself is limited and governed by public opinion. The sympathy of the Candians is overwhelmingly in favor of the people of Manitoba in their struggle to essape from railroad monopoly by building a ine to the states, and it would be very difficult indeed, in the present temper of the people, to persuade Canadians to take up the railroad's quarrel, simply because the Dominion had been foolishly pledged to maintain the monopoly. The government can not afford to come to blows in Manisoba, and the knowledge of this fact is the secret of the boldness of the Manitobans. This little handful of people hold the weakest link of the long chain of communication between England and the East, just forged at great expense, and rebellion there, if based on so popular a grievance, would be terribly contagious. We may therefore look for a graceful backdown on the part of the Dominion government be-

fore actual violence is reached.

## Baulsh the Car Stove.

After many strong appeals from the peohe through the press ; arguments, entreais and reproaches prolonged through any years and illustrated by human sacs by the hundred-sacrifices so horrihe in detail that beside them the flashing ife of the Aztec priest would have ed a merciful relief-after all this lication from a free self-governing people, at last the cold metal heart of the mailroad god of our civilization has been suched and the New York Central has rmined to heat its cars by steam. In ertain quarters this news of the banishat of the deadly car stove is received with grateful joy and noted as a startling the existence of the soul of a ration ; but from the calm deliberation with which this result has been ed, it seems more probable that the hard cash heart of the company was wrung by the consideration that cremation of passengers by the car stove was ex-

Invites Fraud.

There seems to be no doubt that it was Chairman Tom Cooper who made that moderful statement to the Philadelphia res from Cresson Springs about the way the state committeemen from Lancaster being were created. THE New York Herald gives this suggestion to American butchers : The wealth of the people of Argentine Republic consists largely in their herds. They own 14,171,000 cows, 4,180,000 horses and 70,910,000 sheep. The pasture grasses are so various and of such excellent quality that even in winter the cattle are not fed. They must got their own living or go without it. As a general thing they manage to pull through, but even when the mercury is down in the dumps the berder

ists his herd take their chances and never stalls them. In Basnos Ayres meat is dear. Mutton and best bring a high price, and what is worse they are of the poorest quality-so poor, indeed, that a saddle of real Southdown mutton or a steak of the julcy tenderioin sor is a luxury unknown. All that is needed, however, is to stall the cattle and properly fied them. Bullocks can be bought at \$11 50 a head, but beef fit for the table cannot be had at any price. A wise man, with a long head on his shoulders, who would raise beet for the market could gather in the dollars from Buenos Ayres fathers of families in a very satisfactory way.

Tite Southern Recorder is edited by Bishop Turner, of the colored Methodist church, and referring in his paper to a recent conversation with Secretary Lamar, he says, "Secretary Lamar is one of the most generous and noble-minded men in the country. His respect for the negro is all we could wish." Even worse than this remains behind. "If we were in politics," the bishop proceeds, "we would nominate him for the presidency." Commenting on this, the New York Post observes : "When it comes to a colored bishop in the South nominating an 'unbang rebel' for president, Northern bourbons, like Boutelle, of Maine, must indeed feel as though their occupation was gone."

MR. BELL, superintendent of the foreign mails of the postoflice department, says that the Mexicans are trying in every possible manner to improve their postal service. They are adopting American customs as rapidly as possible to accomplish this end. He thinks that there never was a time when the feeling in the republic was as friendly toward the United States as it is now, and he thinks that Americans should "not only

extend the hand of friendship to them, but should go across the river to grasp their extended hand s."
