#### The Verdict.

The jury in the Sixth ward election after a deliberation of thirty-sever ours, have returned a verdict of not cullty on the count of conspiracy, and ity of the three other counts, viz: of defrauding John W. Mentzer of votes cast for him; of defrauding Jacob S. Smith of votes cast for him ; and of adding ballots to the poll.

The readers of the INTELLIGENCER are familiar with the evidence in this case, which at great length has been reproduced in these columns from day to day. Perhaps no trial in the local court in recent years has attracted so much attention, both on account of the great in terests at stake and the high social position that the defendants occupied. It has been a long and tedious trial, but every step in it was eagerly followed by the public until Sunday, when a result was reached.

There will be few to dispute the wisdom of the verdict that has been render ed. A stupendous fraud was perpetrated on the ballot in deliberately stealing more than one hundred votes from two candidates for public office. The election officers were sworn to protect the ballot, and the burden was upon them to show that they performed this sworn duty. The nce showed that some were recorded woting who did not vote at all, that there were names of people presented as having deposited their ballots, who could ot be remembered by the assessor o ward, nor by the letter-carriers there-There were other glaring irregulariin the conduct of the election, and the et was made by the prosecution to This was not shown to the station of the possibility that all or through this small loophole the jury of guilty of conspiracy.

The defendants all testified that they were innocent of wrong doing at the election and they all failed to say how it came that the ballots that were cast were not returned. That they were returned as cast was not disputed. No theory was advanced by the defendants to reconcile their declarations of innocence with the admitted falsifications of the ballot bex ; and they were therefore necessarily disbelieved and convioled. If they were not all guilty, they had at least all agreed to stand or fall to-

The result of this trial will have a Catholie parochial schools of Polladelphia widespread influence for good in the conare now engaged in the education of nearly duct of all future primary and general 20,000 children. These pupils range in age between 6 and 15 years, although at both

is a process requiring elaborate machin ery and great care, to so conduct the operation as to get all the saccharize matter from the cane, and so make the production profitable. There is a great deal of capital, energy and business capacity required in the conduct of a sugar plantation, and the business should be well rewarded. Any reduction in the duty by Congress that will bring distress to the sugar planter, will not be justified at all ; and no purpose of hitting sugar refining trusts will warrant a blow to the planting industry.

MAYOR FITLER, of Philadelphia, wants to succeed Governor Beaver. If he does not succeed, he will suck his thumbs.

THE purchase of the German dally, the Lancaster Freie Presse, and the German weekly, Die Laterne, by the Frois Press Publishing company is noted elsewhere in these columns. Outside of Philadelphis and Pittsburg, Lancaster is the only other place in the state that possesses a German daily newspaper. The Freie Presse has been in vigorous existence nearly six years and Die Laterne thrice as long. Both have become necessities to the large German popu-lation in our midst and they have built up reading constituencies of large proportions. We are assured that under the new man sgement these journals will more than ever before reflect accurately the German life in city, county, state and country. Just now Germany is the cynosure of all eyes Europe, and in her future much of the destinies of the continent is centred. Mr. George Rohr is to be the managing editor under the new dispensation, which is a

guaranty that these newspapers will main-tain the high excellence which they have hitherto achieved. Mr. J. H. Schneider, who retires from

these journals, will be greatly missed in local newspaper circles, which he has done very much to quicken into lite. As the successful creator of an important daily newspaper enterprise in this city, he will not soon be forgotten and Lancaster will lose one of its most active and energetic young men in his departure to other spheres of duty.

To the Lancaster County Anti-Corrup-tion association : " You have carned your title,'

THE American Copyright League Lave Issued a pamphlet collection of the opinions of American authors about international oopyrigh'. Longfellow said in a letter of date of October 8, 1878 : "Whatever is just is for the benefit of all; and I wish we could have a law providing, between England and Americs, that a copyright taken out in either country shall be equally valid in both." The opinions are followed by 'an open letter to readers of books" which presents the arguments for internations opyright Briefly, they are that it would raise us to the standard of fair play adopted by other nations united in the International Copyright Unior. It would encourage the wholesale development of our literature now hampered by the fact that our authors have to compete with books on which no payment is made to the author. It will give a fair field to our writers at home and abroad and a chance to make their proferdon self supporting. The example of France and Germany "countries whose literature is fully protected by copyright and whose books are the cheapest in the world shows that the price of books de pends not upon copyright but upon the nature of the public demand." At all events "there is one thing better than s chesp bock and that is a book honestly come by.'

### SPECIAL NOTICES.

tions. It is a plain warning to the ballot box stuffer and the return tirker that his occupation is gone in Lancaster county. It will make primary election rs more vigilant in their duties and will halt the ballot thief by the threat of the prison cell.

#### In a New Role.

Claus Spreckles has been astonishing the Philadelphians with glowing accounts of the various big things in sugar that are shaping themselves in his royal brain The sugar king now poses as the deadly enemy of trusts, asserting that as long as he lives he will never go into one, and that he is now planning the erection of a refinery in Philadelphia, New York or Baltimore, which will involve an investment of from three to five million dollars. He says that he is studying the relative advantages of these cities as locations for sugar refineries, and it is quite evident that he is getting plenty of advertising for himself and his ventures.

This defiance of the angar trust by a great monopolist is not very inspiring. reckles is reputed the real king of the Sandwich Islands and has long controlled the sugar trade of the western coast, so that his appearance in the east as the enony of the trust can only mean that he would prefer to trust himself with a sopoly of this end of the sugar basi-

He expressed sorrow for the Louisiana ight planters if the tariff on sugar was ch reduced. because that would let in he oheap beet sugar of Germany. The rics use both beet and cane sugar al King Spreckles himself proposes tablish a brot sugar factory in California. The failures of the various efforts for the manufacture of beet sugar in this country he ascribes to the ignorance of the men attempting it who did not have the proper machinery. He now has 500 tons of machinery on the way from Antwerp to California to be used in the manufacture of sugar from the beet, and has no doubt whatever of the success of his venture.

In Further Criticism.

We have suggested in criticism of the new tariff bill of the Democratic majority of the ways and means committee, that the duty on cigar wrapping tobacco should not be reduced and that the duty on iron ore should be. Our ores should come in at a low impost, if any, and coal should also be admitted free or at a reduced rate. We do not understand the policy which takes the duty off wool before it is taken off iron ore or that reduces it on sugar while leaving coal untouched The first things to feel the relieving hand of Congress should have been ore and soal. It may be all right to take the duty off wool, but it is not quite so clear to us as it is that it should be taken off iron ore. No doubt it is import. the wool manufacturers, to have cheap wool, and probably the wool growers' interest in the matter to not sufficient to require protection; but is is a case upon which much may be said m the wool growers' side ; and a great I can be said for the sugar producer's ad of protection. We do not believe that the duty on sugar should be so reneed as to hazard the Louisiana produc-. It is a manufacturing as well as a g industry there. The grower of the same also expresses the juice; and it side box. At all druggists.

extremes there are a few exceptions. In this work \$200,000, an average of \$8 per capita, is yearly expended, and the school properties, including building and lots, are worth in round numbers over \$1,060,08

Tun House has given careful consideration to the invitation extended by France for the Paris exposition of 1889 and a raso tion providing for the proper represente. tion of this country at the exposition was favorably recommended by committee of the whole and will probably pas". It provides for the appointment of commissioners, authorizes the use of public vessels to transport articles for exhibition free of cost and appropriates \$200,000 for expenses.

There was an amusing debate on the propriety of taking advantage this occasion to assert the rights the American hog abroad and, a member said, make a special exhibit at Paris in order that the people of Europe may see the lilinois pig in all his parfec tion and cheaphens, the short and emple animal of the poor. An amendment was inserted providing for the distribution a the exposition of a statement of the American pork business and that an effort should be made to secure a competitive inspection of the pork of various countries.

#### PERSONAL.

A. BRONSON ALCOTT, the well-known author, died in Boston, on Sunday, aged 88 VOALS. FOSTMASTER W. F. HABBITY of Palls-

delphia, was the guest of W. U. Honsel, esq , on Sunday. SPEARER CARLISLE project the Mills arith bill and says it will passible Copgram

ubstantially as reported. ROBERT H. SAVRE, general manager of the esthichem iron company, has gone to Caba on business connected with the company's affairs.

Cash Well Spent.

Money expended in personal sdorament is often foolishly wasted upon articles of no in trinsic value. A bottle of SOZODONT, how ever, is worth its weight in gold to any one troubled with poor teeth, and its price is cash well spent to the purchaser. Though it will not make the teeth regular, they who use it are astomished at the rapid improvement it effects in the dental row. Moreover, they o cathe sweetness, and have healthy gum and ruddy lips.

## Prudence! Prudence!

In medication, as in anght else, prudence should be our guide. Yet thousands cast it to the winds. Every new nostrum finds its ratrons, the medical empirics of every false school have their gulls. . Every change in the gamut of humbug is rung successfullyfor a time at least-the notes being furnished by the credulous. In happy contrast to the many advertised impostures of the day stands many suverneed impositires of the day stands Hostetter's Stomach Bitters, now in its third decade of popularity, approved and rec-ommended by physicians, indersed by the press of many lands, sought and prized by invalids everywhere. It is an ascertained specific for and preventive of malariat dis-cases, chronic indigestion, liver complaint and constipation, checks the growth of rheumatism and neuralgia, is a peerless in-vigorant and useful dimenta. vigorant and useful diuretic. Nervous peo-
