THE DANGER SEFORE US.

We have already alluded to the imporce of housekeepers paying more attention
the kind of baking powder used in
vening their bread. This is a matter to
ich we cannot draw attention too otten,
ause it is something which involves the
at serious consequences to the general
y of mankind. Temperance spostice
us—and there is ample foundation for
statement—that there is disease, both
all and physical, in the intexting cup;
in the same way there is disease, allow

perhaps, but certain, in the lime and alum leavening agents employed in many of the homes on this continent.

No punishment is too severe for those manufacturers who piece these poisonous alum and lime baking powders before the public with the assurance that they are pure and wholesome articles. In the belief of the truth of such statements such baking powders are largely used in the perparation of food, and in this way the poisoncus ingredients are taken into the system without a suspicion of their presence. By and by come spells of beedsche, datress in the aformech, loss of appetite, a fluitering of the beart; the child is seized with an apparently causeless cough. The coating of the stomach is destroyed, perhaps; one of the vital organs is rendered almost useless; the kidneys are attacked with Bright's disease. The health of the child is irreparably broken down; the adult becomes a chronic invalid. These are the doings of the modern cheep baking powders that are composed of lime and alum, or that contain sulphuric or phosphatic acida. In view of these facts surely all housewives should exercise the care that is, we know, now exercised by some in the selection of a proper brand of baking powder. She who does not do so, whether the neglect is the result of ignorance or recklessness, cannot free nerself from the responsibility for the health, perhaps life, thereby endangered. No housewife need be ignorant of the quality and exerging the government chemists, who are certainly unprejudiced, have been published and show very clearly the quality and strength of all the baking powders in the market. The Royal Baking Powder, which is accessible at every hand, is reported already free from lime, alum, phosphate, acid, or any injurious ingredient. It is further stated by the most eminent authorities on food hygiene that food leavened with it is more wholesome than when raised by any other method. Its use is therefore to be commended. It is to be regretted that no other baking powder, when there are so many in the marke

s sent her in its place. The Earth Exhales Poison air in localities where vegetation

rotted by freshets, is laid bare to the sun's rays by the retiring flood. Millions of square acres, in the vicinity of the great tributaries of the Mississippi and the Missouri, in the South and Southwest, give forth this feverladen mlasmatic vapor, disseminating malarial pestilence broadcast. Not only throughout the great west, but wherever on this continent fever and ague makes its periodic appearance—and what locality is wholly exempt
from it?—Hostetter's Stomach Bitters is the
recognized defense, the most highly accredited and popular means of cure. Fever and
ague, billous remittent, dumb ague and ague

when used to remove constipation, liver complaint and dyspepsis, kidney troubles, neryousness and rheumatic allments. Use it upon the first appearance of these troubles and
with persistence. South and Southwest, give forth this fever-
