## SAFE HARBOR RAILROAD.

THE SO IRD OF TRADETAKE NO AUTION IV REGARD TO IT.

They Listen to a Verbal Roport From th Committee on Railroads, Detailing the Probabie Income and Expenses. It Will Earn 84,000 a Year.

The June meeting of the Board of Trade was held on Tuesday evening at their rooms, in Kehleman's hall, with President Wickersham in the chair. The treasurer reported a balance in the

treasury of \$81.78. Mr. Houston, of the railroad committee, submitted a lengthy verbal report. He said the committee, after the last meeting of the Board of Trade, had an interview with Mr. Davis, of the Safe Harbor iron works, in reference to the building of a railroad from Safe Harbor to Lancaster, and the com-mittee would now submit the result of road from the survey and cetimates made would be \$200,000 in round figures. The timated receipts per year are \$26,000, divided as follows: Freight from Safe Harbor iron works, \$9,400; other freight at Safe Harbor \$1,000; Rockbill station, \$300 Blackwater station; \$2,500; Millersville etation, \$3,000; passenger service, \$9,000 mail and express, \$1,000, making a total of

The expenses would be about \$22,000, made up of \$5,000 interest on \$100,000 bonds, and \$4,000 interest on \$100,000 stock and \$13,000 running expenses, which would leave \$4 000 per year profit. The committee did not go over the figures carefully and were not now prepared to recommend the building of the rallroad. Some of the estimated receipts were lower in the committee's judgment than they would actually be and the committee thought this road would earn in proportion to its length as much as the Quarryville railroad.

There are several matters in connection with this road which should be changed before the committee can recommend its construction. One is in reference to the passenger depot at Safe Harbor. It is on other, and unless the depot is changed to suit the new road there will be much inconvenience. Another objection to be met is that the Pennsylvania railroad company owns the right of way siding from the Port Deposit the iron works and unless the right to use the siding is ob tained the new road will have to build for some distance either by filling up the creek or cutting down a very high hill, either of which would be very expensive. A third important is a change as to the route of entering the city. The route of the road should be so changed that instead of running to Dillerville, it will strike the city at or near the corner of James street and College avenue, then by connecting with the honse station. About one and a-half miles can be saved if this change is made and the road run this way instead of to Dillerville.

After the consultation with Mr. Davis some of the members of the Board of Trade thought as the cost of the survey had been paid by the Sale Harbor iron company it proper that Lancaster city should rais sufficient money to defray the expenses securing the right of way for the proposed road, and he and Mr. Reynolds undertock to collect this money. He then detailed at length their experience to show how reluc tant some of the business men of this city were to subscribe towards the enterprise. The collecting committee were treated so shabbily at a number of business houses that they almost come to the conclusion to give up the task undertaken.

As to the proposed railroad to New Ho!land the committee would report that the New Holland and Waynesburg branch had been sold and the committee were not now prepared to say how the sale would affect the construction of the proposed road.

A WIFES DREADFUL CONFESSION. She Poisons Husband and Two Children for s

Mrs. Sarah J. Whiteling, of Philadelphia, woman, 40 years of age, was committed to prison by Coroner Ambridge Tuesday afternoon, after she had confessed to deliberately murdering her husband and two children. The woman's crimes will rank in conception and execution with the most diabolical murders on record and appear to have been committed for the pitiful sums of money for which the victims' lives were

insured.

The Whiteling family consisted of John Whiteling, the husband and father, aged 38 years; Berths, aged 9 years, and Willie aged 2 years and 9 months, and the mother who was two years older than her husband. The husband died on March 20 and Dr. George W. Smith, of 1320 Walnut street, who attended him, gave a certificate of death due to inflammation of the bowels. On the 24th of April Bertha died and Dr. Smith certified that her death was due to gastric fever. On the 26th of May Willie died and Dr. George Dietrich, who was called in after Dr. Smith had abandoned the case, said that death was due to congestion of the bowels and granted a certificate to that effect.

tion of the bowels and granted a certificate to that effect.

John Whiteling's life was insured for \$145 in the John Hancock Insurance company. He was also a member of Herd No. 2, Benevolent Order of Builaioes, which pays a death benefit of \$55 to the widow of a member. This money was collected by Mra. Whiteling immediately after her husband's death. She had insured Bertha in the Hancock Insurance company to: in the Hancock Insurance company for \$122, and Willie was insured in the Pru \$122, and Willie was insured in the Pru dential Insurance company for \$17 and in the Hancock company for \$30. The amount of money she received on the death of her husband and children was \$390.

The fact of the three deaths at intervals

The fact of the three deaths at intervals of only a month was brought to the notice of Coroner Ashbridge, and after examining the records in the health office he was satisfied that the case was one his office should investigate. He communicated with Chief of Detectives Wood and Detective Guyer was detailed to assist the coroner. The

The coroner ordered them to be exhumed on Wednesday last, but by some mistake the grave was opened on Tuesday. Mrs. Whiteling visited the cemetery on Wednesday, and, when she found the grave open, asked the superintendent for an explanation. asked the superintendent for an explana-tion. While she was talking to him, the coroner, accompanied by Dra. Formad and Stewart and Detective Guyer, entered the grounds. She laughed and talked with the coroner, and in answer to his questions said the children had eaten a great deal of caudy, and if any poison was found in them it might be due to that cause. Then she said the water at her house was bad, and that

might have caused their deaths.

Professor Leffmans made an analysis of the parts brought to him by the coroner's the parts brought to him by the coroner's physician and on Sunday reported to Coroner Ashbridge that he had found arse ito enough in the bodies to cause death. Mrs. Whitehead was taken into custody and locked up in the Central station. She was closely watched to prevent her from committing suicids. She spent most of the day in prayer and on Monday she suffered so from nervous prostration that a physician had to be called in. The coroner charged her with killing her husband and two children, and told her to send for him when aren, and told her to send for him when she was ready to make a confession. Yesterday she made a full and clear confession to the corover and was committed to Moyamensing. The inquest will be held on Friday at 11 o'clock.

They May Soon He Expected to Appear This Vicinity. Dispatches from points in Northern Iowa Dispatches from points in Northern Iowa and Western Illinois report the appearance of swarms of seventeen-year locusts. Professor Riley, United States entomologist, who is at present in Chicago, when asked about the locusts, said that a well-known brood occurs this year, and this periodical visitor may be looked for in wooded portions of Illinois and Iowa, and also in the following territory, as indicated by the experience of 1871:

Wisconsin—Waukeshs, Walworth, Jefferson, Rock, Green and Dane.
Iows—Grant, Crawford, Richmond and Saitk counties.

Iowa—Grant, Crawford, Richmond and Sanik counties.

Indiana—The boundary in this state is not well defined, but includes the extreme northwestern counties.

Michigan—In this state the southern tier of counties extending from Lake Michigan east to the middle of the state.

Pennsylvanis—Lancaster county, the southeastery eastern portion, known as the "Peques Valley." This locality was not verified in 1871, although there is no doubt of the appearance of the insect there in immense number in 1854.

In reply to a question as to whether the grasshoppers are to be destructive this year, the professor could not express a positive opinion. Up to three years ago he had been able to confidently state the prospects in advance, but since then he has been unable to get together sufficient data as to the extent of egg deposit to justify a prediction. He had just received a telegram from the office that the young are hatching in immense numbers in parts of Minnesota, and with weather lavorable to them considerable injury may be done, especially as the average period between visitations has expired since the last troubles. Rev. Dr. N. U. Shaeffer Delivers the Blennial Oration at the Court House, " Brain and Brains" was the subject of Rev. Dr. N. C. Schaeffer's blennial oration in the court house on Tuesday evening. It was an interesting feature of commencement week and the auditorium was wel filled with people. Dr. Apple opened the exercises of the evening with prayer. W U. Hensel, esq., then introduced the orator. Dr. Schaeffer spoke ably and deliber ately on his subject for about one hour Following are a few of the leading thoughts

The orator began by referring to the building of a house. Then he spoke of build ing the brain. He compared the size of the brain in different persons, also its form and development. He established the connection between brain and brains and spoke of the growth, form and nourlahmen of the brain. He told of when the brain suffered bankruptcy and referred to the mistake in brain building. Then the infinence of the electric current on the brain and what it shows was adverted to. Certain parts of the brain have control of certain parts of the body. Apply this theory to education. You can trace the aristocrace of the brain back to the soil. It .noves in cycles, coming and going in about four gen rations. The training among the ancient Jews puts us to shame.

There is a language centre in the brain.

When a person is right-handed the language centre is on the left and vice versa. In order to build up the brain

normally one must study the languages.
Language should be mastered by sight,
bearing, feeling and uttering powers. What
is to be said of central localization? Different exercises are needed for different persons. It takes longer to think in some languages than in others.

The orator then spoke on the subcon-solous life of the soul. He accounted for the fact that good Christians have been heard to utter dreadful caths on the battle-field. He said the highest form of memory was assimilating memory. If it be true that brain mass, quality and texture have something to do with mental endowment, then it becomes an important fact that brain building is a great and important fact. A hearty mind can only exist with a hearty

After making the announcement of the programme for to-day, Mr. Hensel declared the exercises of the evening closed.

A Memorial Window, A very handsome memorial window has been placed in the north wall of the college chapel. It was erected to the memory of George Gelbach by his three children. At the top of the window is the Heidelberg catechism, and the date of its publication, 1653. Next below this is the coat of arms of Calvin and Zwingli. Then follows the seal of the canton of Switzerland; then fol-lows the date of the first synod of America, held in Philadelphia in 1747, and the names of the fathers of the church in this coun-try—Schlaster, Weiss, Bechtel, Boehm, Below these names is the phonix arising from her ashes. Then follows the name of George Gelbach, with the date of his birth

and death as given above. The window was erected under the super-vision of Charles G. Fisher, editor of the Reformed Church Messenger. NOTES HERE AND THERE.

THE RUDY MURDER.

He Should Have a New Trial. Marriott Brosius, B. Frank Eshlems and John A. Coyle, attorneys for John W. Rudy, convicted of murder in the first legree, filed reasons for a new trial to-day. Seven reasons are assigned as follows The verdict was against the law and weight of the evidence; it was error to allow the commonwealth to stand jurors aside who were brought into court on special venire; the court erred in refusing o allow the defendant to prove by Jao Witch that Christian Rudy complained o the bad treatment he received from the in mates of the almshouse and to show tha he had enemies amongst the inmates; it was an error for the court to charge the jury tha of the commission of the crime charged and in not charging the measure o proof required to establish an alibi; that ince the trial of the cause it has been discovered that H. E. Groff, did on Saturday preceding the killing, order and direct the defendant to dig a hole for a gate-pos at a particular point, locating it by marks on the ground ; that the court erred in no charging the jury that the defend ant could be convicted of any crime highe than murder in the second degree withou evidence of a deliberate intention to kill and there was no auen evidence furnished by the commonwealth.

CHAIRMAN JONES SAID TO HAVE AN-OTHER OF HIS LETTERS.

It is Said That it Absolutely Declines To Accept the Republican Nomination at Ohicago-John Sherman Suggested as the Heir of Blatne.

PITTSBURG, June 13,-The Leader the afternoon publishes the following: B. F. Jones, chairman of the Republican National committee, left for Chicago last night to establish his headquarters at the Grand Pacific hotel. He was weighted down with Pacific hotel. He was weighted down with a great secret, and absolutely refused to be interviewed prior to his departure. In his possession was a letter but just received from James G. Blaine, which is to be reed upon the assembling of the national convention next Tuesday. It states in terms that cannot be mistaken for Blaine's position in regard to the presidency, and settles for good and all the question of his candidacy. In neither of his previous epistles from Florance and of his previous epistles from Florence Paris did Mr. Biaine state positively that he would not accept the nomination if tendered him. In the letter which Chairman Jones has, this declaration is most emphatically made. Under no circumstances, Mr. Biaine says, will be parmit the use of his name at Chicago, nor mould be accept were the presidential Paris did Mr. Blaine state positively that the use of his name at the presidential would be accept were the presidential would be accept were the presidential would be unanimously tendered him. nomination unanimously tendered He further goes on to indicate that Be John Sherman, of Ohio, is his prefer and advises the convention to place him a the head of the Republican nat ticket. Continuing Mr Biaine gives quite a lengthy dissertation on the tariff, touches the important issues of the day, and predicts in glowing terms a glorious victory for the Republican party in November. He contrasts the campaigns of 1884 and 1888 and show how this year all the odds are in tayor of the Republican.

in favor of the Republicans.
It is said that Senator Sherman and Mr. Blaine have understood each other on the question of the presidency for everal months, and that even before the Maine man's departure for Europe an arrangement had been entered into between the two whereby Sherman was to receive Blaine's support for the nomination and election, and that in case of the elevation of Sherman to the White House, Blaine is to be his secretary of state. It is also stated that Senator Quay, of Pennsylvania, was acquainted with all the details of the Biaine-Sherman agree-ment, hence his active work in the former's ment, hence his active work in the form
