## FOUNTAIN PENS

MADE IN THE WORLD.

Here are some of its features, "Absolutely its own": There is no joint for the ink to coze through; no screw section to gum up. Can be filled without separating pen from holder and thereby solling hards and deak. The feeding stem extending full length of holder permits the use of every drop of ink. A single drop remaining in the holder will write just as well as if the holder were full. In consequence there is no danger of ink dropping from the holder in blots on the paper; making it the cleanest, most durable, and satisfactory Fountain Fen ever made. Besides these there are Pens and Pencils of every kind of Gold and Silver and cheaper and better than were ever before seen in Lancaster. Come and examine them. There is no charge for looking.
