Canada's Tariff. any Republican orators have followed as of their leader, Mr. Blaine ceaking of Canada as a low tariff contry and pointing to the retarded ent of her industries, have preloted for the United States a similar ation if the Democrats should sucin preventing the collection of surrevenues. Now the facts about da are entirely at variance with these ns and her people are not suffer from a lack of protection but from a contive system of protection. They are could protected against the United lates, and almost as well against Engand, but their situation is simply this, at they are taxed for the benefit of Engmanufacturers by being obliged to say for subsidizing steamship and rail-road lines that carry trade to England, or least interfere with commerce across as border. It is a matter of profound ishment that a people of such spirit calmly submit to this imposition. Agricultural implements and furniture taxed 35 per cent. and iron from to 78 per cent. and customs dustion on which the duty is levied. Yet in spite of this protection there are and five rolling mills in the dominion and American agricultural machinery is in femand. Of the imports in 1885 having total value of \$102,569,318, the United stee furnished \$51,774,853. Owing to he relative smallness of the Canadian ne market, her manufacturers are not ourged to venture the expenditure of at sums on the best machinery, and they continue to import from us, in spite of duty, many things they could make themselves. Commercial union is desired by them, because they would gain a large market near home for many products, natural and manufactured, and they would get chesp goods. Their volume of trade with us would be speedily increased at the expense of their trade with Eng. nd. The advantages to the United tates are not so plain, and we can afford to wait for the developments. Sooner or later Canada must abandon her ent system and adopt a tariff that all protect her from England, while urting commercial union with her neighbor and natural ally, the United

More Will Follow Him.

Edward Jordon has spoken out in conemnation of the party that he claimed and honored in its early days and is now too greatly honored by the support of men like him. No doubt Private many who would have acted as convictions, if the Republican party had not sought to hold them by its trifling with a Senate tariff bill and its desperate efforts to more in indices to devise a bill for the tariff reform

tramp ut action of a Democratic president tramp ut ouse, is quite too plain to admit of creation; and whatever their bill may be party stands committed to high taxes.

When their bill is made public, if that ever happens, there will probably be many Republicans who will resolve to follow the lead of Mr. Jordon in vote if not in voice. They will conclude with him that the days of the party are numbered, its ssues dead and they will return to the only party that has outlived long years of defeat, because founded on the principles that must underlie all true government by the people. A great many Northern roters stand in the same position as Mr. Jordon. They left the party of their early youth because they believed that by so doing they could give more strength to the government in its struggles with

But the party born of civil war has outlived its purpose and abused its trusts, and it now misapplies its power by insisting upon unnecessary and unjust taxation and opposing the patriotic course of our president in the Canadian troubles. General Harrison may go on receiving delegations of men of the kind that vote as the party orders, without thought or care, but when a calm old man who stood by Lincoln's side in the days of trial de-clares that the Republican party is no longer worthy of support, all the Blaines, Harrisons and Mortons can not save it and the Senate might as well give up and go home.

Why We Are Happy. There is abundant occasion for good public humor in these September days. In the first place, and nearest home, we bave a truly astonishing exhibition of enterprise and liveliness on the part of our little sister Columbia. She is making more noise in the world over her centennial than many great cities on similar occasions, and visitors return unanimously delighted, which cannot always said of celebrations of the kind. Then there is better though more distant cause for happiness in the good news from the South where two Jacks are disputing over the situation with the odds in favor of Jack Frost. What helpless mortals we are at any rate with all our boasted science and civilization! Millions of money and the stronge t efforts failed to check the advance of yellow jack and old probabilities could do nothing with the weather, but an infuence unknown to us makes the weather a trifle cooler and all looks well. It is all very well to talk of the voice of the people being the voice of God, but the greatest nation on earth can not raise the roury one degree by ballot. It can only fall back upon the much abused motto on our national coinage.

Prisky General Fisk.

General Fisk has affirmed his purpose of staying in the field as the Prohibition indicate for the presidency and making a gallant fight. He also takes occasion to indicate that the position of his party on the tariff is "exactly where the Reblican party stood four years ago and publican party stood four years ago and where the Democrats stand now—in favor of a readjustment of the tariff" sed he thinks that the disagreement between the recorded opinions of Garfield, were here. We were never in

Grant and Arthur, and the present position of the Republicans is decidedly

General Fisk has a healthy sense of humor; there is nothing more amusing in our political history than the present pigeon-toed and bandy legged position of the grand old party as it essays to stand on a platform built to prevent reduction of tariff, and argues with itself about a tariff bill that is said to be concealed somewhere about its person. It will be interesting to watch the efforts of the party to stand erect when that bill is finally produced and it is called upon to reconcile it with the following clause of the Chicago platform :

If there shall still remain a larger revenue than is requisite for the wants of the govern-ment, we favor the entire repeal of internal taxes rather than the currender of any part of our protective system, at the joint beheats of the whisky trusts and the agents of for-elem manufacturers.

THE operations of the Philadelphia mint, in the year ending June 30th, show more work done than ever before in the same time. 88,139,449 pieces were coined, having a value of \$25,982,967 52. The profit to the government on the work done over all working expenses was \$5,236,402 31, and this does not include the profit on silver builion purchased. Of "minor coinage," viz: five cent please, three cent and one cent, some sixty millions of please have been struck, and from that number there have been shipped on application from the mint to various banks, firms and individ-uals throughout the states and territories not less than 49,600,291 pieces.

PITTSBURG IS having a great centennial celebration and the processions, specebes and decorations have driven the papers of the city to extra edition and elaborate lilustration. The Pittsburg Leader sends out a nest little four page edition printed en route in the procession and among other matters of interest it gives cable messages from the notables of Europe explaining their absence. Victoria said she was too busy preparing to lecture on free trade and Boulanger says : Ze hole in my neck zat ze Monateu Floquet did make ees not sufdesenties heat for me to do ze trip across ze

THE Whitechapel murderer is now said to be an insane American. That explains everything. He must have been crazy to commit the crimes and he must have been an American to baffle the London police. Even our lunatics seem to be more than a match for the British!

Oun Columbia will have to look sharp Dolumbia, South Carolina, has a story of the sea serpent that was seen in the bay by the captain and crew of a schooner. It was nity feet long and awam along the surface of the water with its head elevated about three feet in the air. Its body was abou the usual size, as large around as a flour barrel and of a dark color. Its head was of a vermilion bue and the slender neck was covered with a long mane, which was erected occasionally "like quills upon the fretful porcupine." As the tug drew nearer it perceived its approach, and flourishing its tail about twenty feet in the air sweller rapidly off toward a marsh. Found Fraz Point and was soop a out of sight. As it swam along the "Cater around was lashed into foom." into form. What a splendid attraction a thing of shinis kind would be for the centennial of the the jolly tars of the shad fishing . keep a sharp eye on the bounding bill lows of the Susquehanns.

Any Tailor with common wit can put a Suit together so as to make it present a nice appearance to the eye. but will such a Suit give you service? As a matter of course you cannot tell. We read and hear a great deal about CHEAP SUITS, which are hawked about everywhere. The simple truth is implied in the words, they are CHEAP SUITS. Our idea is not to sell CHEAP SUITS, but to furnish at a low figure that which will give Satisfaction in every Partic-ULAR. How will we do this? By taking our employes into consideration. You cannot pay poor prices and get GOOD WORK, while on the other hand if High Prices are paid you get first-class workmanship, and you benefit both WORKMAN and Cus-TOMER, as the goods being well made will stand longer and rougher service. If you want to see the sequel to the above facts call in and have a look at our FALL OVERCOATS, which range in PRICE from \$7.00 to \$25.00, in all the latest fabrics; also our Cutaway Suits at \$16, in Worsteds, Corkscrews and Broad Wale, and all the most FASHIONABLE CLOTHS.
