THE LANCASTER DAILY INTELLIGENCER, WEDNESDAY, JANUARY 2, 1889.

TANAMARERA

derson, and like makers-stock

worn, soiled, tossed, or otherwise

Daily Intelligencer, AROASTER, JARUART & MR.

Good Res the governor has often been ac-being an old girl, and he keeps he music, in his message, by com-g with esse of its most important the second state of the se at upon carrying corporations. It wery good recommendation to but it has been made so often to aghisture, and been so regularly a by ft, that it was hardly worth for the governor to bather about aphing it after he had forgotten it in his original draft. Probably seminded of the omission by the of the Western Union telegraph . We hope that the Legislature induced at this session to provide the constitution; but we are not interface any such legislation.

so governor makes a few other recthe bad or indifferent. We think the is very sensible in advising that present state house building should the destroyed to give place to a more thantious structure of modern archi-

Surely the Legislature has had og enough in the experience of other ancient and substantial state house res, with the idea that something er and better will be had. The station seldom is realized. After the mediture of millions, an architectural metrosity rises up, that often refuses to d up after it is built. See Albany ; see Philadelphia's miserable and city hall. Let not the state incur ager of paying so dearly for a new ol whistle. She has now one of the a capitols in the country, and let her it. Let no modern architect imapon her capitol hill a mangled mass

The heartily approve the governor's memory and the Legislature wald give its earnest attention to securthe state good wagon roads. There hing in the way of legislation more atly wanted, because there is no more rying need of the people than a good roads. The present laws, aving road making to the unint care of township supervisors d the township treasury, need refor-They did well enough when and state were financially and when the people could be maved from the struggle of their through the winter's mud or the and of paying turnpike toll to save them. at day has past. The counties can to pay for good roads, and they d provide them.

governor recommends no plan to egislature; but what is obviously ad is first, a state engineer with subate county engineers; the smaller les being grouped together in a dis-under the assistant engineer; under should be the supervisors.

This department should have charge of a laying out and the keeping in order

may tell better where it is applied, among the stranging poor, but every encourage-ment should be assured to those disposed to visit the sick in hospitals if fir no other reason than the watch thus placed upon the management. One good workan regularly visiting an institution of this kind is worth the whole grand jury several times over as a guard against careless or inefficient management. We badly need an ambulance station down town equipped with wagon and telephone so that it could be called out as quickly as a fire engine and go with a doctor to gather up the mangled people on the railroad or in factories. A fire engine station might have this equipment and the fire depart-ment horses could be so used.

THE INTOLLIGENCER distributed yesterday to each of its subscribers a calendar that can be claimed without boasting to be far superior to anything of the kind ever before produced in this city. It is in every detail and absolutely the product of the INTELLERNCEN printing office, and it would be hard to realize the amount of labor involved in its preparation. On each daily allp of the memorandum pad there is a notice of society meetings for that about us is in the past. is a notice of society meetings for that night, taking from one to six lines, and carried through the entire year. Holidays, obanges of the moon, da, are noted at the lower edge of the slip, leaving ample space for memorandum. There is a brief quotation for each day of the year from ancient and modern writers, philos-ophers and posts. The date is in large hold type, and the rounded corners of the pad prevent curling. The beyel adreed card that in our present offerings worth. DRESS GOODS.

prevent curling. The bevel edged card that bears it is instefully printed in colors, and on the back will be found the fire alarm signals. That the INTELLIGENCER calen-dar is a thing of beauty and a joy for a year will be admitted by all who receive it.

THE Sanitary Era wants to know why some scientific man does not go to work to suffic the quasilon of the best sort of buriat by interring the bodies of a few animals in tight cases in vaults and in various kinds of soil and closely noting the results. The experiment would not be costly or very difficult, but probably the maniferians realize that the rather alow progress of burial reform and oremation is good evi-dence that the human race will stick close to traditions in the disposal of the dead, no matter what science may prove and com-mon sense dictate. The most ardent reformers in this matter hope only for a slow and steady change of feeling.

THE New Year's day INTELLIGENCER should be compared with other papers by any who may doubt that it leads in local journalism ; it proposes to stay in the lead.

HENRY LABOUCHERE SAVE : "It is quite true that the late Duchers of Galilora has bequeathed upward of \$2,000,000 to the Empress Frederick. But the legacy is heavily charged and encumbered by trougrade 1.75. bissome conditions, so the empress will probably find it expedient to refuse it." What can the conditions be that would incline even an ex-empress to refuse \$2,000, 000. Though profoundly ignorant of them we will venture to suggest that the unfor-tunate lady might be helped out of this difference, distressing situation if she would simply shift the whole thing to some gallant American gentleman. Almost any citizen of this republic would march bareloot over broken bottles to relieve an empress in distress-of \$2,000,000.

How great the luxury of being able to say that we have not done wrong since last year, and how few can say it ! Fewer can boast that they have not written the date wrong at least once if they have had occa-sion to write it at all.

all the roads in the state. The county aid pay the bills; and the authority of county commissioners should be reuired for the construction of all new recommended. The present ds are out of date from beginning end. The views and reviews, re-relowers and re re re-reviews now invoked re a road is made or abandoned, are silly that it is a wonder that they have long survived. We want good and medful roads. To get them we most have intelligent and skillful masters, and the county ary to supply the funds. The day then the farmer is ordered out by the mpervisor who knows nothing about and making, to make road to pay the tax; and a little dirt is thrown and a little furrow made, in the intervals political discussion, while all trace of work done is washed away in the art summer's rain, should come to an and ; and we should get roads that will be properly graded and worked and make a

The Care of the Afflicted. The governor recommends that the inthe who do not require medical care or rest attention should be taken care of the county institutions, so that there my be more room in the state hospital the treatment of the more acute cases. This suggestion is worthy of considera-tion. The county institutions are not as all equipped for the care of the insane, they should be prepared to take care the class referred to, and the position the unfortunates will be quite as good that of the other hospital inmater or the existing system of manageant. The county hospitals of Pennsyl rate are not of a very high grade and ugh the insane department of the neaster institution is said to be one of best equipped it is by no means up to sents for an enlightened treat. ant of the insane. The hospital should in charge of a resident physician occuting a separate building ; and above all ement and all the appointments

wild be free from politics. In the notate hospitals the salaries command a d reputation and it is more difficult uption and intrigue to gain a ing, so that until there is some revotion in the government of county als we must view the condemnation my patients to them as a sad alternato the overcrowding of the larger its. Pennsylvania can afford be fully abreast with the times in the at of the insane and the treatthe of sick.

And, changing the subject slightly, the adoption of the latest and best de or the care of the unfortunate and ization of charitable work. the organization of charitable work. The of leading we appear to be fol-ting very slowly. Other towns have s, but if a man is crushed on the interest of the state of the st tospial. Other cities have socie-good women devotes to hospital set but Lancaster, though blessed to apple share of kind and charit. apple, does not men to expend much results lise. Parkage their work
