It may be hard to find men the required ability, reputation and negrity who will give up other business which they may be engaged for these ying positions, but we are hopeful that a experiment may succeed, as the cause tariff reform must be benefited by my exposure of facts.

Wild Silk Worms.

certain Mr. Joseph Neuman, who been investigating the wild native worm of California under governant patronage, thinks that he has found ts last year's appropriation of \$2,500 mitiplied for this year by ten so that he y establish stations for the study of worm. He predicts that by conaing the study " it will not be many s before this discovery of mine of the ative silkworm will be one of the reatest blessings ever conferred upon people of the civilized world."

Twenty-five thousand dollars seems a good deal of money to put into the ndy of worms and the advisability of be outlay must be chiefly determined by utation of the gentleman who rereputation of the golden has good rounds for his hopes in the matter \$25, 00.000 would be well spent in realizing m, for the man or government adding see staple to the natural products used for slothing or food is a benefactor worthy of ude. If this humble investigation worms enables California to furnish a rior and cheap variety of slik that I be an incalculable, gain not only the Pacific slope but to the and in fact to the race. year or more ago a certain or calmly proposed to sell to the rament a secret connected with the ufacture of sugar which he had disred while drawing a salary for invesestions of sugar-making under governent patronage. It is believed that he sipromptly supressed, secret and all, and justly, but now that an investigator bonestly publishes the encouraging result of his studies, he should be stimulated to enewed effort. His report may urge sivate enterprise to prosecute similar ingation, and the more workers in this to the merrier. In a few years there may be wild times among the now un-

Tutors for Congressmen.

There is plenty of sense in the sarcastic ations sent to Congress by a " Turn Versin" of Lake, Illinois, protesting inst the Blair bills respecting the esablishment of religion and free public hools, for though there can be no doubt the need of the instruction in Christian es and morality, which Mr. Blair saks to compel the states to give through s common schools, it ought to be quite dent that governments, state or nacannot undertake the work with prospect of success or even of its

there are too many differences of islon to permit even the most genhandling of religious matters in the left for the parents and the churches any method they may choose. It ardly probable that Senator Blair allty of the purpose charged in these ns of establishing a state rebut he certainly shows a tento play with fire. Anything resuggesting an attempt to give instruction in the schools ed by taxation must act my as a red rag on a and the quick appearance of these resolutions proves the delicacy of ter though they are rather humorindignant. One of the recomns they offer is for an appropriamodisient to pay tutors to instruct modification or senators like Blair, in the limen's of history and other studies thinked to divide their minds "so

that they may no longer diagrace our nation in the eyes of the world by resolu-tions and bills to which there is no present parallel, but which reminds one foreibly of Spain in the fifteenth century." The senator will hardly be wise enough to remain silent under this comment, but his measure will not receive much consideration in its present shape.

In Sames.

The news from Samoa is of a very serious nature, and the more grave because it comes by way of Berlin, and is color more or less to suit German ideas. The German forces have interfered to save their man Tamasese, and overthrow the patriots who have been so stubbornly supporting Mataafa, the lawfully elected king. Their pretext was the destruct of German property by the rebels, as they call Mataafa's followers, and insults to German sailors that would not be difficult to find in the inflamed condition of the populace for which Germany is responsible. The German that attempted to disarm the insurgents had the worst of an encounter with the desperate natives who are said to have attacked them under the leadership of an American named Klein; but in a struggle so unequal there can be no doubt of the speedy reversal of any advantage the patriots may gain, and the iron heel of Germany will grind a terrible revenge out of the unfortunate but plucky little nation. An officer and fifteen Germans killed and thirty-six wounded is a score that shows the natives were glad to get a chance at the bully who has been standing back of Tamases and causing all their trouble. All this happened over two weeks ago, and when we next hear from the island it may be to the effect that Germany has resolved upon annexation as the usual method of solving similar troubles. Of course the United States and England will have something to say about that, but the latter thas often given the examples of seizing a country first and consulting about it afterwards. When last heard from Samos was in a state of breathless

over the course of Germany, and Mateafa was offering to appear and plead his cause before the commanders of the British and American men-of-war. Later news may alter the appearance

of things, but with the information we now have we can only say "bully for Kline, and hurrah for Matanta!"

1T is announced that the Legislature will be asked to pass a bill prohibiting deer hunting in Peansylvania for five years. It a found practically impossible to stop buuting deer with dogs, and as they are fast disappearing the only resource seems to be the passage of some stringent measure making the killing of deer illegal for a term of years. One dealer in game mays that from a region that used to furnish him 150 head of deer a season he has this winter received but 17.

A BLOCKADE runner has arrived from Hayti, where the farce of a blockade is still kept up, and he brings a humorous secount of how his steamer, the Coneman, got past the Haytien navy. Meeting a Haytien gun-boat he hoisted the American flag at his fore and the British colors at his mainmast. The gunboat began to circle around the ship, blowing her whietle continuously until the centain, not knowing the meaning, started his, which is of the foghorn species, the thunders of which entirely eclipsed the puny pipings of the gunboat and seemed to completely surprise her ducky crew. The captain of the Coneman says that no damso graphically written up for the American papers. Only 100 shots were fired and the aim was so poor that only a little planking

THE truly wonderful weather of this winter is producing astonishing results a few miles south of us. In Washington for several days past hyacinths and crocuses have been blooming. "On Capitol Hill the bright yellow blooms of the forsythia and Japanese quince have astonished everybody, and particularly Northern visitors, by appearing two months ahead of time. Some of the blooms were picked and sent away to dwellers in more rigorous latitudes as a proof of the loveliness of Washington

Do you know how Carpets are made?

Probably not. But you may know very easily you will be taught by an ob-

ject lesson. On our second floor in the Carpet Gallery there will be running for some days to come the best specimen of a model Carpet Loom ever seen in this country.

It is run by Mr. Joseph Coley, of Worcester, Mass., who be-stowed all his leisure for two years upon its construction.

It is an exact duplicate of the Crossley loom, is only 3 feet long, 18 inches wide and 2 feet high. It can weave 25 yards a day of perfect carpet 4 inches wide. You can see it running out of the loom, the figure-weaving the motto "Home, Sweet Home."

A regular loom is o feet wide 24 feet long and 12 feet 6 inches high. You can therefore see how wonderful is this little model, which is composed of 3,028 distinct pieces.

WHAT'S THE MATTER WITH THE
Well, if you mean the largest enrollment of
pupils for the first week of January since its
organization, it is an indication that it is meeting with its roward and that IT'S all right.
The L. B. U. does not hold out such inducements as "Full Course for \$\(\frac{1}{2}\)—" which has
been characterized by a somewhat caustic
write; as a "Bait For Buill HaaDs," and
while that is a rough way of putting it, it is
true that the dull bey is the only one to profit
by this arrangement. The bright young feliow must pay for the excessive cost of this
instruction for the dull one.
