A Word About Catarrh

"It is the mucous membrane, that wonder ful semi-fluid envelope surrounding the delicate tissues of the air and passages, that Catarrh makes its stronghold. Once established, it cass into the very vitals, and renders life but a long-drawn breath of misery and disease, dulling the sense of hearing, trammeling the power of speech destroying the factury of smell, taining the breath, and hilling the refined pleasures of taste. Institiously, by creeping on from a simple cold in the head, it assaults the membraneous lining and envelopes the bomas, eating through the delicate coats and causing inflammation, sloughing and death. Mothing short of total eradication will secure health to the patient, and all alleviatives are simply processinated sufferings, leading to a fatal termination. Sawroun's Kadroal Cura, by Inhalation and by Internal administration, has never failed; even when the administration, has never failed; even when the disease constitutions, hearing, smell and taste have been recovered, and the disease thoroughly drives out."
