was found by a visiting committee of the G. A. R. in a most scrupulously neat condition and, though some complaint is made of the coarse quality of the food, and sensational dispatches intimate possible starvation of the orphans, it is hardly likely that any such abuse will be uncovered so soon after the general shaking up of 1886. Even if it should be proved that the 130 boys were fed and clothed much more poorly than the 90 girls, who have not developed a single case of this inemity, that could hardly be assumed as the only cause of the epidemic.

It is more probable that the boys harded together in this school suffer from the lack of that close personal supervision of their habits and guidance of their tal development that can alone enternet the influence of a single

The Candidates. We note that the city Democrats want Morton for major; and so do we, can be elected. It was to us, though the office is filled atil that time, the law of 1867, being acceptational, never had any existence. The election of a year ago was all upon the day fixed by existing law or the choice of a mayor, and Mr. E4-

garley was chosen for the term fixed by that law, which is two years. We do not see that his election at that time, for two years, can be successfully disputed. We will elect Mr. Morton, we hope, a year

LILLIE BODAMER, of Steelton, has been in a kind of trance for a week, lives upon orange juice and ice cream, is unable to stand or see, talks retioually and makes accurate prophecies of the doings of people far away. This is the substance of a story published in the Philadelphis Press, with a graphic account of the religious excitement that brought on this rather incredible state of things. The trance itself is hardly remarkable, in view of the recently published accounts of the doings of hysterical and estaleptic patients under the care of experts in France and America. The doubtful part of the tale is that detailing how the girl told of the unexpected visit of a distant relative who duly appeared, and of the approach of a friend with some ice cream, which was verified promptly. She is also represented as giving late information of the sickness of friends in other towns and her powers are represented as so varied and accurate that represented as so varied and accurate that every leading newspaper in the country should be clamoring for her services at a high salary.

LET timld women read of the brave English wife who calmly lighted a candle while her husband struggled with a burglar and then got out her pistol and shot the rascal. Her husband was fatally cut in the struggle, but her deliberate action was better than a wild shot in the dark with a hance of killing her hosband.

THE Philadelphia Record shows by official figures that the grain exports from
Baltimore were more than six times as large
as the exports of grain from Philadelphia
in the time between December 1 and February 7. It is all blamed on the Pennsylvania railroad, but we venture to sugsome natural advantages of the monumental scaport, as for example a competing railway connection with the Western grain fields. Philadelphia cannot reasonably expect to get from her railroad giant the same consideration that is forced from it when operating in a state where it is not monarch of all surveyed routes to the West.

DR. SCHULTZ, of Vienna, has been advis-ing the citizens of that beer-drinking community to drink their beer out of mugs, and not out of glasses. The glass may be more agreeable to the eye, he says, but the mug is more healthy and pleasanter to the palate. If a glassful of beer is left standing in the open sir, or sot in a window under the direct rays of the sun, in four or five minutes the beer will contract an unpleasant taste; whereas, beer left in a mug with cover remains undeterlorated, even though the mug should be exposed to the sun.
Direct sunlight will spoil the boat beer in a
very short time; and similar injury to taste
and smell is effected though in less degree, by gaslight or lamplight.

The Chamber of Torture Is the apartment to which the unhappy sufferer from inflammatory rheumatism is con-fined. If, ere the crisis of pain is reached, that fine preventive, Hostetter's Stomach Bliters, is used by persons of a rheumatic tendency, much unnecessary suffering is tendency, much unnecessary suffering is avoided. Nervines, anodynes and sedatives, while having none but a specific effect, are yet very desirable at times. Yet can they produce no lasting effect upon rheumatism, because they have no power to eliminate from the blood the rheumatic virus. Hostetter's Stomach Hitters does this, and checks at the outset a disease which, if allowed to gain headway, it is next to impossible to dislodge or to do more than relieve. Rheumatism, it should be remembered, is a disease with a stat tendency from its proneness to attack the heart. A resort to the Hitters should, therefore, be prompt. Dyspepsia, kidney complaint, malaria and nervousness are relieved by it.

The Renaissance of Ginghams. Whence come the color ideas of the period? From France? Yes, more than from elsewhere. The very name "Gingham" tells of India, the land that gave the fabric to the uses of the world. The value of the word broadens as the stuff becomes the expression of
