Oremeting Stedies Taxes From Post Rouses
The advocates of cremation in New York
regard as a misbap to their cause the building of a crematory on Swinburne Island,
down the bay. This requires explanation,
for under ordinary circumstances every
additional temple for the incineration
of human remains would be considered a gain. The reason why the new
orematory is deplored by promoters of the
new method is that the bodies to be burned
therein will be those of persons who have
died of contarious diseases, mostly paupers.
Swineburne Island is the site of the pest
hospital maintained by the quarantine
commission. It is these of ficials who have
built the crematory at government exbuilt the crematory at government ex-

built the crematory at government expense.

It consists of a furnace and its appurtenances very similar to those used elsewhere. The body of a sheep has been incinerated as a successful test. Now, it has been the aim of the American Cremation society to make incineration fashionable. The chief advocates believed that every example of a rich or celebrated person choosing to have his remains disposed of in this way wins new adherents, and on the other hand, they have all along dreaded the adoption of the process by public institutions because they feared that it would degrade it in the popular mind. The Charity commissioners of New York would have catablished a large crematory a year ago, to take the piace of the Potter's field, had they not listened to the appeal of the cremation society not to do so. But the quarantine authorities were immovable.

actify answers.—If a strong man, who has frequently suffered pain, grows impatient and rebelitions, how much more impatient should be the taby who does not know what suffering means. For the pains of colio, see thing, etc. Dr. Bull's Baby Syrup is the sovereign remedy. Price id cents.

A Terrible Misfortune. It is a calamity of the direct kind to feel that one's physical energies are failing in the prime of life—to feel more nerveless, more dispirited, weaker every day. Yet this is the unhappy lot weaker every day. Yet this is the unhappy lot of hundreds who surround us. A source of renewed strength which science approves, in behalf of which multitudes of the debilitated have and are every day testifying, and which, in countiess instances, has built up constitutions sapped by weakness and infirmity and long unbenefitted by other means, surely commends itself to all who need a tonic. Hostetler's Stomach Bitters is such a medicine—pure, botanic, soothing to the nerves, promotive of digestion and a fertilizer of the blood. Dyspepsis and nervousness—the first a cause, the second a consequence of lack of attamina—depart when a course of the Bitters is tried. All forms of malarial disease, rheumatism, kidney and bladder trouble, constipation and billousness are annihilated by this standard family medicine.
