SIX THOUSAND VICTIMS.

Annual Record of the Killed and Wounded Expected to Be Made by the Commission of Fractional Rec.

The second day of the general conference of the railroad commissioners of the several states with the commissioners of the interstate commerce commission began in Washington on Wednesday morning.

The meeting was a very harmonious and successful one. A committee on how to obtain harmony in railway legislation was appointed.

The following resolution was adopted: "Resolved, That we believe that still further advance toward uniform classification of freight rates is necessary.

The following resolution was also unanimously adopted without debate: "Resolved, That we do respectfully request the interstate commerce commission to consider what can be done to prevent the loss of life and limb in coupling and uncoupling freight cars.

The resolution closed with an address by ex-Railroad Commissioner Coffin, of Iowa, now representing the Brotherhood of Locomotive Engineers.

"I want to state this fact, that any labor law which would prevent the adoption of safety appliances on freight cars will be in the proper direction, and that if such safety appliances are not made compulsory on the railway companies, in fact it is perfectly practicable.

"I will make a few remarks before you, gentlemen who are commissioners from the several states, to be made that I am aware of. I refer to the wonderful slaughter of men by the old link and link coupler and the hand brake.

"These are astounding facts. The average would be something like 240 a year. These reports commenced when we only had 8,000. The commission's report last year shows that there were killed and wounded by these two causes 340.

"I have a table in my hand in condensed form, showing that in all the great accidents in the last fifty years there were 1,000 killed and 10,000 injured.

"I have spoken of the fact that in the United States, and over six thousand of these accidents are caused by the old link and link coupler and the hand brake.
