Public Warning Against Chenp Sahing Pow-ders Containing Alum and Phosphate-Aid in Their Suppression Promised-Name of the Alum Powders Sold in the State,

the Atam Powders Sold in the State,
From the Trenton, N. J., State carette.

The New Jersey State Board of Health
has published its official regulations for the
enforcement of the laws relating to the
adulteration of food and drugs. With
reference to baking powders, the following
provision is made:

"BAKING Powders.—The market is
flooded with large quantities of inferior
baking powders, and as these are sold
largely to working people, and are used by
these people as substitutes for yeast, it is
necessary, in order that light bread be
made, that these powders have proper
leavening power. In is power the cheaper
powders do not have, many of them giving
out very little carbonic gas. These cheap
and imperfect powders contain alum or
phosphate, and are so crudely compounded
that a residue is left in the bread or biscult
after taking. The public are warned
against these, and in their suppression will
be faithfully added."

The regulations provide for the collection
of samples which are to be forwarded to
the state chemists for analysis. Four
chemists have been appointed, as follows:
Prof. A. R. Leeds, Hoboken; Prof. H. B.
Cornwall, Princeton; Shippen Wallsee,
Burlington, and Dr. W. K. Newton,
Paterson.

The following are the names of the alum.
