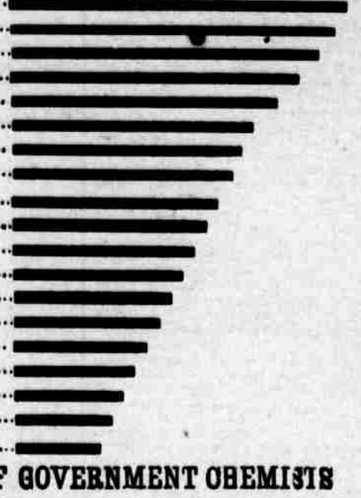
REPORTS OF GOVERNMENT CHEMISTS.

COMPARATIVE WORTH OF BAKING POWDER.



REPORTS OF GOVERNMENT CHEMISTS

As to Purity and Wholesomeness of the Royal Baking Powder.

"I have tested a package of Royal Baking Powder, which I purchased in the open market, and find it composed of pure and wholesome ingredients. It is a cream of tartar powder of a high degree of merit, and does not contain either alum or phosphates, or other injurious substances. E. G. LOVE, Ph. D.

"It is a scientific fact that the Royal Baking Powder is absolutely pure. The Royal Baking Powder is undoubtedly the purest and most reliable baking powder offered to the public. H. A. MOTT, Ph. D.

"The Royal Baking Powder is purest in quality and highest in strength of any baking powder of which I have knowledge. WM. MCMURTRIE, Ph. D.

The Royal Baking Powder received the highest award over all competitors at the Vienna World's Exposition, 1873; at the Centennial, Philadelphia, 1876; at the American Institute, New York, and at State Fairs throughout the country.

No other article of human food has ever received such high, emphatic, and universal endorsement from eminent chemists, physicians, scientists and Boards of Health all over the world.

NOTE.—The above DIAGRAM illustrates the comparative worth of various Baking Powders, as shown by Chemical Analysis and experiments made by Prof. Schedler. A pound can of each powder was taken, the total leavening power or volume in each can calculated, the result being as indicated. This practical test for worth by Prof. Schedler only proves what every observant consumer of the Royal Baking Powder knows by practical experience, that, while it costs a few cents per pound more than ordinary kinds, it is far more economical, besides affording the advantage of better work. A single trial of the Royal Baking Powder will convince any fair minded person of these facts.

* While the diagram shows some of the alum powders to be of a comparatively high degree of strength, it is not be taken as indicating that they have any value. All alum powders, no matter how high their strength, are to be avoided as dangerous. 1td
