Alas! that a representative of the people should so far forget his duty at to recommend a constable, just elected by the people at his own request, to decline to take out his commission that he might save his place as nstable! You see it was quite a new Bepublican deal. The exigency which required policemen to be beheaded who were likewise constables, only arose when the Democratic constables, whom the law required the mayor to appoint, had

This birthday of Jefferson will not be forgotten by Democrate who now see more than ever the necessity of insisting with all their power upon a return to his famous principles of government: "A jeelous care of the right of election by the people, economy in the public expense that labor may be lightly burdened; the homest payment of our debts, and sacred preservation of the public faith; encouragement of agriculture and commerce as its handmaid." We have drifted far enough from this etandard when instead of a jeelous care of the right of election by the people a man is rewarded with cabinet cffice for raising money to manage elections, and we are far from economy in public expense when a party goes into power on the principle of keeping down the surplus by expenditure. THE birthday of Jefferson will not be

Our congressmen want better pay and perhaps the comparatively small amount of honor that attaches to the position warrants the demand for more cash. In other countries the honor of taking a part in the councils of the nation is regarded as a fair compensation, though recognizing the fact that this lofty view excludes the poor man, more or less pretense is made to lighten his expenses. "The Swedish Diet lests for four months every year, and the members are paid \$80 per month for their work. But in case of absence from the session \$2.50 per day is deducted from that salary. Norway is about as liberal as Sweden, but the members of the National Strothing are not fined for absence. It can hardly be considered a money-making place, however, to be a member in Norway, for the session lasts only six weeks and the pay is about \$3 per day. In Portugal the peers and commons are paid about \$350 a year. Little Switzerland allows the members of her National Council \$2 per day. Spain pays the members of her Cortes nothing, but grants them certain privileges and and immunities, while is Italy the senators and representatives are allowed only their actual traveling expenses." and representatives are allowed only their

actual traveling expenses." Undoubtedly we do right to pay our congressmen for their labor and as a men, but if we raise the money standard of the representatives too high they may cease to fairly represent the mass of the people, and we will be threatened with a Congress of great wealth and dangerous ability; a Congress of the kind of men now furnishing smart corporation lawyers and railway

PROFESSOR HADLET, in a recent lecture upon fast trains before the Yale students, said: "The speed of railroad trains is restricted within three theoretical limits — First, a physical limit of 80 miles per hour, beyond which it is found impossible for a train to hold the track; second, an operating limit of 60 miles an hour, which practical experience has found trains cannot run without much damage to life; third, a commercial limit of 30 miles per hour, at which, all things considered, it is found most economical to run a train."

Students Threw Franks Out of Windows.
An amusing April fool joke was played early Monday morning by some of the students of Gettysburg college. Between 3 and 4 o'clock someone in the main building of the institution raised the cry of fire, and when the half dressed collegians tumbled out of their rooms they found the halls filled with smoke and howling students. Some got badly frightened, put on several suits of clothes, buried their trunks from the windows and rushed for the stairways.

In the meantime the cause of the fire had In the meantime the cause of the fire had been discovered in a large pile of rags on the ground floor and which were still amouldering. But the cries and yells had by this time been heard in the town and the alarm was accunded. This brought the firemen to the scene on a run, but only to find they had been heared and to be reminded that it was the first of April. The joke, however, was not intended to disturb the citizens but simply to scare the students and have some fun with the proctors.

The Bloody Grime of Beligious Lunarics.

Amanda and Monroe Lassier, wife and husband, were on Monday committed to jell at Jackson, Mo., the woman charged with murder and the husband as accessory. The husband recently became a religious lunatic, claiming to have received from God the command to preach, but first to offer his 14-months-old child as a sacrifice. He made his wife strangle the infant, claiming that the Aimighty had promised to resurrect the child on the third day. When Lassier was arrested he had been carrying the dead infant in his arms for two days.
