HARRY STAMM.

MONEY ACOUNTY
hirt of cheek, and tallowed hair,
fiddler sits in the bulrush chair,
a Moss' basket stranded there
Ou the brink of Father Nile,
seels the fiddle's slender neck,
is out the notes with thrum and cl
d times the tune with nod and back,
And thinks it a weary while.

All ready! Now he gives the call; Cries, "Honor to the ladies!" All The jolly tides of laughter fall And cbb in a happy smile.

D-O-W-N comes the bow on every string;
"First couple join right hands and swing!"
And light as any blue-bird's wing
"Swing once and a-half times round!"
Whirls Mary Martin, all in blueCalleo gown and stockings new,
And tinted eyes that tell you true,
Dance all to the dancing sound.

She filts about big Moses Brown, Who holds her hand to keep her down, And thinks her hair a golden crown, And his heart turns over once! His check with Mary's breath is wet, It gives a second somerset! He means to win the maiden yet. Alas for the awkward dunce!

"Your stoga boot has crushed my toe!
I'd rather dance with one-legged Joe,
You clumsy fellow!" "Pass below!"
And the first pair dance apart.
Then "Forward six!" sdvance, retreat,
Like midges gay in sunbeam street;
"Its Money Musk by merry feet
And the Money Musk by heart!

"Three-quarters round your partner swing!
Across the set!" The rafters ring,
The girls and boys have taken wing,
And have brought their roses out!
"Tis "Forward six!" With rustle grace,
And, rarer far than—"Swing to place!"
Than golden clouds of old point lace,
They bring the dance about.

Then clasping hands all—"Right and left! All swiftly weave the measure deft Across the woof in living weft, And the Money Musk is done! Oh, dancers of the rustling husk,

Good night, sweethearts, 'tis growing dusk, Good night for aye to Money Musk For the heavy march begun.

DR. T. HEMAN BREHMER, an eminent Ger DR. T. HEMAN BREHMER, an eminent Ger-man authority, says: "Consumption is always due to deficient nutrition of the lungs, caused by bad blood." At the Brompton Hospital for consumptives, London, Eng., a statement has been published that 52 per cent. of the patients of that institution have unsuspected kidney disorder. This explains why the proprietors of Warner's Safe Cure claim that they have re-ceived many testimonials which they have not ceived many testimonials which they have no published, because of the incredulity with which they would be received were it claimed that Warner's Safe Cure cures consumption. But the fact is that if your kidneys be cured and put in a healthy condition they expel the uric acid and poisonous waste matter, and pre-vent the irritation of the delicate substances of vent the irritation of the delicate substances of the lungs, thereby removing the cause. When the effect is removed the symptoms of kidney disease, which is called consumption disap-pears, and with it the irritation which caused

On the ocean, cares little about a storm. He is positively indifferent whether he is washed overboard or not. But, set right by a wineglass-ful or two of Hostetter's Stomach Bitters, he feels renewed interest in his personal safety. feels renewed interest in his personal safety. This fine corrective neutralizes in brackish water—often compulsorily drank on shipboard, to the grievous detriment of health—the pernicious impurities which give rise to disorders of the stomach, liver and bowels. To the mariner, the tourist, the western ploneer and miner, the Bitters is invaluable as a means of protection material and a state of the stomach, when its seeds are latent in air against maiaria, when its seeds are latent in air and water. To the effect of overwork, mental or manuel, it is a most reliable antidote, and to the debilitated and nervous, it affords great and speedily felt relief and vigor. m20to27

THE OREGON PACIFIC RAILROAD COMPANY is organized for the purpose of providing the State of Oregon with an urgently needed means of communication with other states and foreign countries by means of a rail-road from YAQUINA BAY on the Pacific Ocean, running through the central portion of the state to the eastern boundary thereof, a distance of about six hundred miles, where connection will be made with the railroad line already built to

that point, as well as with those under con-struction and projected. YAQUINA BAY, from its commanding geographical position and the scarcity of ports on the Oregon seaboard, is destined to be the future great scaport of Oregon, for, among others, the First-It is the ONLY PORT IN OREGON ON THE SEA connected by a railway with the great agricultural districts in the state. Second—THE OREGON PACIFIC RAIL-

ROAD crosses the four north and south lines of railroad in the Willamette valley, the great agricultural district of Oregon, and the Willa-mette River at Albany, gathering business to be delivered at the port of Yaquina. Third—The distance to the Pacific Ocean from while by the way of Portland and the Columbia river it is 20 miles to the sea.

Fourth—It is the terminus of a railroad traversing an agricultural country of ursur-passed fertility, producing millions of bushels of grain annually and large yields of other agri-

AGENTS FOR THIS SECTION.

world. The timber district has been preserved to this time by the absence of needed railroad facilities.

Fifth—The whole business of central, southern and eastern Oregon will be carried by the OERGON PACIFIC RAILROAD COMPANY to Yaquina, and distributed from that port, in about one-half the time consumed, and at about one-half the time consumed, and at about one-half the cost for transportation charged by any other existing or projected lines.

The business linmediately available to the OREGON PACIFIC RAILROAD, and the large business that will come to it, as its line is pushed further eastward, until it reaches Boise City, and there makes connection with the present transcontinental lines as well as others to be completed, demonstrates that Yaquina Bay is to be the future great scaport of Oregon.

The topography of the eastern portion of the state of Oregon, and the territory of Idaho, compels all roads crossing Oregon over its eastern border to enter the state at or near the point determined as its eastern terminus by the OREGON PACIFIC RAILROAD COMPANY.

With adequate ocean shipping facilities to handle the traffic there would now be available sufficient business to meet all the fixed charges.

From the heart of the Willamette Vailey to the sea the distance by the Oregon Pacific rairoad is but 72 miles, while the shortest line by other roads is 230 miles in length, which will enable the OREGON PACIFIC RAILROAD to hold the business against competition. As distance and time add to the cost of transportation it is simply an impossibility for competing lines to handle the business against competition. As distance and time add to the cost of transportation it is simply an impossibility for competing lines to handle the fushess at the same rate as is done by the OREGON PACIFIC RAILROAD to hold the business against competition. As distance and time add to the cost of transportation it is simply an impossibility for competing lines to handle the fushes of timber and coal will be taken trains going to the great fertil interference, the OREGON PACIFIC RAILROAD the remunerative local business, and
will enable it to do through business at prices
that will command its full share of that traffic.
The OREGON PACIFIC RAILROAD COMPANY will locate and own the towns along the
line of its road, and reap the benefits resulting
therefrom. The principal lands through which
the company's line runs and is located are
owned by the company and amount to over
nine hundred and fifty thousand acros. More
than three-quarters of these lands are open
rolling plains and immediately available for
tillage.

than three-quarters of these lands are open rolling plains and immediately available for rolling plains and immediately available for rolling plains and immediately available for rolling.

The tranchise confers exceptional advantages on the Company, and among them is the return to the Company, by the State, of all taxes levied and collected until 1900, on the lands and other properties of the company.

The Company has in operation 136 miles of continuous road, at the end of which it enters the timber tract above referred to; 36 miles are in the hands of the Construction Department, and 40 miles of roadbed through the Malheur Valley are ready for rails. The whole line will be completed by the autumn of 1800. Steel rails for completion of the road, together with fastenings, have been purchased.

The five millions of bonds now offered are the remainder of the total issue of fifteen millions provided for in the mortgage, and by an arrangement between the Railroad Company and Messrs. Barker Brothers & Co., of Philadelphia, the proceeds of these bonds are held by that firm to be paid to the Railroad Company only as the work of construction progresses.
