ADDRESS, THE INTELLIGENCER, LANCASTER, PA.

LANCASTER, PA., June 22, 1889.

Republican Statesmen.

The Republican statesmen of this hour seem to be a very fragile sort of ware and are being broken up by the average quality of the species; we do not remember to have ever before looked out upon the phalanx of Republican statesmen and found so many among them charged by their fellows with so many faults and credited with so little virtue.

Yet Mr. Platt, the Republican wheel horse of New York, is inspired by such emotion towards his president as to publish someone else's opinion that he is puffed up with self conceit.

And when we come down the line of these statesmen we find few places where we may stop in admiration of the figure. Blaine has gone all to pieces in the cabinet and hardly the skeleton of the statesman remains.

any compensation and will be held responsible for any epidemic which may be traced to the neglect of precautions that they might enforce, it is difficult to see why there should be any hesitancy in making appropriations to cover their legitimate expenses. The destruction of infected clothing and the use of disinfectants are things that must be done promptly on the appearance of the emergency, and the board can not stand waiting for such an event with its hands tied.

The Canadian fisheries question has been very quiet lately. The Canadians have three schooners to guard the fisheries, the Dream, the Critic and the Vigilant. Possibly the Dream is doing the work and they are not disposed to be critical or vigilant.

At last our government is testing the Maxim automatic gun, which fires itself after the first discharge, by the force of its own recoil. It can be packed full of cartridges, trained on an enemy, fired and then deserted, and will continue firing until its ammunition is exhausted.

What has been done to those federal officials charged with land grabbing in Oklahoma? It will not soon be forgotten that the United States actually used their position as authority to advance their own interests and safely defied the laws they were sworn to enforce.

The Pittsburg Dispatch fears that people may mix up the two Brices. Complications so damaging are likely to proceed from the confusion of Brice with Bryce that we deem it the duty of both of them to issue an explanatory card to the public defining their identity.

The green midge was announced from Indiana a few days ago, and now it makes its bow from Illinois. At least the state entomologist, Professor S. A. Forbes, reports "a minute, bluish green, oval, rather sluggish insect, found in such abundance on the heads and leaves of wheat and oats, from the Ohio river to Madison and Champagne counties, as to create great alarm in the Illinois wheat belt."

PERSONAL. CALVIN S. BURR has agreed to duplicate any amount which the Ohio Legislature may appropriate to Miami university.

J. W. B. BAUSMAN, Esq., left to-day to attend the commencement at Lafayette College and the quinquennial reunion of his class.

DR. J. A. TONNER, formerly of New York, but at present a resident of Paris, is the medical officer of the American commission to the French exhibition. He has recently received from the minister of public instruction permission to practise in France on the same footing as a native doctor graduated from a French school of medicine.

PROFESSOR HENRY DRAPER of New York, who was the discoverer of oxygen in the sun, and had such other notable work in science, was out at an early age in the winter of 1882-83. His widow, a daughter of the late Courtland Palmer, desires that the work in which her husband was specially interested be continued.

THE LITTLE HIGH CHAIR. It Touched Just the Right Spot. In the baby Auctioneer's Heart. From the Detroit Free Press.

There was an auction at one of the downtown auction houses recently. A pale, sad-faced woman, in a plain calico gown, stood in a corner, and with a vacant stare, gazed at a lot of plain and somewhat worn furniture. It had belonged to the pale woman, and was being sold to satisfy the mortgage on it.

One by one the articles were sold, the old bureau to one, the easy rocker to another and the bedstead to a third. Finally the auctioneer handed out a high chair. It was old and rickety, and as the auctioneer held it up everybody laughed—everybody excepting the pale-faced woman. A tear trickled down her cheek.

The auctioneer saw it, and somehow a lump seemed to come up in his throat and his eyes grew red. He remembered a little high chair at home, and how it had once filled his life with sunshine. It was empty now.

The baby laugh, the two little hands that were once held out to greet "papa" from that high chair were gone forever. He saw the pale-faced woman's piteous look and knew what it meant—knew that in her eye the little rickety high chair was more precious than if it had been made of gold and studded with diamonds.

In imagination the auctioneer saw the little chubby fist grasping the tin rattlebox and pounding the chair full of rickety—knew the little feet which had rubbed the paint off the legs; could hear the crowing and laughing in glee—and now the little high chair was gone. He knew there was an aching void in the pale-faced woman's heart; there was in his own.

excitement. "Now, Willie—let him alone George. Willie, he's real good, he won't see you. There, now Willie, do you love mamma?" "Papa, papa," said Willie, "No, papa gone now." "Now?" said Willie. "Yes, now, why can't you see what I want you to?" "To?" said Willie. "You're a naughty, naughty boy, you might as well come in, George; he isn't going to see it. 'Papa doesn't like naughty boys, mamma doesn't, and I don't know who does. Do you like naughty boys?' Yes, said Willie, with remarkable distinctness.

Facility in Art. From Blackwood's Magazine. Facility is often mistaken for genius, but it generally leads to mediocrity. How many a person I have known who, with great promise as a writer, has soon faltered and then stopped; while others, with no early facility, strengthened themselves by study and will, and pass far beyond them at the end. So many are satisfied with doing pretty well what they can do easily, and want the energy to do very well when it costs labor and struggle.

HOOD'S SARSAPARILLA.

IT COSTS LESS. On the question of real economy, Hood's Sarsaparilla is so far ahead of other preparations as to place them entirely out of the race as competitors. Here are facts in regard to this popular medicine, easily susceptible of conclusive proof.

1. Hood's Sarsaparilla Costs the Manufacturer More than any other competing preparation, because it is more highly concentrated and contains more real medicinal value.

2. It costs the Retail Druggist More, for the same reason—as can easily be learned by inquiry. Hence the desire of some retailers to sell their own preparations, which cost them less, and for which they get the same price, thus making more money. But

3. It costs the Consumer LESS than any other medicine, because of its greater concentration and strength and the quantity in each bottle, and because it is the only preparation of which can truly be said, "100 Doses the Dollar."

That the people appreciate this is shown by the fact that Hood's Sarsaparilla has the largest sale of any sarsaparilla or blood purifier. It possesses peculiar merit and effects wonderful cures.
