The Startling Speed Made by a Baltimore Inventor's Electric Motor.

On a two-mile circular track the startling speed of two miles a minute was on Wednesday morning maintained for about ten miles by the three-ton motor of the Electro Automatic Transit company of Baltimore City at the grounds at Laurel, Md. This speed equals three miles per minute on a straight track. David G. Weems, the inventor, conducted the experiments. The company will build at once a five-mile circular track on Long Island to demonstrate the practicability of the electric passenger system, and also the automatic system which was tried on Wednesday and is intended only for light express packages, mail matter and newspapers. Edison has pronounced it the greatest conception since the telegraph. The road will be reneed in by barbed wire, these to keep off cattle and being insulated the wires will be used for telephoning and signalling along the line. In the new passenger system the rails will have an upper and lower bearing—the rail of the future, so the Steelton iron people call it. On the wheel which runs on the upper bearing will be pressed from time to time by a lazy wheel to hold the cars to the track on curves at a high rate of speed.

THREE MILES A MINUTE.

A Mad Hen.
From the Boston Herald.
A resident of Marion street, Charlestown,

A resident of Marion street, Charlestown, is a great fancier of fowls. A day or two a 70, when he turned out his last brood to a 70, when he turned out his last brood to scratch for themselves, one of the chicks ran across a pickle bottle and squeezed itself through the neck with some difficulty and could not get out again. When morning came the old hen missed her chick and went in search of it. Having found it, and not being able to extricate it from its imprisonment, she flew around like mad, and finally became so violent that her owner came from his breakfast table to learn the cause. The old hen was then rolling the bottle over and over with her feet. In breaking the bottle the chicken's throat was badly cut. The wound was sewed up and the chick is now able to grub for itself, although the neck is still done up with a white rag.

MOTHERS READ!

Dr. D. McLane's CELEBRATED

Vermifuge for Worms MOTHERS READ.

Andrew Downing of Cranburg Township, Venanco County, gave his child one teaspoonful of the genuine Dr.4. McLame's Celebrated Venantinge, and she passed 17 worms. Next morning on repetition of the dose she passed 118 more. ing on repetition of the dose she passed 113 more.

Japhet C. Ailen, of Amboy, gave a dose of the genuine Dr. C. McLane's Celebrated Vermifuge to a child six years old, and it brought away 83 worms. He soon after gave another dose to the same child, which brought away 39 more, making 163 worms in about 12 hours.

Mrs. Quigby, No. 182 Essex St., New York, writes us that she had a child which had been unwell for better than two months. She procured a bottle of the genuine Dr. C. McLane's Vermifuge and administered it. The child passed a large quantity of worms, and in a few days was as hearty as ever it had been. Parents with such testimony before them should not hesitate when there is any reason to suspect worms, and lose no time in administering the genuine Dr. C. McLane's Vermifuge. It never haits and is persectly safe.

This is to certify that I was troubled with a tape worm for more than six months. I tried all the known remedies for this terrible affliction, but without being able to destroy it. I got a bottle of the genuine Dr. C. McLane's Vermifuge, prepared by Fleming Bros., Pittsburg, Pn., which I took according to directions; and the result was I discharged one large tape worm, measuring more than a yard, besides a number of small ones.

MRS: M. SCOTT.

THE ELASTIC SOLE BRAND.

L. Gansman& Bro. Ladies' Turn Shoes!

Of these admirable and very desirable shapes of shoes we have quite a number of different makes, medium grades and very fine. To tell of the merits of Turn Sole Shoes is not to tell anything that's new to Ladies who have worn them, but to those who have not and who are not familiar with them a description, perhaps, will not be out of place. The uppers are made of light and very pliable leathers. Have pump or slipper soles, extra light and flexible, yielding readily to every action of the feot. Are made without inner soles; there's but one thickness of leather only. This makes as handsome a sloe as one can wish for, and there are few shapes that give so much ease and comfort in wearing as do these. Made over correct shaped lasts, they fit the foot as a glove does the hand and are casily "broken in" the first time they are worn, with little hurt, however sensitive the foot. Each pair shows an amount of care in its finish not often equalied and a superior quality of shows an amount of care in its finish not often equalled, and a superior quality of workmanship deserving of praise. Tasteful in design, graceful in appearance, shoes that ladies may take pride in wearing. Fine, thin, light, specially adapted for fine dress and positive ease and comfort in wearing. Are not recom-mended for rough usage. The prices range from \$2.50 to \$6.00, with a special discount on some sizes that make them the cheapest fine shoesever sold in Lan-
