COLUMNIA, Jan. 10.—The grippe is spreading in the borough, and the number of people suffering with the disease is very large. In many of the stores one half of the clerks are confined to their homes or at work under difficulties. The disease has struck the schools and the number of pupils absent by sickness is astonishing. The schools have been so depleted by sickse that a temporary closing of the schools may be necessary. Only one teacher is reported sick, but the proportion of sick pupils has increased in some rooms from three to twenty-five. At the dispatcher's office in the east and west yards of the P. R. R. there are new men on duty, as four dispatchers are on the sick list.

#### FLEXIBLE SEWED SHOES

Parents cannot be too careful in choosing proper shapes in Misses and Children's Foot-wear. No attempt should be made to limit the length or the width of shoes required for the natural development of the growing foot—the bone, the muscles, the ligaments. Nature never intended that it should be confined within prescribed limits, to the end that smallness may be attained—an erratic, if not foolish, fashionable whim. Ease, comfort and graceful carriage come not with such practice; corns, bunions and enlarged joints often follow as a result. Give the growing foot the room it requires, fit it with shoes fashioned in accord with its shape, so that at maturity it will not become a source of much hurt and discomfort Here are a variety of makes—a variety of shapes—from which it is easy to find shoes to fit perfectly—to fit the foot as Nature intended it should be—attractive looking, too. The prices suggest reasonableness. From best
