MILLIONS OF HORSES.

Increase of Horses Beyond the Increase of Population.

be February report of the department grisulture, which relates to numbers I values of farm animals, shows an increase of population.

be aggregate numbers exceed fourteen flour. In the cotton state the use of the population in the Contral states in improvement in the Central states in blood of Percherons, Cleveland bays is English shires, continues active. Horse the state of the Rocky Mountains are inviting the stock of that region. The increase of numbers in recent years, while one were tending higher, has caused an in the tide of values, which are nearly reywhere lower than in January. Mules we increased, and are estimated about o and a third millions, held at alightly rer prices than last year. Milch cows increase is general, being shared quite erally this year by the East and South, icea, in sympathy with values of other tile, show a slight decline as compared the those of last year.

The numbers of other cattle continue to trease, while the prices have fallen in still year ratio during the year.

The numbers as estimated, exceed thirtyfmillions, an increase of between ten d eleven millions since 1880, which is year than the ratio of numbers to population.

An increase of about four per cant. In

An increase of about four per cent. in numbers of sheep is indicated. The lowest average price was reported in 1886. Improvement has been gradual since, with some acceleration during the past year, as a result of greater confidence of growers in holding the American market for wool. The increase in swine has been in proportion to advance in population. The average price has declined, as is the case of all other kinds of farm animals, sheep alone excepted.
