NYE AS A COWBOY. It is a good story, and designed, as I judge, to illustrate in a forcible manner the extreme rarity of the sir more than the extreme rarity of the story itself. The flore of Wyoming is diversified and beautiful, though on the plains it is almost odoriess. Several kinds of cactus are found, either of which, when in full bloom, are very beautiful. The Turk's head cactus is about the size of a base ball, and is botter fixed for protecting itself than any other plant. It know of except the electric plant. It has a purple blosson about the size of a Canadian quarter or an English bob. There is a cactus also which locks like a green waffle, set up on edge. wrapped in an apron, the daylight foldat her, with dry eyes and disordered brain, walking the streets, with Jay Gould and Russell Sage carrying the poor little starved body of her dead baby wrapped in a callco

rag. For eight years I lived in Wyoming territory, but I never heard there of a case like this. Possibly we wore our trousers in our boots then—the men, I mean—and we used navy tobacco perhaps to excess, but we drew the line at starving little children to death because their mothers couldn't pay the rent by making shirts at seventeen cents a dozen.

"WHAT YER GOIN' TO DO!"

Iknow that in early days Wyoming had none or de rates but she has outgrown them a good deal now. Trecall, especially, one of her statesmen. We had oue mem-selected from Coe and Carter's tie camp, the had never held any office of truss or profit as the gift of the people before, and o all was new to him. I will not give his mae because he is in better condition physically than I an at present. He was a plain, self made man who had risen to be form and o all was new to him. I will not give his name because he is in better condition physically than I an at present. He was a plain, self made man who had risen to be montains, and by not asying anything at leacept to issue his orders, and the back one as a reserved and non-committee for the two there members on that county and elected.

We went with the others members of the states who had tises how that the there members. He was a reserved and non-committee for the states who had the same, but it leaked out afters, the did the same, but it leaked out atters of the back his truck to Washington, think in the others members. The was a black form were well till be asked out afters, the had bonght a ticket and has they all got off at Cheysene, the his whicksers were quite long, the and as they all got off at the state, which are to be got along very well till be the same, but it leaked out atters and has they all got off at the state. The man are been investing the time setting his truck to the the state, the had bonght a ticket and when the state and has they all got off at the state, the had bonght at the back got back form Washington, think in the others members. The shale do the state is a state is a state the state, the shale bong his truck to the state to the state. The shale do the state is a state the state to the state. people of Wyoming in irrigation alone, and, of course, this is not included in the assessed valuation. I have never regarded agriculture on the Laramie plains as a success, though in other parts of the territory, where the meason is longer, it may be better. Few crops can grow successfully at a height of over 7,000 feet on the coarse soil of this great plateau without irrigation, or even with it, for winter always lingers in the h of spring there until it occasions a great deal of talk, and so the summer is very brief indeed. The Indian summer, how-ever, now that the Indian has been knocked out of it, is more delightful than anywhere is in the world. For one who has tried is build himself up by means of dumb bells and sever gas, this dry, exhilarating, champagney air is better than a summer at Saratoga at 80 per day. I cannot say too much for the air of Colorado and Wyoming or the sconery. I knew a clergyman who told me that he had live I there for a year on the magnificent scenery, one domain was well brought up and from his youth was always taught to tall things just as there occurred. pocurred.

ernor of Wyoming and was not imported for that purpose. He governs the territory forencous and attends to a large and fourishing business in the afternoon. Wyoming is at present on friendly terms with the United States. Tenale suffrage has its home in Wyo-ming, and people who write in a prolific manner egainst it, without knowing any-thing about it, would do well to go there and find out something about it. There are thirty species of mammals in Wyoming, outside of the Legislature alone. The prairie dog is gradually becoming or find out something about it. There are thirty species of mammals in wyoming, outside of the Legislature alone. The prairie dog is gradually becoming of people who know more. Washington frving, who was a good writer and used good grammar all the time, in drawing off pieces for the paper, made a fluke on the prairie dog I think. You can see in a moment, if you are any judge of physi-ognony, that a prairie dog does not know anything. His thought waves all originate in the pit of his stomach, and though of a social nature, he uses no judgment in selecting his associates. He is a through of the earth that he gives jies attention to print han any animal that moves in our set. His peli is worthlees; his tall is a humiliating failure and his whole life its a size. He teaches no lesson of industry, enconomy on arals, and houst borings with it no appreciable shock.

If you intend to travel either for pleasure or profit protect yourself against the changes of diet and water, by having with you Lazador, the great regulator and using it in time to pre-vent the disorders usually resulting from such changes.

THE Cliffleren's Health must not be neglected. Colds in the head and snuffles bring on catarrh and lung affections. Ely's CreaniBalm cures at once, it is perfectly safe and is easily applied into the nostrik. It also cures catarrh, the worst cases yielding to it. feb27-2wd
