HANDSEWED SHOES

-FOR-Men's Wear!

Pashioned in accord with good com-mon sense principal, in three styles, Button, Lace and Congress, with plain loss or tipped.

A shoe much admired here comes from one of the leading American makers of Fine Shoes. Are shaped over what is termed "The Boxton Last," a style modified from the "Common Sense" last, and are popular with middle aged and active business men. They are reasonably broad at the bottoms. The spread of the uppers incident to breaking in never project over the edges of the soles to render the shoe ill-looking. The leather in the uppers is a fine grade of calfikin, well filled, lined and trimmed. The bottom stock is of excellent tannage, easonably stout for everyday wear. They are hand-wit and hand-fini hed, a class of shoemaking known as custom quality. Are made with extra room for the prominent joints of the foot, giving to them perfect reedom of action with perfect comfort. Very genteel looking shoes, difficult to match anywhere so moderate in cost as you'll find these. Ask to see them.

Another Line of Fipe Shoes for Men's Wear worthy of mention are here—an English toe shape—the fashionable young man's favorite. A superior grade of stock is used throughout in the making Are handsomely tipped, thoroughly well made and highly finished. A fault—that is one of their strongest features. Examination solicited.

Ideal Shapes in Fine Patent Leather Grades—strikingly handsome and mod-erate priced. Nothing like them in Lancaster. **SHAUB & BURNS**
