ONLY A SONG.

  Happy of heart and gay,
  Driving the cows from the pesture

  Dusty his garments and torn,
  Rested an aged pligrim,
  Weary of travel and worn;
  Mourning o'er shattered ideals,
  Beautiful days that had fied,
  Friends that were parted forever,
  Oarlands all withered and dead.

Efficacy of Vaccination.

From the Newcastle, Eng., Chronicle.

What have anti-vaccinators to say to this? Surgeon Parke, previous to the setting out of Stanley's expedition on the Congo, vaccinated every native in his train. The result was that those members of the Airican tribes who joined the expedition en route, and who were not vaccinated, suffered greatly from smallpox, while those inoculated escaped. The Preventive of a Terrible Disease

The Preventive of a Terrible Disease. No disorders, excepting the most deadly forms of lung disease, involve such a tremendous destruction of organic tissue as those which fasten upon the kidneys. Such maiadies when they become chronic—and none are so liable to assume that phrase—completely wreck the system. To prevent this terrible disease, recourse should be had, upon the first manifestation of trouble, to Hostetter's Stomach Bitters, which experience has proved to be highly effective as a means of imparting tone and regularity to the organs of urination, as well as to the liver, stomach and bowels. Another beneficial result of this medicine, naturally consequent upon its diuretic action, is the elimination from the blood of impurities which beget rheumatism, neuralgia, gout, drows, and other maiadies. By increasing the activity of the kidneys, it augments the depurative efficiency of these organs, which are most important outlets for the escape of such impurities. ju3-10

This is to certify that I have been subject at times to severe headache; sometimes the pain would be so severe I could rest neither day or night. Hearing of the genuine Dr. C. McLane's Liver Pills, prepared by Fieming Bros. Pits-burg, Pa., I sent and got a box, of which I took two pills on going to bed, for two nights. They relieved me entirely. Some time has now elapsed and I have had no more trouble from sick headache.

Scrofula in Children.

"In the early part of 1887 scrofula appeared on the head of my little grandchild, then only on the head of my little grandentid, then only is months old. Shortly after breaking out it spread rapidly all over her body. The scabs on the sores would peal off on the slightest touch, and the odor that would arise would make the atmosphere of the room sickening and unbearable. The disease next attacked the eyes and we feared she would lose her sight. Eminent physicians of the country were consulted, but could do nothing to relieve the little insocent, and gave it as their opinion, that the case was hopeless and impossible to save the child's syesight. It was then that we decided to try Swift's Specific (S. S. S.) That medicine at once made a speedy and complete cure. For more than a year past she has been as healthy as any child in the land."
