"Now and Then."-This is the title of an excellent novel, from the pen of the author of "Ter Thousand a year," for sale at the Book Store of J GISH & Co. Its style differs from that usually employed by the author, but we may safely say, that we have seldom read a work of more thrilling interest. The design of the author is to represent, in the form of attractive romance, the uncertainty of human evidence, and the dangers attending the infliction of the Death Penalty. Thus, whilst he gratifies the taste of the readers of fiction, he at the same time furnishes material for the moralist and the Legislator. We recommend this work to the public, and more especially to the members of the

On the 31st ult., Mr. AARON TRAGER, in the 33d year of his age.

The deceased was a much respected citizen o Litiz, and highly esteemed by all who knew him. In the community in which he resided, he had many warm and true friends; as a husband and father, he was kind and affectionate; and, although moving in the sphere of an humble citizen, his course in this life is worthy of the emulation of the best of us. For nearly a year he had been suffering with a painful disease, which he bore with the greatest fortitude and philosophy. Mr. T. was well kinewa its this city, and was a son-in-law of Mathias Zahm, Esq. w. F. [fbb 1-1-2t] ther, he was kind and affectionate; and, although

REVIEW FOR THE WEEK ENDING Feb. 4, 1848.

FLOUR.—Howard Street Flour—There were sales of about 1000 bbls. at \$5,75, the market lawing been very duft at that rate. The English steamer's advices depressed the market and prices and sent forth for the purpose of reconquering the whole of Texas. Intelligent Mexicans laughed at the discussions in the Whig papers about the boundary, although they furnished good material for proclamations to be sent among the ignorant portion of the Mexican people.

per bbl. Corn Meal—There are sellers of Baltimore bbls. at \$3.

GRAIN.—Wheat—There were sales of good to prime reds, afloat, at 130a133 cents; of Virginia white at 135a138 cents; and of reds by wagons at 125a130 cts. To-day prices are lower, because of the Acadia's advices; the sales of lots of reds, by wagons, are at 120a123 cents. Two lots of red, afloat, were sold to-day—one, of inferior quality, at 120 cents, and the other, very good, at 128 cents. We think that a quotation of 120a126 cents will indicate the value of good to prime, afloat, to-day. There was a sale of 2,000 bushels very prime fiamily flour white Wheat to-day at 140 cts. Corn—The market opened on Monday at 55a60 cents for white, and 60a61 cents for yellow. The sales of white are at 50 cents; and 52 cents are offered for good yellow—53 asked. Rye—Last sales at 73a75 cts. Oats—We quote the range of qualities, from

good yellow—53 asked. Ryo—Last sales at 73a75 cts. Oats—We quote the range of qualities, from infurior Md. to prime Virginia, at 37a43 cents. Cloverseed—Considerable sales of prime seed have been made at \$4,25; an occasional parcel of choice brings 121, conts more. We quote the range at \$4.8437. IRON.—The market is unsettled. We note sales of Baltimore Forge Pig at \$32,50 per ton. A sale of 100 tons Scotch Pig, on terms not transpired. WHISKEY.—Prices have been steady throughout the week, with sales of linds, at 25 cents, and of bbls, at 26 cents, and we quote those rates to-day.

Heconterg's Patent Air Tight Parlor Coal Stove A new, beautifel convenient, and fuel saving A. Parloy Coal Store is now for the first time introduced to the public.

The proprierors leef confident, that upon an examination of those in operation, they will be pronounced to be the best, most unful and economical stores well invenied. nounceurs or the cest, most using a war community stores yet invented.

With a comparatively small quantity of fuel, this stove will radiate a greater quantity of heat, (not dry for parched, as is generally the case in the ordinary coal stoves,) than any other stove now in use. CERTIFICATES.

I have had one of Hedenberg's nir-tight coastoves in use since the middle of last October—am entirely satisfied with it—and helieve it to be superior to any description of stove hitherto introduced. I requires much less coal than a common radiator stove of the same size—produces no annoying radiant heat—and with ordinary care there can be accepted to the furniture. radiant heat—and with ordinary care there can be neither dirt on the carpet nor dust on the furniture. There is no difficulty in managing it, or in keeping up the fire over hight, at small cost of fuel, by properly closing the checks. It have kept up the fire in mine continuously for a period of fuel, by properly closing the checks. It have kept up the fire in mine continuously for a period of fuel weeks. Before purchasing the one I have, I carefully examined a large variety of specimens from other inventors and makers, exhibited at the Fair of the American fusitive; in New York, and selected it as being, from its construction, most likely to prove a superior article. A protracted frial of it, in actual use, has convinced me that I did not mis estimate its merits; and I am fully persuaded that, as regards convenience, cleanliness, and economy conbined, it will not easily be superseded.

Namerican properties in contract the first production of the province of the superseded. 8 121

We have in operation in our counting-room one of "liedenberg's patent air-tight coal stoyes," which, by actual and constact use, for more than two months, we give the decided preference to any stove with which we are acquainted. The superiority of this stove over every other kind with which we have any knowledge, is that it dispenses a pleasant and healthy heat throughout the room, equally—consumes very little; coal—is easily kept in order—and there is an entire absence of dust. We have some knowledge of almost every kind of in order—and there is an entire absence of dust. We have some knowledge of almost every kind of stove hereofore introduced of the public, but confidently give this the preference.

York, Feb. 10, 1847 P. A. & S. SMALL.

I hereby certify that I have used " Hedenberg's I hereby certify that I have used "Hedenberg's patent art-right coal stove." for two monils past, and that I am better satisfied with it than any other coal stove I ever used. I heat too large rooms by it, a parlor and the chamber above, and heat them both at the same time, and with less consumption of fuel than is used in the ordinary coal stove to warm a single room. The heat is pleasanter than that of the forner kinds of local stoves, and is sufficient from a small fire to, warm the largest apartment.

York, January, 1847. Pariment. York, January, 1847.

I have this winter used one of "Hedenberg's patent air-right coal stoves," with much sutisfaction, warming with it, comfortably, two rooms (one above the other,) without consuming more fuel one above the other,) without dousuming more fuel than was before required to warm one of those rooms. In the convenience with which it is managed, and the cleanliness of it, it exceeds every other coal stove I have yet used; and the heat of it is more equal and agreeable, possessing less of that unpleasant drynness which is generally experienced from sione coal frost. The exceedened of this stove has induced me to order another one the kind, to be used in the place of another coal stove which before had been considered a very good one.

York, February 4, 1847.

For the purpose of exhibiting this stove to the chizons of Lancaster county, one has been kut up at Mr. Christian Kieffer's, in East King street, and another at the office of the "Intelligencer & Journal," where the public are invited to call and axaming them in operation. examine them in operation,
