designation, approbia medicorum—the disgrace of physicians—to this call of diseases; and that there are stages in their progress, which having once been reached, recovery is doubtial. Still no one should despair. The writings of physicians, who have given to these affections particular attention, abound with many recorded cases of recovery when the patient had reached a seeming hoplease stage of the disease; and there is at this time, a remedy prepared in Philadelphia which has met with the most triumphant and cheering success in the most obstinate forms of Throat and Pulmonary Diseases —so as to have obtained the sanction and employ-ment in the practice of many physicians. Allusion is had to Thompson's Compound Syrup of Tar and Wood Naptha—the proparation of one, who, having given to diseases of the Lungs and their means of cure, the most careful and thorough attention, presented to the public this great remedy. The soothing and curative power of TAR hus often been observed in severe coughs, and Con sumption. But in the above preparation, beside some of our most valuable vegetable pectorals there is conjoined with it the Wood Naptha, a med-icine but lately introduced, but which has been employed with most satisfactory results in England, in Pulmonary Consumption, especially of a Tuber-culous form.
