The Women of the Revolution. Early in the war, the inhabitants on the frontier of Burke county, North Carolina, being apprehensive of an attack by the Indians, it was determined to seek protection in a fort, in a more densely peopled neighborhood in an interior settlement. A party of soldiers was sent to protect them on their retreat. The families assembled, the line of march was taken towards their place of destination and they proceeded ammolested—the soldiers marching in a hollow square with the refuge families in the centre. The Indians, who had watched the movesive of an attack by the Indians, it was determined ment laid a plan for their destruction. The road to be travelled lay through a dense forest in the fork of a river where the Indians concealed themselves and waited till the travellers were in the desired spot. Suddenly the war-whoop sounded in front and on either side; a large body of painted warriors rushed in filling the gap by which the centre. The Indians, who had watched the movewarriors rushed in filling the gap by which the whites had entered. An appalling crash of fire arms followed. The soldiers, however, were pre \$\ \text{S2326 for Anthracite, and \$\text{\$23a27 for Charcoal}} \] behind them and began to ply the deadly rifle; the others prostrated themselves upon the earth among the tall grass, and crawled to trees. The at 22a221 cents per gallon. tamilies screened themselves as best they could. The onset was long and hercely urged; ever and

anon amid the din and smoke the warriors would cush tomahawk in hand towards the centre but they were repulsed by the cool intrepidity of the backwoods riflemen. Still they fought on determined on the destruction of the victims who offered such desperate resistance. All at once an appalling sound greeted the ears of the women and children in the centre; it was a cry from their defendersa ery for powder! "Our powder is given ont," they exclaimed. Have you any ! Bring as some or we can fight no longer!

A woman of the party had a good supply. She spread her apron on the ground, ponred the powder n it, and going round to each soldier as they stood behind the trees, bade each who needed powder put down his hat, and poured a quantity into it. Thus she went round the line of defence, till her whole stock, and all she could obtain from others, was distributed. At last the savages gave way, and, pressed by the foes, were driven off the ground.

The victorious whites returned to those for whose safety they had ventured in the wilderness. Inqui ries were made as to who had been killed; and one us the powder? I want to see her!"

" Yes!-yes!-let us see her!" responded another and another; "without her we should all have been lost!" The soldiers ran about among the women and children looking for her and making inquiries. Directly came in others from the pursuit, one of whom observing the commotion, asked the cause, and was told. "You are looking in the wrong place," he re

"Is she killed? Ah, we are afraid of that exclaimed many voices.

When the Indians ran off, she was on her knees in-prayer at the root of yonder tree, and there left her." There was a simultaneous rush to the tree-and there, to their great joy, they found the voman safe and still on her knees in prayer. Thinking not of herself, she received their applause without manifesting any other feeling than grati-

of the Constitution, in their wisdom, kept from the people the right to choose directly the President and Vice President, and interposed between a body called electors. These electors were voted for o the 7th of Nov., and it is they who choose our national Executive officers. The mode of chosing is not so generally understood as might be supposed would be the case in a country where politics is such a matter of general concern. The Electors assemble in the capitals of their respective States on the first Wednesday in December, and vote for the can didate of their choice. Having recorded their vote copies of it are made, and forwarded to Washing ton by special messenger before the first Wednesday in January. The votes of all the States ore opened on the second Wednesday of February in the preence of both Houses of Congress, and the persons having a majority of the whole number of electors are declared to be the President and Vice Presiden elect. To many persons this appears to be around about way of choosing rulers, and the question frequently discussed whether the people onght no to elect directly these important officers, the highes number of the popular votes in the Union dete mining the election.

What time establishes and consecrates, what experience adopt and confirms, what all men in all places unite i saying is good and valuable, is so, no doubt. A popularity of this sort fixes in society its roots so deep and strong, that time cannot destroy it. The success which has attended this medicine for sev ral years past, has overcome the prejudices of all respectable and sensible men, and the article has respectative and among the first class of discoveries and blessings of the age; and when resorted to in season, eradicates the diseases for which it is re-

Delay is Dangerous. TF it is a truth that punctuality is the life of business, it is not less the case that delay is dangerous, and is oftentimes productive of run.
