particular cases that render still too applicable the designation, approbia medicorum—the disgrace of physicians—to this call of diseases; and that there are stages in their progress, which having once been reached, recovery is doubtful. Still no one should despair. The writings of physicians, who have given to these affections particular attention, abound with many recorded cases of recovery when the patient had reached a seeming hopeless stage of the disease; and there is at this time, a remedy prepared in Philadelphia which has met with the most triumphant and cheering success in the most obstinate forms of Throat and Pulmonary Diseases—so as to have obtained the sanction and employ— -so as to have obtained the sanction and employ ment in the practice of many physicians.

Dr. Townsend—I take pleasure in saying for the benefit of those whom it may concern, that my daughter, two years and six months old, was afflicted with general debility and loss of speech. She was given up as past recovery by our family physician; but fortunately I was recommended to try your Sarsaparilla. Before having used one bottle she recovered her speech and was enabled to walk alone, to the astonishment of all who were acquainted with the circumstance. She is now quite well and in much better health than she has been for 18 months past.
