#### Highly Important from the Gold Region---Letters to the Government. Washington, Jan. 21.

The Union of this morning publishes letters from Lieut. Larkin, received at the State Department, and dated Monterey, Nov. 16th. He states that the gold is increasing in size and quality daily Lieut Larkin further states that he has examined several pieces of the precious metal weighing from one to two pounds each, and has heard of several lumps being found weighing sixteen pounds each, and of one lump that weighed twenty five pounds. Many men who were, comparatively speaking, beglast June, are now worth twenty thousand dollars, accumulated by digging and trading with the Indians. One hundred dollars is considered an ordinary day's work.
From July to October, nearly one half of the

diggers were sick with fevers, though there had not been many deaths. The ludians trade an ounce of gold dust for a common calico shirt. Others ell it at ten dollars per ounce for specie. The Gold region is known to extend three hundred miles, and the probability is that it extends to the distance of one thousand miles.

distance of one thousand miles.

A letter from Commodore Jones states that things are in a deplorable condition. Anarchy prevails. Even his officers are disposed to desert for the gold regions. Several petty officers and seamen have already deserted his ship. He says that the Indians are selling gold dust at fifty cents per ounce.

Singular Escape from Slavery. William and Ellen Craft, man and wife, lived with different masters in the State of Georgia.— Ellen is so near white, that she can pass without suspicion for a white woman. Her husband is much darker. He is a mechanic, and by working nights and Sundays, he laid up money enough to bring himself and his wife out of slavery. Their plan was without precedent; and though novel, was the means of getting them their freedom. Ellen dressed in man's clothing, and passed as the master, while her husband passed as the servant. In this way they travelled from Georgia to Philadelphiar On their journey, they put up at the best hotels where they stopped. Neither of them can read or write. And Ellen, knowing that she would be called upon to write her name at the hotels, &c., tied her right hand up, as though it was lame, which proved of some service to her, as she was called upon several times at hotels to "register" her

CALIFORNIA AND CALCUTTA.—The London Times in speaking of the lack of public spirit in Calcutta and Bombay, draws the following parallel:

California was scarcely known a year back; but unless public opinion shall soon make itself heard, it will scarcely appear too much to predict that its chief port on the Pacific will be opened up by a line of railway from New York, and with a steamfleet to Canton, before the first locomotive will have started from either of the gigantic and now comparatively ancient cities of Calcutta or Bontian.

Gold vs. Honon.—It is not exactly correct, as has been stated, that Mr. Ten Eyck, U. S. Commissioner at the Sandwich Islands, has not been removed. It seems he has resigned and hurried off to the California "gold diggings," preferring his

Principal Office, 162 Nassau st., N. Y OLD DR. JACOB TOWNSEND, THE ORIGINAL DISCOVERER OF THE Genuine Townsend Sarsaparilla.

OLD DR. TOWNSEND is now about 70 years of age, and has long been known as the author and discoverer of the Genuine Original Townsend Sarsapavilla. Being poor, he was compelled to limit its manufacture, by which means it has been kept out of market, and the sales circumscribed to those only who had proved its worth, and known its value. It had reached the ears of many, nevertheless, as those persons who had been healed of sore diseases, and saved from death, proclaimed its excellence and wonderful HEALING POWER. Knowing, many years ago, that he had, by his its excellence and wonderful HEALING POWER. Knowing, many years ago, that he had, by his skill, science and experience, devised an article which would be of incalculable advantage to mankind when the means would be furnished to bring it into universal notice, when its inestimable virtues would be known and appreciated. This time has come, the means are supplied; this Grand and Unequalled Preparation is manufactured on the lar-

come, the means are supplied; this Grand and Unequalled Preparation is manufactured on the largest scale, and is called for throughout the length and breadth of the land, especially as it is found incapable of degeneration or deterioration.

Unlike young S. P. Townsend's, it improves with age, and never changes, but for the better; because it is prepared on scientific principles by a scientific man. The highest knowledge of Chemistry, and the latest discoveries of the art, have all been brought into requisition in the manufacture of the old Dr's Sarsaparilla. The Sarsaparilla Root, is well known to medical men contains many medical properties and some properties which are inert or useless, and others which it retained in preparing it for use, produce fermentation and acid, which is injurious to the system. Some of the properties of Sarsaparilla are so volatile, that they entirely evaporate and are lost in the preparation, if they are not preserved by a scientific progress, known only to those experienced in its manufacture. Moreover, these volatile principles, which fly off in vapor, or as an exhalation, under heat, are the very essential medical properties of the root, which give to it all its value.
