## Get the Best.

LL young persons should have a standard DICTIONARY, TA DICTIONARY, at their elbows. And while you are about it, get the best; that Dictionary is NOAH WEBSTER'S.

The great work, unabridged. If you are too poor, save the amount from off your back, to put it into your head.—Phrenological Juornal.

Dr. Webster's great work is the best Dictionary of the English language.—Londer Chemister. Dr. Webster's great work is the best Dictionary of the English language.—London Chronicle.

This volume must find its way into all our public and good private libraries, for it provides the English student with a mass of the most valuable information, which he would in vain seek for elsewhere.—London Literary Gazette.

Containing three times the amount of matter of any other English Dictionary compiled in this country, or any abridgment of this work.

THIS is a safety Bridle Bit invented and secured by Mr. Henry Seitz, of Marietta, Pa. This Bit is expected to supersede eventually all others, either for riding or driving, combining, as it does, the common snaffle, so arranged with the pulley, as to give any person perfect power over the most vicious or frightened horse. It obviates the objections made to the severe bits now in use, which vicious or frightened norse. It coviates the cojec-tions made to the severe bits now in use, which from their painful action, often make a spirited horse rear, kick and try to run away. This bit is pleasant in its action on the mouth, causing no pain whatever, and has the r quisite power when wanted —no horse having been found able to resist it.

The operation is as follows: The rein is hooked firmly to the saddle at A, passing through the loop C, into the bit over the roller at B, and securing it C, into the bit over the roller at B, and securing it fast to the ring D, which frevents it from drawing back and forms the check rein now in use, and to which the driving reins are buckled and pass back to the driver: For horseback, the loops and rings are dispensed with, the rein being continuous, forming two reins, one of which is thrown over the saddle horn or strapped to the pummel, and the other to the rider's hand—both reins can pass thro' the rings of a martingale. For ladies it is particularly recommended on account of its safety and power, as a horse is by no means able to throw his head sufficiently low to kick. For double harness the reins should pass from the 1st horse over to the bit of the 2nd, through the bit and back to the the saddle piece at G, of the 1st horse-platting the reins as they cross each other between the orses.

Horses have been successfully driven with this

bit, that were set aside as beyond management as harness horses with ordinary severe bits, from the harness horses with ordinary severe bits, from the habit or in-ariable practice of running away in spite of the utmost endeavors of their driver—now they are good and serviceable horses.

The Bits are manufactured only by HALDEMAN & SEITZ, of Marietta, Pa., who will attend to all orders concerning the sale of the same. The patent right of this invention has been secured, and ling fast into use.

The undersigned is the Agent for Lancaster county, of the above Bit, and feels warranted in recommending it as a valuable invention. He would refer to the following persons, who have it in use: John Forry, Manor; Henry Spiehlman, Jr., Strasburg; Jucob Stahl, Dr. J. Cushman, Marietta. There is no necessity to multiply references, as the There is no necessity to multiply references, as the Bit recommends itself, upon inspection. For sale, wholesale and retail, at manufacturers' prices.

THEREFORE, the Farmers ought to look to their interests by examining the merits and improvements in Montgomery's very justly CELEBRATED FANNING MILLS.
The undersigned continue to manufacture at their Shop, in Chesnut Street, a few doors West of the Museum, and near Whitehill's Foundry, in the city of Lancaster, Fanning Mills greatly superior to any ever before offered to the public, embracing all THEIR very latest improvements, among which are the Double Screen and the better application of the wind, so as to produce the most desirable

effect in cleaning grain of all kinds. Experienc of many years, great practical knowledge, and strict personal application, enables us to say our Fans are superior in every particular to any hereand all work undergoes our careful personal inspec

and all work undergoes our careful personal inspection before leaving our shop.

In addition to our important improvements, our fans are celebrated for their ease in working, and the great expedition with which they clean all kinds of grain, besides their superior finish warrant us in saying they surpass all other mills manufactured, and we confidently warrant them to give entire sat isfaction upon trial.

"CORN PLOUGH."

We also call the especial attention of farmers, to Krouser's Patent Pennsylvania Buggy Corn PLOUGH, which are admitted to surpass all now in use. Farmers wishing a first rate article of this PLOUGH, which are admitted to surpass all now in use. Farmers wishing a first rate article of this kind, will do well to call and examine this, before purchasing elsewhere.

The loveliest season of the rolling year,—
The Earth shakes off old Winter's icy chain, And vegetation springs to life again; Sweet-scented flowers shed fragrance on the air, And fruitful orchards buds of And fruitful orchards buds of promise bear;
The feathered songsters carol in the grove,
And swell the note of joyousness and love,
Snow, hail and frost are now no longer seen,—
But all the earth is clothed in freshest green.
Man, too, should follow nature's noble rule,
And clothe himsel! more comfortably cool,

PPEARS at first sight so insurmountable a barrier to the intercourse of nations as the ocean —but Science has converted it into the most expeditious means by which they may supply their mutual wants. Nothing is so violent as steam, or so destructive as fire—yet art has made them subservient to the necessities, the comforts, and even the elegancies of life. What so hard, so cold, and so insensible as Marble? yet the Sculptor can warm it into life and bid it express the tenderest emotions. How variable is color? how swift is light? and how empty is shade?—but the pencil of a Raphael can give these fleeting things both a body and a soul, and can confer upon them an imperishable vigor,—a beauty that increases with age, and and a soul, and can conter upon them an imperienable vigor,—a beauty that increases with age, and which must continue to captivate generations. How is it that Erben, at the Sign of the Striped Coat can have his Clothing made and trimmed so much better than the other Lancaster tailors and yet sell far cheaper than the rest of the trade! His yet sell far cheaper than the rest of the trade! His clothing never rips, it is made of good material, and the fit of his garments can't be excelled, and the price this Spring is almost nothing. How can he afford to sell so low, how does he do it? These are questions often asked, and no doubt it seems wonderful, especially to the high price tailors,—but, impossible as it may appear, he has nevertheless exceeded in sudviving the contract Clothica than. less succeeded in producing good Clothing cheaper than ever before known in Lancaster, in fact quite a revolution in prices; and so it should be. The public good demands still farther reform. No more dull plodding in the beaten track.
