ing tomb, are the ashes of "MARTHA An anecdote is told in the papers of a very poor voman who found a silver dollar. It was a lucky vent but it placed her in a dilemma. She had een cedars surround the tomb. It is a retired icturesque spot; and is the Mecca of many a pilhardly a stitch of clothing, and the gnawings of hunger were also demanding attention. "What shall I do?" she mentally inquired; "shall I pay at-tention to my back or stomach?" The question was a poser; but after musing a minute she said, boughs tossed through the grated doors upon the sacred urn within. It is related that when La I'll toss for it, heads for the back, tails for the stomach." Up went the dollar and down it came head uppermost. "I'll give the stomach another chance," said she. "That was not a fair toss," she exclaimed, as the head came uppermost the second ime; "the stomach shall have fair play." Up went the dollar the third time, and then the eagle came uppermost. "Ah, ah !" cried the hungr woman, while her eyes sparkled with delight, " knew the stomach would win it."

Importance of Trifles.

Everything in nature is a series of concatenation equently the most triffing observation leads to the most important discoveries. A little piece of iron that turns towards the north, guides fleets through the trackless deserts of the ocean, and the reed o an unknown species cast upon the beach of Azores, led "Christopher Columbus" to imagine the exis-tence of the American world. The movement of the tea-kettle lid, by the effects of steam, led to ost important discoveries of this wonder-working principle, which seems likely to become the great eviathan of modern science, though fresh manifestation of its applicability tend to confirm the so frequently formed opinion, that steam is only yet its infancy.
