RICHARD M. YOUNG, Commissioner. The "mineral lands" included in the foregoing proclamation are chiefly situated between Lake Superior and Montreal River, and on Isle Royale, in the northern peninsula of Michigan, and are rendered immensely valuable by the exhaustless mines of copper and other ores found therein. A considerable number of those mines have already been discovered in the trap ranges, within a few miles of Lake Superior; and from the geo-

products of these lands to the principal markets of the United States at a very trifling cost.

It likewise appears from the reports to this office, that the agricultural lands are of a fair quality, producing the usual culinary vegetables and grass in abundance, and, when properly tilled, they have been found favorable for grain crops also; and for all these products, a fair price and good market will be found at the mines.

Timber—such as white and yellow pine, sugar maple, yellow birch, &c.—is, in many places, very abundant, and by its thrifty growth gives evidence of the richness of the soil.
