There is a habit which boys teach each other at the Academy or College—a habit indulged in when by himself, in solitude, growing up with the boy to manhood; few of those who indulge in this pernimannood; tew of those who indulge in this permi-cious practice are aware of the consequences until they find the nervous system shattered, feel strange and unaccountable feelings, vague fears in the mind. The individual becomes feeble, he is unable to labor with accustomed vigor, or to apply his mind to study; his step is tardy and weak, he is dull, ir-resolute. If the Solitary Vice

If the Solitary Vice
Is continued, the procreative power is destroyed, and marriage rendered impossible, a long train of nervous affections follow, the countenance is downcast, the eyes without natural lustre, shamefacedness is apparent. These are symproms which should awaken the attention of those similarly afflicted.

Be concious of the cause of his decay, and quit it, he suffers under those terrible nocturnal and involuntary emissions, which weaken and shame him, producing mental and physical prostration. If he emancipates himself before the practice has done its worst, and enters matrimony, his marriage is unfruitful, and his sense tells him that this is caused unfruitful, and his sense tells him that this is caused by his early follies.

Persons of all ages can now judge what is the cause of their declining health, losing their vigor, becoming weak, pule and emaciated.

TO THE PUBLIC.

The lands embraced in the above proclamation are located principally on and adjacent to the Mississippi and St. Croix Rivers. Those designated as mineral are extremely valuable; because in addition to the copper and other ores found in them, they are well watered, and have ready access to market, either to the South, by the Mississippi river, or to the East, by the way of the lakes, and the several lines of communication that connect therewith.

therewith.

Valuable timber and all other necessary requisites for building and smelting, are found in great abundance, and of the finest quality. The climate is healthy and pleasant—the cold being rarely more intense than in the northern part of New York—and many of the lands are exceedingly fertile, producing all the grains and vegetables that can be raised in Massachusetts or northern New York.

Maps showing the localities of the mines, and other valuable information relating thereto, derived from the geological survey, &c., which cannot be embraced in this brief notice, will be prepared and deposited in the land office at St. Croix for inspection as early as practicable before the commencetion as early as practicable before the commence ment of the public sales.

NOTICE TO PRE EMPTION CLAIMANTS. Every person entitled to the right of pre-emption o any of the lands within the townships and parts to any of the lands within the townships and parts of townships above enumerated, is required to establish the same to the satisfaction of the register and receiver of the proper land office, and make payment therefore as soon as practicable after seeing this notice, and before the day appointed for the commencement of the public sale of the lands embracing the tract claimed; otherwise such claim will be forfeited.

Marie, that persons holding under leases or permits, or those in the occupancy of a mine or mines, have paid up the per centum of rents required by the act above mentioned, will be conclusive on that

point.

Persons occupying under leases or permits, will not be permitted to relinquish their rights under that occupancy, and enter as settlers; and where any such leases or permits may expire before the day of sale, the rights granted to the holders thereof will be regarded as reserving the lands covered thereby from entry under any other right till the day of sale, when they will be offered at public sale as mineral lands.

RICHARD M. YOUNG, Commissioner. The "mineral lands" included in the foregoing proclamation are chiefly situated between Lake Superior and Montreal River, and on Isle Royale, in the northern peninsula of Michigan, and are rendered immensely valuable by the exhaustless mines of copper and other ores found therein.

A considerable number of those mines have already been discovered in the trap ranges, within a few miles of Lake Superior; and from the geological character of the country, and the explorations already made, it cannot be doubted that others equalty, if not more valuable, will be found throughout this whole "mineral region."

In some of the mines now worked, copper is found almost pure; and, in fact, most of the native copper and ores yield a greater per centage than copper and ores yield a greater per centage than any other yet discovered in the world. Silver is also found in considerable quantities.

All the necessary materials for the construction of furnaces, and fuel of smelting, are found in abundance in the immediate neighborhood of the mineral.

The climate in winter, though cold, does not in-terrupt the operations of the miners; in fact, that season is considered the most favorable for their operations.

The proximity of these mineral lands to the shore of Lake Superior, on which are several safe and excellent harbors, and the water communication therefrom, by the Sault Ste. Marie, Lakes Huron, Erie, &c., furnish ready means of transporting the products of these lands to the principal markets of the United States at a very trifling cost. the United States at a very trifling cost.

It likewise appears from the reports to this office, that the agricultural lands are of a fair quality, producing the usual culinary vegetables and grass in abundance, and, when properly tilled, they have been found favorable for grain crops also; and for all these products, a fair price and good market will be found at the mines.

Timber—such as white and yellow pine, sugar maple, yellow birch, &c.—is, in many places, very abundant, and by its thrifty growth gives evidence of the richness of the soil.

THE ORIGINAL DISCOVERER OF THE Genuine Townsend Sarsaparilla. CENUINC TOWNSEND is now about 70 years of age, and has long been known as the author and discoverer of the Genuine Original Townsend Sarsaparilla. Being poor, he was compelled to limit its manufacture, by which means it has been kept out of market, and the sales circumscribed to those only who had proved its worth, and known its value. It had reached the ears of many, nevertheless, as those persons who had been healed of sore diseases, and saved from death, proclaimed its excellence and wonderful HEALING DOWER ts excellence and wonderful HEALING POWER. ts excellence and wonderful HEALING POWER. come, the means are supplied; this Grand and Unequalted Preparation is manufactured on the largest scale, and is called for throughout the length and breadth of the land, especially as it is found incapable of degeneration or deterioration.

Unlike young S. P. Townsend's, it improves with age, and never changes, but for the better; because it is prepared on scientific principles by a scientific man. The highest knowledge of Chemistry, and the latest discoveries of the art, have all been brought into requisition in the manufacture of the old Dr's Sarsaparilla. The Sarsaparilla Root, is well known to medical men contains many medical properties and some properties which are insert or useless, and others which if retained in preparing it for use, produce fermentation and acid, which is injurious to the system.
