VINAIGRE AROMATIQUE. COSMETIQUE, ET ANTI-METHITIQUE DE BULLY. THE highly sanitory, balsamic, and tonic properties of this Vinegar render it far superior to Cologne Water-for the ordinary purposes of the toilet and the bath, surpassing the latter in its perfume and cheapness, and in its greater efficacy, for the promotion of cleanliness and health. This article has been known and extensively use in Europe for very many years, where it has, to a considerable extent, superseded the use of Cologne Water. The subscriber feels assured that it needs only to be made known in this country to ensure

its equally general adoption. It has obtained the approval of several eminent physicians of this city, to whose notice it has been submitted. It prevents and removes pimples, tetter, and asperity of the skin; it refreshes and whitens the skin, rendering it soft and smooth. It corrects the clammy and bitter taste of the mouth, imparting a fresh and pleasant breath. It cleanses and whiten the teeth, and hardens the gums. Friction with the teems and natures are guints and assuage rheumatic pains. It allays headache by application to the temples. It is effectual in removing inflamnation of the eyelids, and in strengthening the mation of the eyends, and in strengthening the eyes. Applied to a burn it prevents soreness. It possesses many other valuable qualities, which are detailed at large in the printed wrappers accompanying each bottle.

Cheap China, Glass and Queensware.

EING desirous of enlarging our business with the citizens of Lancaster and its vicinity, we are induced to lay before them the claims of our NOTICE TO MINERS AND PRE-EMPTION

RICHARD M. YOUNG, Commissioner. The "mineral lands" included in the foregoing proclamation are chiefly situated between Lake. Superior and Montreal River, and on Isle Royale, in the northern peninsula of Michigan, and are rendered immensely valuable by the exhaustless mines of copper and other ores found therein.

A considerable number of those mines have already been discovered in the trap ranges, within a few miles of Lake Superior; and from the geological character of the country, and the explorations already made, it cannot be doubted that others equally, if not more valuable, will be found throughout this whole "mineral region."

In some of the mines now worked, copper is found almost pure; and, in fact, most of the native copper and ores yield a greater per centage than any other yet discovered in the worked. found almost pure; and, in fact, most of the native copper and ores yield a greater per centage than any other yet discovered in the world. Silver is also found in considerable quantities.

All the necessary materials for the construction of furnaces, and fuel of smelting, are found in abundance in the immediate neighborhood of the mineral.

The climate in winter, though cold, does not interrupt the operations of the miners; in fact, that season is considered the most favorable for their operations.

The averaging of these mineral land of the paid to all kinds of repairing; which will be done at the shortest containing the paid to all kinds of repairing; which will be done at the shortest containing the paid to all kinds of repairing; which will be paid to all kinds of repairing; which will be paid to all kinds of repairing; which will be paid to all kinds of repairing; which will be paid to all kinds of repairing; which will be paid to all kinds of repairing; which will be paid to all kinds of repairing at the shortest part of the paid to all kinds of repairing at the shortest part of the paid to all kinds of repairing at the shortest part of the paid to all kinds of repairing at the shortest part of the paid to all kinds of repairing at the shortest part of the paid to all kinds of repairing at the shortest part of the paid to all kinds of repairing at the shortest part of the paid to all kinds of repairing at the shortest part of the paid to all kinds of repairing at the shortest part of the paid to all kinds of repairing at the shortest part of the paid to all kinds of repairing at the shortest part of the paid to all kinds of repairing at the shortest part of the paid to all kinds of repairing at the shortest part of the paid to all kinds of repairing at the shortest part of the paid to all kinds of repairing at the shortest part of the paid to all kinds of repairing at the shortest part of the paid to all kinds of repairing at the shortest part of the paid to all kinds of repairing at the shortest part of the paid to all kinds of the paid to all ki season is considered the most favorable for their operations.

The proximity of these mineral lands to the shore of Lake Superior, on which are several safe and excellent harbors, and the water communication therefrom, by the Sault Ste. Marie, Lakes Huron, Erie, &c., furnish ready means of transporting the products of these lands to the principal markets of the United States at a very triffing cost.

It likewise appears from the reports to this office, that the agricultural lands are of a fair quality, producing the usual culinary vegetables and grass in abundance, and, when properly tilled, they have been found favorable for grain crops also; and for all these products, a fair price and good market will be found at the mines.

Timber—such as white and yellow pine, sugar maple, yellow birch, &c.—is, in many places, very abundant, and by its thrifty growth gives evidence of the richness of the soil.

Maps, showing the localities of the mines and other valuable information relating thereto, derived from the geological survey, &c., which cannot be embraced in this brief notice, will be prepared and deposited in the land office at the Sault Ste. Marie, for inspection, as early as practicable, before the commencement of the public sales.
