 A considerable number of those mines have licedy been discovered in the trap ranges, within a few miles of Lake Superior; and from the geo-logical character of the country, and the explora-tions already made, it cannot be doubted that others equally, if not more valuable, will be found through-out this whole "mines now worked, copper is found almost pure; and, in fact, most of the native copper and ores yield a greater per centage than any other yet discovered in the world.. Horses have been successfully driven with this bit, that were set aside as beyond management as harness horses with ordinary severe bits, from the habit or invariable practice of running away in spite of the utmost endeavors of their driver—now they are good and serviceable horses. The Bits are manufactured only by HALDEMAN & SEITZ, of Marietta, Pa., who will attend to all orders concerning the sale of the same. The patent right of this invention has been secured, and it is coming fast into use. season is considered the most favorable for their operations. The proximity of these mineral lands to the shore of Lake Superior, on which are several safe and excellent harbors, and the water communication therefrom, by the Sault Ste. Marie, Lakes Huron, Erie, &c., furnish ready means of transporting the products of these lands to the principal markets of the United States at a very trifling cost. It likewise appears from the reports to this office, that the agricultural lands are of a fair quality, pro-ducing the usual culinary vegetables and grass in abundance, and, when properly tilled, they hare been found favorable for grain crops also; and for 1 these products, a fair price and good market sill be found at the mines. Timber—such as white and yellow pine, angar maple, yellow birch, &c.—is, in many places, very abundant, and by its thrifty growth gives widence of the richness of the soil.
