Seitz's Safety Bridle Bit.

THIS is a safety Bridle Bit invented and secured | Lemon Place HIS is a safety Bridle Bit invented and secured by Mr. Henry Seitz, of Marietta, Pa. This Bit is expected to supersede eventually all others, either for riding or driving, combining, as it does, the common snaffle, so arranged with the pulley, as to give any person perfect power over the most vicious or frightened horse. It obviates the objections made to the severe bits now in use, which from their painful action, often make a spirited horse rear, kick and try to run away. This bit is pleasant in its action on the mouth, causing no pain the road. pleasant in its action on the mouth, causing no pain whatever, and has the r quisite power when wanted —no horse having been found able to resist it.

DAVID MI mon horse having been found able to resist it.

The operation is as follows: The rein is hooked firmly to the saddle at A, passing through the loop C, into the bit over the roller at B, and securing it fast to the ring D, which prevents it from drawing back and forms the check rein now in use, and to which the driving reins are buckled and pass back to the driver. For horseback, the loops and rings are dispensed with, the rein being continuous, forming two reins, one of which is thrown over the saddle horn or strapped to the pummel, and the other to the rider's hand—both reins can pass throw the saddle horn or strapped to the pummel, and the other to the rider's hand—both reins can pass throw the saddle horn or strapped to the pummel, and the other to the rider's hand—both reins can pass throw the saddle horn or strapped to the pummel, and the other to the rider's hand—both reins can pass throw the saddle horn or strapped to the pummel, and the saddle horn or strapped to the pummel and the saddle horn or strapped to the pummel, and the saddle horn or strapped to the pummel and the saddle horn or strapped to the pummel and the saddle horn or strapped to the pummel and the saddle horn or strapped to the pummel and the saddle horn or strapped to the pummel and the saddle horn or strapped to the pummel and the saddle horn or strapped to the saddl saddle horn or strapped to the punmel, and the other to the rider's hand—both reins can pass throther ings of a martingale. For ladies it is particularly recommended on account of its safety and power, as a horse is by no means able to throw his head sufficiently low to kick. For double harness the reins should pass from the 1st horse over to the bit of the 2nd, through the bit and back to the the saddle piece at G, of the 1st horse—platting the reins as they cross each other between the

Horses have been successfully driven with this bit, that were set aside as beyond management as harness horses with ordinary severe bits, from the habit or invariable practice of running away in spite of the utmost endeavors of their driver-now they are good and serviceable horses.

The undersigned continue to manufacture at their hop, in Chesnut Street, a few doors West of the Museum, and near Whitehill's Foundry, in the city of Lancaster, Fanning Mills greatly superior to any ever before offered to the public, embracing all THEIR very latest improvements, among which are the Double Screen and the better application of the wind, so as to produce the most desirable effect in cleaning grain of all kinds. Experience of many years, great practical knowledge, and strict personal application, enables us to say our Fans are superior in every particular to any here-

Our attention is especially turned to fitting up, and all work undergoes our careful personal inspection before leaving our shop. In addition to our important improvements, our fans are celebrated for their ease in working, and the great expedition with which they clean all kinds of grain, besides their superior finish warrant us in saying they surpass all other mills manufactured, and we confidently warrant them to give entire sat infection upon trial

This excited the cupidity of certain unprincipled men and an old man who has been engaged in peddling cheap publications for a number of years. This man's name is Jacob Townsend. He applied to a number of men to get employment, or to sell the use of his name to put up Dr. Townsend's Sarapaprilla, stating the large sales and sums we had expended in advertising as an inducement to subark in the histories. Almong others he applied sums we had expended in advertising as an inducement to subark in the business. Among others he applied to Charles Watrous, Esq. Da. Townsend.—I verily believe your Saraparills has been the means, through Providence, of saving my life. I have for several years had a bad Cough. It became worse and worse. At last I raised large quantities of blood, had night aweats, and was greatly idebilitated and reduced, and did not expect to live. I have only used your Saranjanilla a short time, and there has a wonderful change been wrought ime. I am now able to walk all over the city. I raise no blood and my cough has left me. Female Medicine. Dr. Townsend's Sarsaparilla is a sos Bremale Medicine.

Dr. Townsend's Sarsaparilla is a sovereign and speady cure for incipient Consumption, Barrannas, Proapus Uteri or Falling of the Wount, Continense, Pites, Leucorrhon, or whites, obstructed or difficult Menstruation, Incontinence of Urine, or involuntary discharge thereof, and for the general prostration of the system—no matter whether the result of inherent cause, or causes produced by irregularity, illness or accident. Nothing can be more surprising than its invigorating effects upon the human frame. Persons of all weakness and lassitude from taking it at once become robust and full of energy under its influence. It immediately counteracts the mervelessness of the female frame, which is the great cause of Barrenness. It will not be expected of us, in cases of so delicate a nature, to exhibit certificates of cures, performed, but we can assure the afficied, that hundreds of cases have been reported to us. Thousands of cases where families have been without children, after using a few hottles of this invaluable medicine, have been liesaed with fine, healthy offspring. It has been expressly prepared in reference to female complaints. No female who has reason to suppose the is approaching that critical period, "The turn of life," should neglect to take it, as it is a certain preventive for any of the numerous and horrible diseases to which females are subject at this time of life. This period may be delayed for several years by using this medicine. Nor is it less valuable for those who are approaching womenhood, as it is calculated to assist nature by quickming the blood and invigorating the system. Indeed, this medicine is invaluable for all the delicate diseases to which women are subject.
