OLD DR. JACOB TOWNSEND, THE ORIGINAL DISCOVERER OF THE Genuine Townsend Sarsaparilla

Cenuine Townsend Sarsaparilla.

LD DR. TOWNSEND is now about 70 years of age, and has long been known as the author and discoverer of the Genuine Original Townsend Sarsaparilla. Being poor, he was compelled to limit its manufacture, by which means it has been kept out of market, and the sales circumscribed to those only who had proved its worth, and known its value. It had reached the ears of many, never theless, as those persons who had been healed o sore diseases, and sayed from death, proclaimed its excellence and wonderful HEALING POWER. Knowing, many years ago, that he had, by his skill, science and experience, devised an article which would be of incalculable advantage to mankind when the means would be furnished to bring it into universal notice, when its inestimable virtues would be known and appreciated. This time has come, the means are supplied; this Grand and Unequalled Preparation is manufactured on the largest scale, and is called for this country. would be known and appreciated. This time has come, the means are supplied; this Grand and Unequalled Preparation is manufactured on the largest scale, and is called for throughout the length and breadth of the land, especially as it is found incapable of degeneration or deterioration. Unlike young S. P. Townsend's, it improves with age, and never changes, but for the better; because it is prepared on scientific principles by a scientific training the propared on scientific principles by a scientific principle of the scientific principles by a scientific principle of the scientific principles by a scientific principle of the scientific principles by a scientific principle by a scientif

age, and never changes, but for the better; because it is prepared on scientific principles by a scientific man. The highest knowledge of Chemistry, and the latest discoveries of the art, have all been brought into requisition in the manufacture of the old Dr's Sarsaparilla. The Sarsaparilla Root, is well known to medical men contains many medical properties and some properties which are inert or perties and some properties which are inert or eas, and others which if retained in preparing t for use, produce fermentation and acid, which sinjurious to the system. Some of the properties of Sarsaparilla are so volatile, that they entirely evaporate and are lost in the preparation, if they are not preserved by a scientific progress, known only to those experienced in its manufacture. Moreover, these volatile principles, which fly off in vapor, or as an exhalation, under heat, are the very essential medical properties of the rost, which size is interest. lical properties of the root, which give to it al

Any person can boil or stew the root till they get a dark colored liquid, which is more from the col-oring matter in the root than from anything else; they can then strain this insipid or vapid liquid, sweeten with sour molasses, and then call it "Sar-saparilla Extract or Syrup." But such is not the article known as the

SARSAPARILLA.

This is so prepared, that all the inert properties of the Sarsaparilla root are first removed, every thing capable of becoming acid or of fermentation, is extracted 5 rejected; then every particle of medical virtue is secured in a pure and concentrated form; and thus it is rendered incapable of losing any of its valuable and healing properties. It works wonders in cases of Flour Albus or Whites, Falling of the Womb, Obstructed, Suppressed, or Painful Menses, Irregularity of the menstral periods, and the like, and it is effectual in curing all the forms of Kidney Disease. By removing obstructions, and regulating the general system, it gives tone and strength to the whole body, and thus cures all forms of Nervous Diseases and Debility, and thus prevents or relieves a great variety of other maladies, as Spinal Irritation, Neuralgia, St. Vitus Dance, Swooning, Epter Compulsions By removing obstructions, and regulating the

It cleanses the blood, excites the liver to healthy action; tones the stomach, and gives good digestion, relieves the bowels of torpor and constipation, adding tenevers the howels of torpor and constipation, allays inflammation, purifies the skin, equalizes the circulation of the blood, producing gentle warmth equally over all parts of the body, and the insensible perspiration; relaxes all strictures and tightness, removes all obstructions, and invigorates the entire nervous system. Is not this then the medicine you pre-eminently need?

But can any of these things be said of S. P. Townsend's inferior article? This young man's liquid is not to be

COMPARED WITH THE OLD DR'S. because of one Grand Fact, that the one is incapa-

NEVER SPOILS,
while the other does; souring, fermenting, and blowing the bottles containing it into fragments; the sour, acid liquid exploding, and damaging other goods! Must not this horrible compound be poisonous to the system? What! put acid into a system already diseased with acid? What causes Dyspepsia but acid? Do we not all know thawhen food sours in our stomachs, what mischief produces? flatulence, heart-burn, palpitation of the heart, liver complaint, diarrhea, dysentary; colic, and corruption of the blood? What is Scrofula but an acid humor in the body? What produces all the humors which bring on Eruptions of the Skin, Scald Head, Salt Rheum, Erysipelas, White Swellings, Fever Sores, and all ulcerations internal and external? It is nothing under heaven but an acid substance, which sours, and thus spoils all the fluids of the body, more or less. What causes Rheumatism but a sour or acid fluid, which insinuates itself between the joints and elsewhere, irritating and infaming the delications. Rheumatism but a sour or acid fluid, which insinuates itself between the joints and elsewhere, irritating and inflaming the delicate tissues upon which
it acts? So of nervous diseases, of impurity of the

Townsend, and yet he would fain have it understood that Old and yet he would tain have it understood that Old Dr. Jacob Townsend's Genuine Original Sarsapa rilla, is an imitation of his inferior preparation.

Heaven forbid that we should deal in an article which would bear the least resemblance to S. P. Townsend's article; and which should bring down upon the old Dr. such a mountain load of complain and criminations from Agents who have sold, and purchasers who have used S. P. Townsend's Fer

We wish it understood because it is the absolut truth, that S. P. Townsend's article and old D. Jacob Townsend's Sarganarilla are heaven. Jacob Townsend's Sarsaparilla are heaven-wide apart, and infinitely dissimilar; that they are unlike n every particular having not one single thing i

As S. P. Townsend is no doctor, and never wa is no chemist, no pharmaceutist—knows no more of medicine or disease than any other common, unscientific, unprofessional man, what guarantee can the public have that they are receiving a genuine scientific medicine, containing all the virtues of the articles used in preparing it, and which are incapable of changes which might render them the AGENTS of Disease instead of health.

But what else should be expected from one who knows nothing comparatively of medicine of the containing and the the containing

knows nothing comparatively of medicine or dis ease! It requires a person of some experience to cook and serve up even a common decent meal How much more important is it that the person who manufacture medicines designed for who manufacture medicines designed for Weak Stomachs and Enfeebled Systems should know well the medical properties of plants the best manner of securing and concentrating theil healing virtues, also an extensive system, and how to adapt remedies to these diseases! to adapt remedies to these diseases!

The celebrated Canute, when he was told by his courtiers that the waves of the Northern ocean would roll back at his bidding, "pricked the boil' by putting their assertions to the test of experiment, and thus caused them, with shame and confusion, to hide their diminished heads. The Second Washington also, when told by his satellites that a tour through Pennsylvania would make the people rise as one man to do him reverence and secure election of a whig Canal Commission many thousands majority, tested their assertions by experiment, and, like Canute, proved to the tisfaction of the world—we, of course, mean western New York-that all was vanity-or, to change the figure, in the classic language of Mrs. Partington, "that all was not gold that glistered."
That tour was a terrible failure; and the neglected coal interest of Pennsylvania begins now to find what Benedict Arnold found when he went to the British court with the swallow-tailed coat of a major general on, viz: that men "love the treason while they hate the traitor." NO. 37

Well, we have arrived at a pretty pass in the heroic age, when our country is to be blockaded by our own ships because somebody else is at war.

Cuba will come to us soon enough without fighting and those who so these with array will go cuba will come to us soon enough without fighting, and those who go there with arms will go out of the pale of the republic, and be individually responsible to the government that they assault for their acts. It is not our business as a nation to do the fighting for tyrants, or to help them keep their naughty boys in order. It is the business of this country to make more out of all the country to make more out of all the country to make money out of all the old kingo-cracies of the world, and it is the business of the navy to protect and respect our flag on every sea. The dismissal of Mr. Clover from the New York the dismissal of Mr. Clover from the New York custom house was an act worthy of the present day and the men in power. How nobly it will read in history, taken in connexion with the cruelties practised on board the Jersey prison-ship and the author of those cruelties. It will be a green sput in the mides of this more and will probe the state of the more and will probe the state of the state of

spot in the midst of this green age, and will make a grand burial ground for self-murdered reputations. The next Congress, we understand, are to be called upon to appoint a new officer at the seat of the United States government, to be styled the fence-viewer. Those long fences of Commissioner Mudd, which run like the telegrapic wires, without stopping, in every direction, are objects of great solicitude at the present moment, inasmuch as it has been asserted that there is a picket there for every administration man who has forsaken the spot in the midst of this green age, and will make

every administration man who has forsaken the sinking ship in the first quarter of the green old days.

The present dynasty, we are told, have established a national bank at the capital. They appoint clerks to office where there are no offices for them to fill, and pay them in promises to pay when Congress meets. This bastard scrip is now hawked about among the brokers, and shaved at a heavy tune, and will circulate like money when enough of it is issued. We understand that several thouof it is issued. We understand that several thousand dollurs per month is sent out in this manner; and if it is in the power of the regency to issue scrip for clerk hire, can't they issue it instead of gold Bentons for the railroad to California, in the same way, and soon run us \$100,000,000 in debt? Where, then, is the power of Congress to borrow money? where is the security of law? where is the

sub-treasury? and who are the usurpers of constiwho are the usurpers of constitutional rights and powers?
We feel in these matters like the boy at the play-house, who said he should like to look at the soups all night, if his sister Peggy had not sewed a nest of yellow wasps in the foundation of his trowsers, that paggad cross who should have been supported by nat pegged away, when the horn blew, a little the arndest. It is a virtue for a freeman to speak out darndest. It is a virtue for a freeman to speak out when he does or sees anything wrong. All you, therefore, who are cheating Uncle Sam—all you who are endeavoring to cheat your Maker—and all you who would cheat the devil if you could—answer to your names as you are called; and, as Mrs. Partington has it, "Speak, Benjamin Zone, speak or die!"

"HEROIC AGE."

Christ shall give thee light, EPRESIANS. The prayer for more light is continually ascendg from countless longing souls. The dispensahe fairest regions of the earth, carrying away, with the neglected and unworthy, the virtuous and fondly cherished; by which famine slays its tens of thou sands, and water, bursting its ancient bounds, destroys the labors and hopes of man, are hidden in obscurity; and concerning these, we may well ask light, the better to protect our lives and fortunes.

We can see but a little way, let us turn as we will. There are so many paths luring the feet, that the straight and narrow one sometimes escapes our beautiful female. She could scarcely be twenty-two years of age, yet death had pressed a clear stamp upon her lovely features. Bad Temper.

The greatest plague in life is a bad temper. It is a great waste of time to complain of other peoples'; the best thing is to amend our own; and the next best quality is to learn to bear with what we meet in others. A bad temper will always tire itself out, if it find no one to resent it; and this war browledge is worth a trifle. Inscibility is reself out, it it and no one to resent it; and this very knowledge is worth a trifle. Irascibility is very injurious to health, and so, in fact, is every morbid indulgence of our inferior nature. Low spirits, melancholy, diffidence, disinclination for orspirits, melancholy, dimoence, disincultation for or-dinary duties, discontent, fretfulness, even down to mental lassitude, indolence or despair—are very inimical to enjoyment in life, and every possible effort should be made to cast them all to the winds, and look unblushingly into the truth of the fact. It is astonishing what a little reflection will do. The fears are mostly imaginary, and with one dash of resolution may be all overcome.
